THE COMSTOCK DRILLING.

The big machine drill boring down from the surface in the east end of the Comstock has to certain proportions, having attained a depth of nine hundred feet. The hole above ground, city and perhaps, and is so heavy a piece of machinery, and it is reported to be a large sum of money involved in the job and from a slip-shod manner in which the work is being done it is not improbable that a serious accident may result, which would be very unfortunate for the Comstock, as it is not improbable that if such should happen the work would be abandoned. Some of the men who are working on the drill are good men, but the management is said to be careless and reckless, and the work is being done in a slipshod manner. The drill is now in a very critical condition, and
