THE INTER-MOUNTAIN FARMER AND RANCHMAN.

ONE DOLLAR PER YEAR.

ONE DOLLAR PER YEAR. | SALT LAKE CITY, UTAH, TUESDAY MORNING, SEPTEMBER 16, 1902. | VOL. I. NO. 32.

ARMERS' INSTITUTES NEEDED IN UTAH.

[illegible] three young [illegible] the college dairy. [illegible] attend college the [illegible] and were making [illegible] the work. They [illegible] of work they ex- [illegible] it was suggested [illegible] the agricultural course. [illegible] farm. No! No! [illegible] there was to know [illegible] would tell them [illegible] What they [illegible] anywhere else [illegible] that would help [illegible] a living anywhere else [illegible] It was a type of a [illegible] I have ever heard.

[illegible] was visiting an ar- [illegible] "Education," by [illegible] Washington in the Septem- [illegible] Speaking about the [illegible] agriculture in the Tus- [illegible] he says: "There were [illegible] difficulties in the way. The first [illegible] of the students came to [illegible] and that their main [illegible] was to escape farm life. They [illegible] agriculture." I [illegible] the experiment in [illegible] It brought to [illegible] the people of the [illegible] or see the ad- [illegible] offered by the agricultural col- [illegible] the Agricultural col- [illegible] a possible expense- [illegible] to be investigated [illegible] which have been con- [illegible] to the sports, [illegible] mean." They [illegible] a lack of a [illegible] the agricultural [illegible] work, and that their main desire [illegible] They had to accept [illegible] because they have never [illegible] that agriculture is [illegible] a business and a sci- [illegible] that richly [illegible] pay all the [illegible] farmers as a [illegible] to hit their [illegible] to which they [illegible] and also [illegible] care of the [illegible] and we have [illegible] farms in new [illegible] what the [illegible] have been [illegible] the farm.

[illegible] the agricultural course [illegible] was to know [illegible] would tell them [illegible] What they [illegible] anywhere else [illegible] that would help [illegible] a living anywhere else [illegible] It was a type of a [illegible] I have ever heard.

[illegible] was visiting an ar- [illegible] "Education," by [illegible] Washington in the Septem- [illegible] Speaking about the [illegible] agriculture in the Tus- [illegible] he says: "There were [illegible] difficulties in the way. The first [illegible] of the students came to [illegible] and that their main [illegible] was to escape farm life. They [illegible] that they knew about all there [illegible] agriculture." I [illegible] the experiment in [illegible] It brought to [illegible] the people of the [illegible] or see the ad- [illegible] offered by the agricultural col- [illegible] the Agricultural col- [illegible] a possible expense- [illegible] to be investigated [illegible] which have been con- [illegible] to the sports, [illegible] mean." They [illegible] a lack of a [illegible] the agricultural [illegible] work, and that their main desire [illegible] They had to accept [illegible] because they have never [illegible] that agriculture is [illegible] a business and a sci- [illegible] that richly [illegible] pay all the [illegible] farmers as a [illegible] to hit their [illegible] to which they [illegible] and also [illegible] care of the [illegible] and we have [illegible] farms in new [illegible] what the [illegible] have been [illegible] the farm. No! No! [illegible] there was to know [illegible] would tell them [illegible] What they [illegible] anywhere else [illegible] that would help [illegible] a living anywhere else [illegible] It was a type of a [illegible] I have ever heard.

[illegible] was visiting an ar- [illegible] "Education," by [illegible] Washington in the Septem- [illegible] Speaking about the [illegible] agriculture in the Tus- [illegible] he says: "There were [illegible] difficulties in the way. The first [illegible] of the students came to [illegible] and that their main [illegible] was to escape farm life. They [illegible] that they knew about all there [illegible] agriculture." I [illegible] the experiment in [illegible] It brought to [illegible] the people of the [illegible] or see the ad- [illegible] offered by the agricultural col- [illegible] the Agricultural col- [illegible] a possible expense- [illegible] to be investigated [illegible] which have been con- [illegible] to the sports, [illegible] mean." They [illegible] a lack of a [illegible] the agricultural [illegible] work, and that their main desire [illegible] They had to accept [illegible] because they have never [illegible] that agriculture is [illegible] a business and a sci- [illegible] that richly [illegible] pay all the [illegible] farmers as a [illegible] to hit their [illegible] to which they [illegible] and also [illegible] care of the [illegible] and we have [illegible] farms in new [illegible] what the [illegible] have been [illegible] the farm. No! No! [illegible] there was to know [illegible] would tell them [illegible] What they [illegible] anywhere else [illegible] that would help [illegible] a living anywhere else [illegible] It was a type of a [illegible] I have ever heard.

[illegible] was visiting an ar- [illegible] "Education," by [illegible] Washington in the Septem- [illegible] Speaking about the [illegible] agriculture in the Tus- [illegible] he says: "There were [illegible] difficulties in the way. The first [illegible] of the students came to [illegible] and that their main [illegible] was to escape farm life. They [illegible] that they knew about all there [illegible] agriculture." I [illegible] the experiment in [illegible] It brought to [illegible] the people of the [illegible] or see the ad- [illegible] offered by the agricultural col- [illegible] the Agricultural col- [illegible] a possible expense- [illegible] to be investigated [illegible] which have been con- [illegible] to the sports, [illegible] mean." They [illegible] a lack of a [illegible] the agricultural [illegible] work, and that their main desire [illegible] They had to accept [illegible] because they have never [illegible] that agriculture is [illegible] a business and a sci- [illegible] that richly [illegible] pay all the [illegible] farmers as a [illegible] to hit their [illegible] to which they [illegible] and also [illegible] care of the [illegible] and we have [illegible] farms in new [illegible] what the [illegible] have been [illegible]

[illegible] a share of the work [illegible] in the future [illegible] This is unfortunately [illegible] work, but it is a duty which the Agri- [illegible] colleges have [illegible] to assume their own and this be every possible means been driven to increase the knowledge and improve the effi- [illegible] of the farmer and of his work- [illegible]

To be effective the work of the Farm- [illegible] Institute must be thoroughly or- [illegible] and systematically carried on. This organization must commence with those attached to carry on the Agri- [illegible] Institutes in the Public the Agri- [illegible] colleges. Permanent [illegible] should be laid, not for one year only, but for a term of years. Only [illegible] reality followed year after year. Some [illegible] time to time such modification may be made as experience shall dictate. The plan should be to cover every immediate farming district in the State every [illegible] year. Good lectures could not only be accomplished by a [illegible] of work on these lines. Haphazard and desultory work will accomplish but little or permanent value.

* * *

As the week drawing and the fifth and subsequent of the plans grew, in old conditions of farms may be formed, thus affording a local center through which the college authorities can work more effectually in affording and arranging for instruction in the local localities. With a still further development in the work the college board may appoint a permanent officer to be known as the superintendent of farmers' institutes, who will have charge of the work. With such an officer, much might also be done to encourage and direct the work of home study and of agriculture in the rural schools, which I believe constitute a fertile field of increasingly profitable to centre in the youth of the land a love for the labors of nature that will much much to future generations.

The purpose of the Agricultural experiment stations of the Agricultural colleges is to aid in the development of the agriculture of the States in which they are located. This should be done by the elucidation of fundamental problems underlying the agricultural principles of the State, by demonstration, testing and applying and experimenting, and by keeping the agriculture of the State in touch with the world
