## The New Patent

# Tobacco Hiller.

Z. D. BLAKISTONE'S *PATENT TOBACCO HILLER* will strike 100,000 check tobacco hills with ease on common, or work time, and do it better, as regards after culture, than it can be done in any other known method. It needs no previous crossing of the plow. Its celerity is almost magical, but a greater advantage is its exactitude of planting. Estimating its work at 25 cents per 1,000 hills, it can pay for itself in one day, and leave a balance in the hands of the purchaser. Estimate1 by the implements and labor that will do the same amount of work, (it can't be done as well,) it will pay for two Hillers.

The operator can draw plants with the planters, and if the planters have to make their planting pegs, (if there be 20) they will not have to wait, and before night he can stop the Hiller and help them.

For sale by JOHN R. W. MANKIN, Washington, D. C. Price, $30.00. Machines sent by Rail or Steamer to any place in or out of the State.

# *To Tobacco Planters*

Fourteen years experience in growing Tobacco by the planters of Maryland and Virginia, has convinced the most skeptical, that Excelsior has no equal in growing or maturing that crop. It is now their unanimous opinion that, from the application of Excelsior, the crop is heavier, of finer quality, cures earlier and better, and is not so liable to suffer from drought as from Peruvian Guano. We refer to every planter in Maryland.
