John Connor, 23, of No. 27 Milk street, was struck by the north-bound Central Vermont train that left this city Friday morning at 6.55 and is now a patient at St. Joseph's hospital suffering from a badly bruised right hip, painful lacerations of the face and upper part of the body, and possible internal injuries. Connor was struck by the train while on his way to work for the company building oil tanks for the George E. Buck Company of Monson, Mass., not far from the railroad. No one saw Connor at the time of the accident and the fact that the train did not stop led to the belief that neither the engineer nor the fireman was on the side of the train that struck Connor. A man walking along the tracks about one hundred yards west of Wilson street found Connor, who was then unconscious. Night Operator Blanchette of the Columbia station came along at that time and aided in getting a passing motorists to take the injured man to the hospital. Reports from the hospital stated that Connor was resting as comfortably as could be expected.

The news of the disbanding of the First Infantry came as a surprise to officers of the regiment from Colonel Charles W. Burpee down. All had hoped to receive state recognition for their services in the way of a formal muster out.

TOOK PHYSIC EVERY NIGHT

Then She Heard of "FRUIT-A-TIVES" and Cured Herself of Constipation

MRS. JOHN CAPOZZI
Ashford, New York.

"I feel it my duty to tell you what 'Fruit-a-tives' or Fruit Liver Tablets did for me.

I tried several kinds of physic for over three years; and, of course, while I took it every night my bowels would move; but as soon as I stopped taking physic, I would be constipated and would have Piles terribly.

I heard of 'Fruit-a-tives' and bought one box and took them. Now I am not troubled any more with Constipation and no more Piles. 'Fruit-a-tives' did for me what no other medicine ever did; they left no after-effects, and now I do not have to use physic.

I recommend 'Fruit-a-tives' to all my friends".

MRS. JOHN CAPOZZI.

There is no more dangerous corner in town than the one at the junction of Main street and Slater avenue. There is no silent policeman there at present. Slater avenue has been under construction, but no work has been done for weeks. The "saw-horse" danger signal is on the light hand side of the road—part of the time in a recumbent posture. It is not lighted at night. The result is that automobiles are cutting that corner on the wrong side of the road. The drivers may not be regarding the proper law, and certainly many of them do not reduce speed to slow their horns, taking a dangerous chance. On the other hand, drivers say under the conditions, it is almost impossible to observe the law of the road, coming from the north. There has been one collision there already and numberless near-ones.
