THE LOST SENSES! DEAFNESS AND BLINDNESS, by DEWARS.

"This is a work of great interest, from one of the most learned and accomplished writers of the age revealing the mysteries of the sight and hearing, those five who have been deprived of the sense of sight or hearing, ever since his boyhood, for more than thirty years. Dr. Dewar has passed his life of great activity as a scholar, in a state of the most intense interest to which any living creature can be subjected. His account of himself, and of his discussions from the commencement of the blind, (James Mitchell, Laura Bridgeman and others,) are replete with profound thought on the interesting phenomena presented in the progress of their mental dawning." *Christian Observer.*

sep 3—tf

MACHINE FOR CRUSHING, GRINDING, AND PULVERIZING.

Recently Patented in this Country and Europe.

COCHRAN'S PLANOSPHERICAL QUARTZ CRUSHING AND PULVERIZING MACHINES are now in daily operation for the inspection of the public, and will be submitted to any reasonable practical tests proposed by parties interested.

These machines, by their simplicity of construction, their durability, the undoubted principles upon which they operate, their effective operation and result, are justly entitled to the consideration of all parties engaged in grinding, crushing, and Pulverizing Quartz, Iron Ore, Zinc, Copper, and Lead Ores, and all other Ores or Mineral substances.

It is the peculiar feature of the economy of these machines that they are found capable of crushing and pulverizing into the finest powder any amount of Quartz or other earthy matter, in proportion to the amount of weight or power applied. The earthy matter is so completely ground and pulverized, that the Gold may be easily separated, and subjected to any process of amalgamation that may be necessary.

The machines work and deliver wet or dry, as may be required, and run with little friction, (being almost without machinery,) requiring no lubricating; the principle upon which they operate precludes the possibility of their being put out of order; nor do they heat any material while being pulverized. They are at once applicable for all purposes of grinding and pulverizing, from those required by the Druggist to those of the most extensive operations in California and Australia.

These machines are from two to twelve feet in diameter, with balls or spheres from three inches to five feet in diameter, each machine weighing from 250 pounds to 20 tons each, and are sold, with the right to use them, as from $100 to $5,000 each.

They can be worked by steam, water, horse or manual power, according to their size; and by changing the velocity and proportioning the weight on the top of the balls, any desired amount of power may be used, from that of a man or horse upward.

The proprietors of this invention solicit examination, and will prove by practical tests the vast superiority and economy of these machines over any other for crushing, grinding, or pulverizing, heretofore offered to the public.

These machines may be seen in operation at the foot of South Eighth Street, Williamsburgh, at the large Patent Block and Saw Factory of Messrs. Barr, Waterman & Co., first street south of Peck Slip Ferry, every day, from 7 to 9 a. m., and from 4 to 6 p. m. For further particulars, apply to

E. & J. BUSSING & CO.,
aug 23—2w 32 Cliff street, New York.

Mechanics, Manufacturers, and Inventors.

THE Eighth Volume of the SCIENTIFIC AMERICAN commences on the 18th of September. It is principally devoted to the diffusion of useful practical knowledge, and is eminently calculated to advance the great interests of industry—Mechanical, Manufacturing and Agricultural—the genius and master-spirit of the nation.

It is unrivalled as a journal of the Arts and Sciences, and maintains a high character at home and abroad.

The publishers pledge themselves that the future volumes shall at least equal, if not surpass their predecessors. Among the subjects chiefly brought forward and discussed in its columns, are Civil Engineering, Architecture, Railroads, Bridges, Arricultural Implements, Manufactures of Metals, Fibrous and Textile Substances, Machinery for the purpose, Chemical processes, Distilling, Coloring, &c., Steam and Gas Engines, Boilers and Furnaces, Mathematical, Philosophical and Optical Instruments, Cars, Carriages, Water Wheels, Wind and Grinding Mills' Powers, Planing Machines, Tools for Lumber, Brick Machines, Farming, Fire Arms, Electricity, Telegraphs, Surgical Instruments, &c., besides Claims of all Patents, Reviews, Notices of New Inventions, American and Foreign. The work is in form for binding, contains several hundred Engravings, over four hundred pages of printed matter, and a copious Index. Nearly all the valuable Patents which issue weekly from the Patent Office are illustrated with Engravings in its columns, thus making the paper a perfect Mechanical Encyclopedia for future as well as present reference.

Valuable Premiums are offered for the largest list of Subscribers to this Volume. It is published weekly by MUNN & CO., at their Patent Agency Office, 128 Fulton street, New York.

KRAUSER'S PATENT CLOVER-SEED HARVESTER

IS BEFORE THE PUBLIC FOR THE FIRST TIME. Its utility is beyond comparison with any other farming implement now in use. It takes the seed from the field, leaving the straw or grass all standing. It weighs two hundred and fifty pounds, is drawn by one horse, and gathers from ten to twelve acres per day. The fingers, or teeth, catch all the heads, the revolving knives cut them off and throw them back into the box, which will cross a twenty-acre field without emptying. The heads are then loaded into a wagon and taken directly to the mill for cleaning, thus diminishing the labor three-fourths, and saving all the seed. This machine comes so low that *every farmer will have it*, and pays the manufacturer 300 per cent.

E. WHEELER, Agent for Washington.

CROSS KEYS, WASHINGTON TOWNSHIP, CAMDEN CO., N. J., September 4, 1851.

We, the undersigned, do certify that we have seen Mr. Krauser's Patent Clover Harvester in operation, and it has given perfect satisfaction. It has gathered many of the farmers' clover in this neighborhood—it is all that Mr Krauser and his mills represent it to be. The farmers have given one-half for gathering and threshing.

JAMES D. THIDEMAN,	JOSEPH DEWARD,
WILLIAM P. GARWOOD,	JOHN F. COOK,
WM. C. NICHOLSON,	JAMES B. COOK,
JAMES COLLINS,	JAMES BRYSON,
CHARLES LEWIS,	PETER H. JONES.
THOMAS TUMBLESON,	

LONG-A-COMING, October 7, 1851.

This is to certify that Mr. G. J. Naylor has gathered clover off of a sixteen-acre field of mine, which has been pastured two months with ten head of cattle, and it produced six bushels and a half and one peck of seed. I gave him two-thirds for gathering and cleaning. I think his machine is first-rate, and answers all the purpose that is intended.

NEHEMIAH NICHOLSON.

The following points out the profitable nature of the Harvester:

KRAUSER'S PATENT CLOVER-SEED HARVESTER.—We have conversed with a number of Farmers, and they are of opinion that there are at least 3,000 acres in each township in Camden or Gloucester county, New Jersey. Admitting there are but 3,000, it is said that each acre will yield from 1½ to 3 bushels. Reducing it to a certainty of yielding but 1 bushel per acre, what will it cost to gather and thresh 1,000 acres?

The Harvester will gather 12 acres per day. At 8 acres per day it will take 5 harvesters 25 days, at a cost of $150
Threshing 200
Incidental expenses 150

Cost of harvesting, &c., 1,000 acres $500

Terms of gathering, on shares of one-half, which would leave from the above calculation in the hands of the gatherer 500 bushels. Selling it at $5 per bushel would be $2,500; deducting expenses, $500, would leave a balance in the hands of the gatherer of $2,000.

In a county where there are but 8 townships, deduct 3 and multiply the $2,000 by 5 would be $10,000.

We believe the above calculation to be indisputable. From the numerous farmers with whom we have consulted, we have found them to agree unanimously with the above calculation.

Perhaps no invention offers greater inducements for a profitable investment than the Harvester. For an enterprising young man, of good business habits, a large sum of money could without doubt be realized from the sale of rights in the mill and states of the Union not yet disposed of. By calling at this office, it can be demonstrated satisfactorily that men of moderate capital could not choose a better or more money-paying business.

Those who wish to see a model of his celebrated farming implement, and the satisfactory manner in which it operates, can do so by calling at E. WHEELER'S,
Opposite Browns' Hotel.

N. B.—The subscriber has purchased the right for Montgomery county, Maryland.

DISCOVERED AT LAST!

MR. SCHILLESINGER has invented a Metallic Pen which supplies a want long existing. It is coated with gutta percha, and most effectually resists the corrosive properties of the ink, and, being pointed with platina, has all the flexibility and smoothness so desirable in writing. It is equal in all respects to the most highly finished diamond-pointed gold pens, and is to be had at a price so reasonable that it must come into universal use.

This highly useful and desirable pen has been tested already in this city in engrossing on parchment, and in the ordinary business writings, and its superiority is fully admitted.

The sole agent in this city is

JOE SHILLINGTON,
oct 7 Odeon Building, cor. 4½ st. and Pa. av.

Transition Coal.

THIS rare and valuable Coal is a variety not quite changed into an anthracite, and it has only been discovered (in large quantities) at three places upon our globe, viz: at South Wales, Great Britain; at Donetz, in Russia, near the Black Sea; and at Dauphin and Lebanon counties, Pennsylvania. In the London market this coal commands the *highest* price. It is now mined upon the large estate (43,000 acres) of the Dauphin and Susquehanna Coal Company, situated in Pennsylvania, and it is nearer to the cities of Baltimore and Washington than the coal of any other region. For easy ignition, durability of fire, complete combustion, easy adaptation to the temperature of the weather, and its great power in generating heat, it is *the best coal in the world.* It has the infusibility of the bituminous coal, with the cleanliness of the anthracite, and a greater *durability* than either. It burns without making any soot or visible smoke, and the combustion is so complete that it retains the fire until *all the coal is consumed.* Not so with the anthracites, especially the hard and heavy kinds. They do not burn up, and hence the common troublesome practice of sifting their ashes to obtain more fuel. In burning the Transition Coal there is *no waste*, for the small coals made by handling, burn as well as ordinary coal. *All should be burned together.* If screened at all the *dust* only should be taken out.

A very erroneous impression exists with many persons that the *heaviest* coals are the most economical for ordinary purposes. This might be the case if coals were sold by *measurement*, but never when they are sold by weight. In Taylor's valuable work, (Statistics of Coal,) the details are given to show that 31 pounds of a free-burning red ash yielded more heat to a room in 15 hours, than 37 pounds of a heavy white ash coal, making the red ash, at $5 50, to be more economical than the white ash at $4 61 per ton. Any person accustomed to use these heavy coals will be astonished at the saving which can be made in burning the lighter kinds, when tested by the *weight* and burnt in a suitable manner.

An apprehension exists with some that the free-burning coals have a tendency to clinker. Now, as a general rule, no coal will clinker unless a greater draught be applied to it than the coal naturally requires. No one would think of applying a bellows constantly to a fire made of seasoned hickory or oak wood, and it would be equally as absurd to apply a *blast* constantly to a free-burning coal. But the heavy white ash anthracites cannot be burnt without a powerful draft, and without using a larger quantity of coal than the temperature of the weather sometimes requires. Various patterns of stoves, furnaces, cooking ranges, &c., are invented annually to conquer this difficulty, but it has never been done with complete success. In every contrivance, however, which has been invented to burn coal, the *transition* variety will make a beautiful fire, and no complaint will ever be made to a manufacturer or seller of grates or stoves when this coal is used. The draft alone is to be regulated by a damper. In introducing this new coal for the *first* time, prepared as it now is by steam power machinery for domestic use, it may give greater confidence to the buyer to say that the celebrated free burning red ash veins in the Peach Orchard district, near Pottsville, *are a continuation of the Dauphin veins*, and they approach the nearest in value to the Transition coal.

Shipments of the Transition coal have already been made to the District of Columbia, and it can be obtained at retail from the following persons:

Wm. T. Dove, Washington.	Woodford Stone, Washington.
F. Magruder, do	Hunsberger & Co., do
Wm. Warder, do	Myers & Baker, Georgetown.

Orders for this coal by the cargo, as well as for the semi-bituminous and anthracite coals, mined by the Dauphin and Susquehanna Coal Company, will be promptly executed by

ADAM E. FOSTER, Agent,
Office southwest corner Baltimore and South sts.
BALTIMORE, Sept. 15, 1852. (sep 16—1m

A CARD.

THE SUBSCRIBER begs leave to return his thanks to his friends for the very liberal support they have given him, and respectfully solicits a continuance of the same. He may be found at all times at his old stand, on D street, between 7th and 8th streets, where his expenses are small, and afford him an opportunity to sell on moderate terms to his customers.

He has just received a fine assortment of spring goods, which will be made up in the best manner—consisting of Cloths, fancy Cassimeres, and Vestings of Silk, white Marseilles, and fancy quilting, beautiful articles. Also white Drillings, Shirts, Collars, Cravats, Stocks, Suspenders, &c.

Please call and examine before purchasing elsewhere.
