FASHION NOTES.

An Ideal Summer Dress—Bodices and Sleeves—Hats and Bonnets.

The ideal summer dress of black wool is made of Priestley Henrietta cloth. For seaside and general utility there is nothing in the market that gives such complete satisfaction. Storm, shine or any ordinary hard usage that would ruin other materials has scarcely a perceptible effect on this queen of fabrics.

Bodices are shown in extreme styles, some of them so severely plain that they would be almost painful except for artistic effects in trimming. Others are so loaded with frills and fixings that the distinctive character of a waist seems to be almost a secondary consideration.

Wide-brimmed hats are gotten up in extremely picturesque style. They are trimmed a good deal, but the trimmings are so carefully arranged and artistically adjusted that, while there is any quantity of them, they do not suggest any overdone effect.

Sleeves are said to be growing larger. In a dress recently ordered, seven yards of material were put into the sleeves. Of course, it takes a great deal to make the sleeve itself, but there are ruffles and puffs and crimpings world without end.

Poke bonnets of shirred material are popular. They have inside trimming arranged after the old fashions, a wreath of flowers sometimes being visible above the crimped and waved front tresses.

Folded belts are preferred to plain ones; indeed the plain belt is almost a thing of the past, except in ribbon with fancy buckle, and even these are less liked than the more fluffy, loose arrangement.

While black silk dresses are for the moment very much liked, their advent seems to have made no difference whatever in the demand for good black woul goods.—N. Y. Ledger.

—Havana is a city of 250,000 inhabitants, combining the comforts of American cities with some of the peculiarities of European capitals. It is only three days' journey from New York and is situated on perhaps the most fruitful island in the world. This little spot of Cuba has remitted since 1827 the sum of $137,000,000 in hard cash to the Spanish treasury.

PERFECT TITLE OR NO SALE.

We believe that we have from $100 to $1000 of a bargain for any man and unincumbered city lot or farm. We have a dozen of more farms that we have to sell near Wichita. We would also like to have all persons know that we will not knowingly attempt to sell any property not having a perfect title, and in any case we should fail to promptly furnish a perfect title we will at once refund to purchaser all money placed in our hands to mad bargains or as a forfeiture on contracts according to the contract. We desire also to say that we have many bargains in city property, as well as farms.

WORRY AND INDIGESTION.

Serenity of Temper an Indication of Good Health.

Worry is a baneful curse and source of untold evils. It seams the face with lines and furrows, and has a most depressing effect upon that hyper-sensitive organ, the stomach, which at such times becomes a most unwilling and laggard servant. Indeed, it is safe to say that unless encouraged by a cheerful temper and bright, or at least hopeful, thoughts, the stomach will play truant or sulk and do no work which it can shirk. The physiological explanation of this is the close alliance of the great sympathetic nerves, which are worse than the telegraph for carrying bad news; the worry and anxiety which depress the brain produce simultaneously a semi-paralysis of the nerves of the stomach, gastric juices will not flow and—presto! there is indigestion. One sign of mental health is serenity of temper and a self-control that enables us to bear with equanimity and unruffled temper the petty trials and jars of life, especially those arising from contact with scolding, irascible, irritating folk. It is well to remember at such times that these unfortunates are their own enemies, and a cultivation of the art of not hearing will help us very much. It is a very useful art all through life and well worth some trouble to acquire.—Democrat's.

The latest application of aluminium is to lithography. The stone used for lithographing is found in Bavaria, and as the supply is diminishing its cost is increasing. Moreover, it is very brittle, and, being rigid, can only be used on flat surfaces. We read that under a recently patented process aluminium plates, weighing from two pounds to ten pounds, and costing from twenty shillings to forty shillings, do the work equally well, and that, being flexible, they can be molded into form for cylinder presses. It is also reported that aluminium plates are taking the place of steel for engraving purposes.—Invention.
