THE HYDRAULIC CLOTHES WASHER AND WRINGER.

The best and most useful invention of the kind for saving household labor ever invented.

Has more and better recommendations for saving time, labor and the wear and tear of fabrics washed, than any other machine. All the other machines either rub the clothes and wet them out speedily, or do not satisfactorily perform their work. With the

HYDRAULIC CLOTHES WASHER

This is not the case. There is no rubbing of the clothes, in consequence, no wear and tear. The washing is great cool pistely and thoroughly performed by the action of the wheel alone. Send for a circular, giving full explanation, or call and examine them at the General Southern Agency.

Good inducements offered to agents elsewhere.

THE LANE COTTON MILLS.

These MILLS, which were built in 1861, as an effort of Southern enterprise, are again under my control, and I am prepared to supply the trade with COTTON YARNS Nos. 5's to 12's, packed in such proportions as may be ordered, and of the quality put up by me prior to the war, which excelled any ever offered in this market.

It is known, that with these Mills were in my hands, the product of them attained a reputation for superiority of quality and fulness of weight—unequalled by any other Yarns offered. This reputation has been prostituted by certain unprincipled parties, who have not scrupled to use my name and brand, to cover an inferior article, and furthermore, I learn that Georgia Yarns have been offered, in this manner, as the product of my Mills.

To protect myself and consumers from such impositions, have adopted a trade mark, which will, hereafter, be placed on each bale of my Yarns, with the addition of my signature, on each pad label. These Mills have no agents. Orders left at No. 29 Union street, will be promptly executed.
