NEW INVENTION OF ARTIFICIAL CHEOPLASTIC BONE TEETH, without metal plate or clasps, by

DR. S. B. SIGESMOND,

910 Broadway, New York; and 260 Penna. avenue, bet. 12th and 13th sts., Washington, D. C.,

Calls the attention of the public to the following advantages of his improved system:

1st. The teeth of his manufacture will never corrode nor change color by any acids, and are three-fourths lighter than any other.

2d. No teeth or roots need be extracted, as the artificial ones can be inserted over them.

3d. The roots will be made insensive and never to ache.

4th. No temporary teeth are needed, as permanent ones can be made immediately, thereby preserving the natural expression of the face, which, under the old system, is frequently disfigured.

5th. This work has been fully tested, for over five years, by many of the first Chemists and Physicians of this and the old country.

Dr. S. has also invented a white indestructible metal filling with which the most sensitive teeth can be filled without pain, and can build up a perfect sound tooth on any side roots, which will last through a lifetime.

He refers to the following gentlemen: Dr. V. Mott; Dr. Doremus, Professor of Chemistry; Hon. A. Mann, jun.; Capt. Crabtree, Vice President of the Emigration Co. of New York; Hon. Judge Wayne, of the Supreme Court, of Washington, D. C.; and thousands of others.

S. R. LEWIS, S. D.,
Dental Surgeon,

OFFICE No. 246 PENNSYLVANIA AVENUE,

Between Tenth and Thirteenth Streets,

WASHINGTON CITY,

Respectfully tenders his professional services to the public. Having had an extensive practice in Philadelphia, he feels himself fully competent to discharge his duty in every case which may be presented to his care.

Dr. L. has secured the right to use the new improvement, patented by Drs. A. M. & J. L. Amy, of Philadelphia, for fastening artificial teeth to gold, silver or platina plates, which precludes the possibility of saliva or foreign materials secreting between them, at the same time rendering the operation more firm, natural, and of more utility to the patient, dispensing with the ordinary modes of fastening, by rivetting or soldering, which so often causes the springing of plates, and consequently an imperfect adaptation to the mouth.

He would respectfully invite the public to his office to examine this improvement. To do so is to be convinced of its superiority over all methods heretofore used.

The dental profession is also invited to call and examine its merits and utility.

Also, dentists can be furnished with teeth of all kinds, at a less price than they can be bought elsewhere. nov 6—tf
