STAVE AND BARREL MACHINERY.
IMPORTERS AND MANUFACTURERS OF
HUTCHINSON'S PATENT.
This celebrated machinery is offered to the public in the fullest confidence that for simplicity and economy, and for speed and quality of work, it may safely CHALLENGE COMPARISON WITH ANY OTHER IN USE.
It is adapted alike to the manufacture of Barrels for Flour, Lime, Cement, Whiskey or Molasses, as well as for Rice tierces, Sugar hogsheads, &c. For Dry Barrels the Staves may be cut, jointed and crozed, and the heads cut and turned ready for use, for from two and a half to three cents per barrel and with material so prepared the cooper can make from three to five times as many Barrels as he can when he prepares the material himself.
Beech, Birch, Maple, Elm, Cotton-Wood and other kinds of timber, which will not pass, can be worked up into good Staves by this machinery, thus securing another important advantage.
The advertiser having control of this valuable right for the city of Richmond, Va., and adjoining county, which are the most valuable places in the Union for manufacturing Flour Barrels, confidently offers it for sale, and is prepared to give all information on the subject that may be required.
