Honolulu Hawaiian standard time is

Times of the tide are taken from the U. S. Coast and Geodetic Survey tables. The tides at Kahului and Hilo occur one one hour earlier than at 10 hours 30 minutes slower than Greenwich time, being that of the meridian of 157 degrees 30 minutes. The time ball shows at 1:30 p. m., which is the same as Greenwich, 9 hours, 0 minutes. The Sun and Moon are for local time for the whole group.

U. S. DEPARTMENT OF AGRICULTURE—WEATHER BUREAU.

The following data, covering a period of 32 years, have been compiled from the Weather Bureau records at Honolulu, T. H. They are issued to show the conditions that have prevailed, during the month in question, for the above period of years, but must not be construed as a forecast of the weather conditions for the coming month.

Month, September, for 32 years.

TEMPERATURE, (1899-1906).

Mean or normal temperature, 78 deg.

The warmest month was that of 1891, with an average of 80 deg.

The coldest month was that of 1905, with an average of 77 deg.

The highest temperature was 88 deg., on 9 and 16, 1899; 29, 1891; 14, 1892; 10, 1896; 12, 1906.

The lowest temperature was 65 deg., on 15, 1906.

PRECIPITATION (1877-1894, 1904-6).

Average for the month, 1.27 inches.

Average number of days with .01 of an inch or more, 14.

The greatest monthly precipitation was 7.92 inches in 1889.

The least monthly precipitation was 0.36 inches in 1882.

The greatest amount of precipitation recorded in any 24 consecutive hours was 1.27 inches on the 8th, 1899.

RELATIVE HUMIDITY.

Average: 9 a. m., 66 pct.; 3 p. m., 68 pct.; average, 9 p.m. 72 pct. (1893-1906); 3 a. m., 72 pct., (1904-06).

CLOUDS AN DWEATHER (1899-06).

Average number of clear days, 14; partly cloudy days, 14; cloudy days, 2.

WIND.

The prevailing winds are from the NE. (1875-1894, 1904-6).

The average hourly velocity of the wind is 7.9 miles (1904-06).

The highest velocity of the wind was 28 miles from the NE. on the 18th, 1906 (1904-06).

Station: Honolulu, T. H.
Date of issue: August 31, 1907.
7 a. m. clock averages from records of Territorial Meteorologist, 8 o'clock averages from Weather Bureau records.

WEEKLY WEATHER BULLETIN

For the week ended October 26, 1907.

Honolulu, Oct. 28, 1907.

GENERAL SUMMARY.

The mean temperatures for the week were appreciably lower than those of the preceding one at all stations on Hawaii, Maui, and Molokai, and at all but two on Oahu. They were generally higher on Kauai. On Hawaii the changes were generally from —1.2 deg. to —3.7 deg.; on Maui from —1.9 deg. to —4.1 deg.; on Molokai, —1.0 deg., and on Oahu less than 1.0 deg. In the Puna district of Kauai they ranged from +1.1 deg. to +1.3 deg.

The greatest amounts of rainfall for the week occurred in the Hilo and Puna, the southern portion of the Hamakua, and the east-central portion of the Kohala districts of Hawaii, where they ranged from 1.96 to 4.54 inches. In the remaining portions of Hawaii they did not equal 1.00 inch. In the Hamakuapoko, Haiku and Koolau districts of Maui they varied from 1.00 inch to 1.85 inches, and .00 to .11 inch in the remaining districts. On Oahu the amounts ranged from .02 inch to 1.32 inches; from .98 inch to 1.50 inches on Molokai, and .03 to .77 inch on Kauai.

At stations having a record of ten or more years the total was below the average for the week .10 inch to 1.73 inches in the Hilo, Puna, Kau, and Kona districts of Hawaii; .04 to .14 inch above in the Hamakua, and Kona districts of Hawaii; .04 to .14 inch above in the Hamakua, and .03 to .20 inch above in the Kohala, except a deficiency of .09 inch in the NW portion. On Oahu deficiencies ranging from .01 to .75 inch were reported except an excess of .09 inch in the Waianae district. Stations on Kauai report deficiencies ranging from .20 to .50 inch.

The following earthquake were reported from Hawaii—Kohala Mill, 21st, 7:45 p. m., light, and Waimea, 1:20 p. m. of the 21st.

The following table shows the weekly averages of temperature and rainfall for the principal islands and for the Group:

	Temperature.	Rainfall.
Hawaii	71.3 deg.	1.35 ins.
Maui	73.1 deg.	0.76 in.
Oahu	76.9 deg.	0.32 in.
Kauai	75.3 deg.	0.37 in.
Molokai	74.2 deg.	1.24 ins.
Entire group.	73.4 deg.	0.79 in.

At the local office of the U. S. Weather Bureau in Honolulu, partly cloudy weather obtained, with measureable rainfall on the last five days amounting to .19 inch, .32 less than the normal and .16 more than during the preceding week. The maximum temperature was 84 deg., minimum 70 deg., and mean 77.0 deg., 1.0 deg. above the normal, and .1 deg. higher than last week's. The mean relative humidity was 69.4 per cent, and the prevailing wind direction NE, with an average hourly velocity of 8.0 miles. The mean daily barometer was .04 to .09 inch above the normal thruout the week.

U. OF P. MEN TOLD TO STUDY DIPLOMACY

JOHN BARRETT SAYS THERE IS A DEARTH OF COMPETENT MATERIAL IN WASHINGTON.

PHILADELPHIA, October 10.—John Barrett, president of the International Bureau of American Republics, made an address yesterday before the Wharton School of Accounts and Finance at the University of Pennsylvania. He advised his hearers to study diplomacy and political science so that competent men might be found to take the place of some of those now representing this Government.

"There is a decided lack of good men in Washington," said Mr. Barrett, "and the only thing to do is to find better men to take their places. In the past there has not been enough studying of political science and diplomacy, but I can tell you positively that this is just as important a profession as medicine, dentistry or law, and should be studied just as hard to produce the capable men we need. To be successful in this profession a man must have a knowledge of Governments and especially of his own; he must know representative men and he must be imbued with the spirit of government.

"I am glad indeed that the University of Pennsylvania—the only institution in the United States where this branch is taught—is giving so much time to political science as a study. In your work you will find a great deal in the history of the South American Republics that will be useful and instructive as compared with the history of this country and Europe, and, since history repeats itself, you can find there many things now occurring which happened in other countries years ago. We look to those countries for considerable of our products. There are 12,000,000 square miles inhabited by Latin-Americans. The field of our sister Republics is our own field. I wish to explain that out of the 21 republics in the western hemisphere, 20 are of Latin origin. We must behave well before these States and gain their favor."

Paul Killiam, president of the Wharton Association, introduced Professor Rowe, who gave a long list of Mr. Barrett's achievements as a representative of the United States in foreign lands. In return, Mr. Barrett said that no man except Secretary Root had ever been so well received in South America as was Professor Rowe.

ASSAIL RUSSIAN LIBERTIES.

ST. PETERSBURG, Oct. 5.—Znamya, organ of the Union of True Russian People jubilantly announced today that the Emperor had decided to permit the badges of the union to be worn openly.

The union intrusted a fanatic priest, Father Vostorgoff, with the task of organizing a deputation to wait on the Emperor October 30, and petition him to withdraw his manifesto of October 30, 1905, granting a constitution to Russia.

CRUELTY.

The little wife was in great distress.

"What are you crying about, dear?"

"Oh George, the mice have got into the pantry and eaten up a beautiful custard pie I made myself."

"There, dear, don't cry over a few little mice," said George.
