STOCKS SLOW AND LOWER

ADVANCE IN ATCHISON FEATURE OF YESTERDAY'S MARKET.

Buying of This Issue Only Place Bull Pool Was Active—Bond Market Weak—General Conditions.

Sales of stock shares	672,700
Corresponding day last year	465,200
Sales to date this year	11,726,500
To corresponding day last year	15,046,800

NEW YORK, Jan. 28.—The speculative party which has persistently supported stocks through the latter stages of the recent advances desisted to-day to a large extent and allowed prices to slip back without any apparent measures to resist.

During the morning there was a big order executed in Atchison, which lifted that stock a large fraction over last night. This buying was attributed to an organized bull party for the purpose of supporting the market.

The sale was accompanied, however, by the rumor that Atchison was soon to be listed on the Berlin Boerse. The fact that Atchison has a block of $10,000,000 of bonds for sale was supposed to furnish a motive for stimulating the market for the stock. The movement was ineffective in checking the declining tendency elsewhere.

The rally in the last hour was palpably due to covering of short contracts by room professionals, and pointed to an inference that the day's selling had been on the short side. The bears, however, found it so easy to secure stocks that they quit buying and prices sagged again to the end of the day.

The closing was weak and dull. The highly professional character of the market makes it fitting that it should be treated from the standpoint of technical causes. So far as actual conditions bearing on values were concerned, the most influential interests are the frankly outspoken tones of pessimism.

"The tonnage is not there," says the Iron Age, "and the industry must simply adjust itself to the prevailing conditions." Futile efforts, it was said, are still being made to bring the Southern iron makers to terms of agreement for production and selling.

United States Steel preferred was not illogically the weakest and most active stock under these circumstances. A batch of very unfavorable railroad earnings for December furnished another reactionary factor.

The October returns, every bit of which reported to-day, show the inevitable effect not only of a comparison with last year's abnormally favorable conditions in the trade, but of the continued growth in operating expenses, which is of increasing effect in all railroad statements. Yet Erie, Ontario & Western and Reading, which were the conspicuous instances of unfavorable December reports, were rather less affected than the average of the list in the selling.

Possibilities of future restriction of money supplies are coming up for discussion again, owing to the decline in the inflow of currency to New York.

The reluctation implied by the action of the Stock Exchange authorities in striking from the list the securities of an industrial corporation on the ground of misrepresentation of financial condition was a somewhat depressing factor. The seven weeks' decline in the winter wheat belt was a possible factor as well. As a result prices were 1 to 2 points lower when trading left off than they were last night.

Bonds were heavy under the leadership of United States Steel second fives. Chicago Terminal fours slumped 3½ points. Total sales at par value were $3,730,000. United States twos declined ¼ per cent. on call.

MISREPRESENTATION BY STEEL FOUNDRIES COMPANY

NEW YORK, Jan. 28.—The Stock Exchange authorities made the following formal statement to-day regarding the action of the governors in striking off the list the securities of the American Steel Foundries Company:

"Whereas, It appears from the report of the committee on stock list that misrepresentations of an important character relating to the financial condition of the American Steel Foundries, at the time of application for listing its common and preferred stocks on the exchange in November, 1902, were made to the committee on stock list in support of said application; therefore, be it

"Resolved, That, in accordance with Article 33, Section 4, of the constitution, the common and preferred stocks of the American Steel Foundries be and hereby are removed from the list."

Under the section named the governing committee is empowered to suspend dealings in the securities of any corporation previously admitted to quotation or it may summarily remove any securities from the list.

Lewis Nixon, who was named as a director of the American Steel Foundries Company, said to-day that he resigned that position months ago.

"I entered the board at the request of Mr. Schwab," said he, "some time after the organization of the company. I have no interest in it financially now and never did have beyond the qualifying share which I held as director. With the beginning of Shipbuilding troubles I resigned as a director of that and a number of other companies."

Neither at the office of the company nor at the office of Max Pam was any statement for the company's side given out to-day.

BROKERS' VIEWS ON THE STOCK MARKET

[A. W. Thomson.]

NEW YORK, Jan. 28.—The temper of our prominent traders to-day was such with the news in hand that they were ready to work for a decline throughout the list. Reports were again freely circulated in regard to the steel and iron business, which would make it appear that renewed depression was in order on this line, but advices from people who are generally well informed state that there is a general improvement shown and being maintained in practically all the branches of this business excepting, possibly, the rail department, where a deadlock still exists between railway companies and the Steel Corporation as regards the future price of this commodity. Railroads are ordering very sparingly. It is admitted, but that they will get together on some basis ere long, seems certain. It was stated on the board at intervals during the session that concerns with international connections had received private advices that the conflict has broken out in the Orient, and selling orders were placed with prominent firms in the street at every statement to create a bearish tendency, which was partially fulfilled. The present reaction may extend somewhat further, but we do not see anything to change the general situation and our views that we will see higher prices in the next five or six weeks.

[Meyer & Kiser.]

NEW YORK, Jan. 28.—We have quoted from time to time during the past two or three months the opinion of a very prominent banker on stock market and money market conditions and on general questions of interest. The banker has been invariably accurate does not need to be attested by us. He has given us to-day some very interesting views on the situation and also some news that does not usually find its way into public print. He says:
