AGRICULTURAL IMPLEMENTS, &c

THE AMERICAN HAY TEDDER

Is simple in construction, durable, has a light draft, and is, in fact, the only perfect Hay Maker ever invented. The introduction of this new and important invention marks a new era in the operation of hay making, effecting as it does, an immense saving of time and labor at a season when when they are of incalculable value to the farmer.

THE AMERICAN HAY TEDDER

Is mounted upon two drive wheels, is furnished with sixteen spring forks attached to a light reel, which revolves rapidly, turning and distributing the hay in the most thorough manner. Treated in this way the hay dries quickly and evenly, and is cured ready for the barn early in the day on which it is cut.

One of the strongest recommendations of the AMERICAN HAY TEDDER is its *very great ease of draft*, while the driver sits on the seat with both hands at liberty to hold the reins. The draft is by actual test, but 150 pounds in the stoutest grass.

The simplicity and durability of these machines is unequalled. They cannot clog or easily get out of order; and they will last for years.

THE AMERICAN HAY TEDDER

Pleases everyone who has used it, or seen it in operation, and it is recommended by many of the largest farmers of New England as the very best machine ever invented.

Call and examine and investigate the proofs.

J. DAVENPORT, Agent.

PERRY'S GOLD MEDAL MOWER

Triumphant in the field at the Great

PARIS EXHIBITION,

A. D. 1867, having done its work quicker, easier and better than any other machine among nineteen competing, it received one of the highest prizes.

The Commissioner from Massachusetts pronounced it as "undoubtedly the best machine in the Exposition," "the favorite of the people," "worthy of the highest prize." The President of the Imperial Conservatory of Arts and Trades, in Paris, presented the inventor with a plate of Honor in testimony of his approval.

In our own country it has competed successfully with the best machines.

The Committee of the Rhode Island Society in October, 1866, awarded to Mr. Perry a Gold Medal.

At the New England Society and Vermont State Fair in 1866, eleven machines were entered, including Wood's, Buckeye, Clipper, Granite State, Knitten, &c., and the highest prize awarded to the Perry Mower.

After a thorough trial in the field before the Worcester County Association, the Judges awarded this Machine the highest prize, a Silver Medal in 1866.

At the great New England Agricultural Society and Rhode Island State Fairs, held at the Narragansett Park, near Providence R.I., in September 1867, it has been awarded the Highest Prize.

It has also been awarded the First Prizes at the Bristol County Fair, Middlesex Agricultural Society, and Eastern Hampden Agricultural Society, in Mass., and at other Fairs in the United States.

J. DAVENPORT, Agent.

BURT'S SELF-ADJUSTING HORSE RAKE,

Contains important and valuable improvements not possessed by any other Rake.

It has been tested by competent judges, and pronounced superior to any other Metallic Tooth Horse Rake.

It is best adapted to either light or heavy crops, on rough or smooth land, and is more readily adapted to the various weights of operators.

It is so constructed that the draft tends to hold the rake down just in proportion to the accumulation of hay, without any attention from the operator.

It is very simple in its parts and may be readily understood by the unskilled, while its operation is very easy and natural. It is admirably adapted for the gleaning of grain, as the teeth may be elevated any distance from the ground and kept in their position.

For Ease of Operation, Simplicity and Durability, THE RAKE HAS NO EQUAL. Such is the testimony of the best judges.

This Rake will bear careful examination and endure the test of thorough trial. Call and see a sample.

E. R. CLAY.

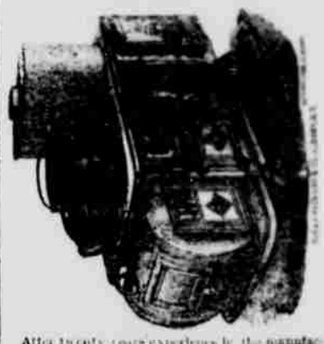
Middlebury, April 29, 1868.

THE AMERICAN COOKING STOVE.



After twenty years experience in the manufacture of stoves, we became convinced, some six years since, that a vast amount of money was being expended by the people of this country, in buying cheap and almost worthless stoves, a large portion of which was needlessly and that true economy consisted in buying the best stoves that could be made, notwithstanding the price was higher. With this view we proceeded to construct the American Cooking Stove, and spared no pains or expense to make it the best and most perfect stove that could be made. And we have experimented with it, and carefully watched its operation for the last six years, and when an improvement suggested itself, we have at once adopted it, and we have several of these improvements secured by letters patent. In this manner, we do not hesitate to say we have brought it to a higher state of perfection than has heretofore been attained in cooking stoves. The recent improvements in this stove has added largely to its convenience and effectiveness. In all the varieties of stoves we manufacture, we study usefulness, durability, convenience and economy in operation, rather than cheapness in price, and in so doing we are satisfied we study the interest of those purchasing our stoves.

For sale by

M. H. WELCH, Middlebury, Vt.

ALBANY, September 19, 1867.

☞ American Cooking Stove has just been awarded two first premiums, one for coal and one for wood, at our County Fair, and the following telegram has just been received from the State Fair at New Jersey:

FAIR GROUNDS, TRENTON, N. J., Sept. 20, '67

To Shear, Packard & Co., Albany, N. Y.:

The American Cooking Stove was awarded two first premiums over all others, at our Fair to-day "Hurrah."

ISAAC DUNN & SONS.

Thus it will be seen that the superiority of the American is so marked and decided that when ever and wherever it is put on exhibition and comes under the examination of practical and scientific men, it sweeps the board and takes all the premiums.

These Stoves are for sale by

M. H. WELCH.
