THE TRIBUNE.

NUISANCES FOR JUNE AND JULY.—Fire-crackers begin to be let off in our streets, to the great annoyance and discomfort of women and children, and often to the peril or destruction of human life. The young reprobates who indulge in this practice know they are violating the laws, and our City Officers are guilty of gross neglect of duty in letting them do so with impunity. Parents and guardians who permit such lawless acts in their children will very probably be called to bail them out of prison on more flagrant offences ere long. The habit of law-breaking once acquired, will demand stronger stimulants than this.

—One word in season as to the Booths around the Park. Last year proved conclusively that the idea of having Booths and not having rum sold is an absurdity. There will be grog-shanties or no booths. We ask our authorities *now* to set their faces against degrading the Nation's Birth-day by opening five hundred additional rum-holes in the City, when there is a great abundance most conveniently located, without them. A man may now get gloriously drunk in walking three blocks almost any where. What need of greater facilities for destruction? Messrs. Mayor and Aldermen! many thousands of our citizens earnestly implore you not to permit the erection of Booths around the Park on the Fourth of July! Don't say that they have spoken too late.

DR. PERCIVAL.—Perhaps one of the most exact and perfect geological surveys made of any country is that which Dr. Percival, a man as eminent for his scientific knowledge as for his poetic talent, has made, or rather is now making—for we do not know that it is yet completed—of the State of Connecticut.

A report from his pen has been laid before the Legislature of Connecticut, and on Saturday a proposal to give the copyright to the author, after a certain number of copies should be printed for the use of the State, was discussed. On this occasion one of the members said that Dr. Percival, in his examination of the geology of the State, had been upon one side at least of every square mile of the State, except where river or lake had interrupted his progress. He had walked over every hill, plain and morass in Connecticut,' with his basket on his arm and his bag on his back; stopping at the farm houses at night, and resuming his examination at early light. He has been engaged in this work for five years, and his salary has never exceeded three hundred dollars per annum. The Legislature of course adopted the proposal of leaving to him the copyright. [Eve. Post.

ROBBER ARRESTED.—It will be recollected that a most outrageous sacrilege was committed upon the tomb of the late Hon. James D'Wolf in Bristol, R. I. a few days ago. We learn from Col. Hatch that a man, supposed to be the robber, has been arrested. He had stolen four coffin plates, several rings, and other ornaments, and carried them to Fall River, where he sold them to Mr. Ellis Gifford, having previously cut them into small pieces. He was examined before Hezekiah Battelle, Esq. and was committed to prison. He is supposed to be an Englishman, about 35 years old. He will be taken to Rhode Island for trial. [Boston Trans.

THE MORMONS IN SALEM.—Mormonism is advancing with a perfect rush in this city, just at present. Several of the Elders have made a descent upon us, and the way they use their lungs is a caution to the Bulls of Bashan. Meetings have been holden now very frequently for several days past, and crowds flock to listen to the strange doctrines of the 'Latter Day Saints.' How many new converts they make, we have not learned, but understand that the whole number of those who have come over to the faith, is about eighty. Elder Adams appears to be the great gun.

[Salem (Mass.) Register.

INDIA RUBBER.—Caoutchouc, or India Rubber, is the dry juice or sap of many plants, but is supplied principally from South America. It was introduced into Europe in the last century, and was used only to remove pencil marks, and hence its name. But within a few years two hundred tons of it are consumed annually in consequence of the celebrated invention of Mackintosh's water proof fabric, so universally adopted as an article of outer clothing. His patent fabric is nothing more than a web coated with a solution of India Rubber in the oil of coal and tar, and then the two pressed together till they are dry. Mr. Barnard obtained a patent in 1833 for distilling the Gum and forming it into a fluid. This has the property of being the lightest of all fluids, and having the heaviest vapor, so that it may, like Carbonic Acid Gas, be poured from one vessel to another.

A MESSAGE FROM GOD.—At about half-past 10 o'clock on Friday, a well-dressed, middle-aged woman by the name of Crosby, a non-resistant in principle, announced herself to the Senate in rather an unexpected manner. She commenced as follows: "God bids me to declare to you that there is a traitor sitting here, the second in the kingdom." She had proceeded thus far, when the President of the Senate politely called her to order, and she went as suddenly as she came, we know not where. [N. H. Patriot.

HOAR FROST.—Hoar frost is the congelation of dew in frosty mornings on the grass. It consists of an assemblage of little crystals of ice, which are of various figures; according to the different disposition of the vapors when met and condensed by the cold. Its production is owing to some laws with which we are not yet acquainted.

THE GERMANS—HOME INDUSTRY.—The Ohio State Journal states that a large portion of the GERMANS of Hamilton, Ohio, have signed the Home League pledge. This is no more than we should expect from a class of men distinguished for their untiring industry. They, as well as native citizens, have a deep interest in the great National question: whether our Government shall fostes American labor by the aid of reasonable duties on foreign imports, or shall compel all classes of laboring men in the United States to struggle on without the least protection at home, and against the low wages, great capital, and restrictive systems of the old world!

No man leaves voluntarily his native land East of the Atlantic and emigrates to this country without the hope of improving his condition. And we regard every new comer, however poor he may be, if honest, able and willing to work, as adding, not only to the strength, but to the productive wealth of the Republic. Let no one then misrepresent us by asserting as has been done, that we are hostile to adopted citizens, or to any worthy immigrants from foreign countries. All we contend for is, that our National Government ought to encourage and protect to a reasonable extent every really useful, and practicable branch of domestic industry in the United States; that we possess in an eminent degree all the elements for becoming a great manufacturing as well as a great agricultural and commercial People; and that it is the duty of American Statesmen to develope those elements by the aid of wise legislative enactments. Without such aid the growing of cotton, the great staple of our Southern States, would not have been introduced, or have prospered to any thing like the extent now witnessed. Protection has increased the production of this important staple from nothing, or next to it, up to nearly one hundred million dollars' worth per annum; while it has diminished the cost of growing and cleaning it to three-fourths of the original expense.

The honest cultivators of American soil, who are numerically the true sovereigns of the Union, ought to say to the rich capitalists of the old world: "Come over to this country and erect your manufacturing establishments, where you can have an infallible hydraulic power upon the banks of our mountain streams, or at the Falls of Niagara, for propelling your machinery, and the treble benefit of cheap provisions, cheap raw materials, and the best market in the world for your manufactured goods." [Buffalo Commercial.

☞ The locusts have literally taken possession of the forests. Never, within our recollection, have we seen such quantities as at present exist in this section of the State. The result, doubtless, will prove the destruction, to a great extent, of the foliage as well as the limbs of the trees.—The army worm, we regret to say, is creating great havoc with the crops in parts of this County, as well as in St. Clair, Bond, Clinton, Montgomery and Fayette, through which we have lately passed. The grass, in particular, has fallen a prey to this destructive worm. [Alton, Ill. Tel.

MUTUAL INSURANCE.—On Dwelling Houses and Furniture only, profits returned to the Assured. THE HOUSEHOLDERS' MUTUAL INSURANCE COMPANY, Office 46 Wall st., for separating the insurance of Dwelling Houses and Furniture from that of Stores and Merchandise.

It is well known that almost all the losses incurred in the business of insurance, are the result of the burning of valuable stores and costly goods.

This increases the expense of insurance to the household, or, and may possibly deprive him of the very security for which he pays his premium.

The cash payments or premiums form a fund, which, after paying expenses and losses, is represented by scrip, and assigned to the assured in proportion to the amount of their insurance.

The Company is prepared to insure against loss or damage by fire, Dwelling Houses, occupied in whole or in part as such, Household Furniture and all Household Property ordinarily kept in dwelling houses. Every person insuring with this Company is entitled to one vote for each hundred dollars insured.

Pumps! Pumps! Pumps!

H. WARREN, Manufacturer of Miner's Patent Pumps for Wells and Cisterns.

The advantages peculiar to these Pumps are Cheapness, Durability, Ease of Operation and Security against Frost. They are also light and portable, and easily set up or removed.

The immense number of them in use, and the universal celebrity which they have obtained where they are best known, are now deemed sufficient references.

☞ As a caution in regard to similar kinds of Pumps in circulation which have not my label upon them, the pipe and wooden parts of which being made of white-wood and some of them of cucumber-wood, I deem it proper to say that all the wooden pipe of my manufacture is selected from the best of white pine lumber, *free from sap*, and being boiled and well saturated in a resinous composition, is warranted in every respect a superior article.

GARDINER'S HAY PRESS entire and complete, or the principal lever for the same, for sale, corner Lewis and Rivington-sts. This Press has received the first approbation of a committee of the American Institute, and all others who have seen it, and is now offered to the public as the most perfect article of the kind now in use.—Hay pressed in this press is suitable for shipping, and will always demand a higher price than stack or common pressed hay. The irons are sold at $100, and are constantly kept on hand. THOS. W. HARVEY, Agent. je8 2ditw*

WONDERFUL CURE of the PILES.—We invite the attention of the public to Doct. E. Humphrey's Vegetable Pile Ointment, one of the most certain remedies for Piles, Fissures, Wounds, Chilblains, &c. now before the public. From J. N. Starin, Cashier of the Cayuga County Bank. Dr. E. Humphreys—Sir—I commenced the use of you ointment for the Piles a few weeks ago, and have used it occasionally ever since, although under circumstances so unfavorable that I did not expect much benefit. On the first application I felt immediate relief from the soreness that usually attends the disease, and I think I am almost if not altogether well, and do most cheerfully recommend it to all similarly afflicted. Auburn, March 24, 1841. J. N STARIN. For sale at 155 Nassau-st, sole agency for New-York city, and at the principal Drug Stores in the city. je4 1m

DR. ALLEN'S BALSAM of Horehound, Liverwort and Pleurisy Root, has gained a reputation in the cure of Consumption and Liver complaint, never acquired by any other medicine. This medicine is not intended like the common humbugs of the day, to cure every disease, but is only for the cure of diseases of the lungs and liver, and for these complaints it has no equal on earth. Raising blood, a cough, and loss of strength are certain symptoms of consumption. Dr. B. D. Allen's Balsam of Horetound, Liverwort and Pleurisy Root, is a never failing remedy, and if the sick and distressed resort to it, they are certain of being restored to health. It contains no opium or deadly poison to lull and stupify the senses, but it removes the disease, heals the lungs, gives health and strength. Let the sick use it.

OPINION OF THE FACULTY.—*Disease of the Lungs*—Dr. Allen—Dear sir: I have prescribed your *Balsam of Horehound, Liverwort*, and *Pleurisy Root*, in severe coughs and consumption, and it has proved effectual after other remedies had failed. I am glad to find so valuable a medicine without any deleterious or narcotic ingredients. I entertain a high opinion of your Balsam, and shall continue to recommend it to my patients. Yours, &c. C. PRESTON, Physician, New York City.

OPERATIONS ON THE TEETH.—SEYMOUR WHITING & LINUS PRATT would inform their friends and the public generally that they continue at their old stand (since 52 East Broadway, but in consequence of renumbering the street, now No. 50 of the same street,) where all operations in the line of their profession will be performed upon the most approved principles of dental science. Artificial teeth inserted on fine gold plates in as good style of workmanship as at any other office in the United States from a single tooth to a full set, on single plate or double plate atmospheric principle, and warranted to answer the purposes of mastication and articulation. Carious teeth plugged with gold foil, tin or filled with cement, as the customer may prefer, or as circumstances admit.—Toothache cured without extraction in all cases where it is possible for a cure to be effected, the tooth filled and preserved for future usefulness. Our prices (always reasonable) are in conformity to the times. The poor need not hesitate to call, as we are aware that good teeth are as necessary to the health and comfort of the poor as to the more favored portion of the community. One or two young men can have an excellent opportunity to learn the profession not only theoretically but practically.
