Miscellaneous.

SONG.

You praise me, and filled with light rapture,
I vowed that I never would sin—
I averred that my life should be perfect,
Such darling words might I but win.

I slipped, and you blamed, but so gently,
So tenderly named my misdeed,
For sin I thought never of mourning—
Just then 'twas no part of my creed.

O! love is most lovely and holy,
When thus it doth kindly reprove;
So trustfulness wrapped me in blessing,
My sin was forgot in my love.

Your praise or your blame, which is sweetest
Impossible 'tis that I say—
Give either or both as they're fitting,
But—love me, oh love me always!

Mr. Greeley's Experience in the Interior of California.

The country papers along the route of Mr. Greeley's travels make merry over personal reminiscences of the philosopher. The following items are from the Mariposa Gazette:

A PHILANTHROPIST ON A HORSE.

Hon. Horace Greeley left Col. Fremont's residence, in Bear Valley, Thursday morning of last week, and reached Yo-Semite Valley the same night. He returned via the Big Tree grove, which is a distance of ten miles from the Yo-Semite trail, reaching Bear Valley Saturday night. From Mariposa the party were absent fifty-five hours, of which fourteen were spent in the valley. This is much the quickest trip ever made. Horace, though not by any means an elegant equestrian, possesses two important qualifications for making good time.—He sticks to the saddle, or, in other words, "hangs on to the crupper," with one hand, licks his beast energetically with the other, and "goes it"—shaking all over like a jelly.

HOW HE EXPRESSED HIS WONDER AT THE BIG TREES.

He was very companionable on the road, discussing upon light and heavy subjects with easy bluntness, and *naiveté*. There is considerable of a dry comic quality in his composition, which unmistakably sticks out on suitable occasions. A peculiarly was noticeable in his manner of expressing wonder and admiration of the grand scenery of the valley, big trees, &c.; when anything remarkable appeared to view he would break forth into whistling, which sounded like wind blowing through a knot-hole, or would roar on some "hime" or sort of *pot pourri*, in which all sorts of words and metres were beautifully intermingled, and set to most execrable music, enough to charm the heart of a cat head owl. He had likewise learned to yell or howl in coming across the plains, in a manner that would astonish any aborigine on this continent to a dead certainty.

MEM. OF HIS TRAVELLING COSTUME.

On one foot he wore a cotton sock, and on the other a wollen one. Boots number 14, which, not many years ago, cost as much as $2 50. Pepper and salt pants, with the old white coat and hat, completed his entire habiliments, the *tout ensemble* of which was very striking and antique. The old coat was much dilapidated, and pieces had been cut from in sundry and divers places. The committee that met him at Placerville cut all the buttons off but three, and the Yo-Semite delegation got the rest, with most of its binding.

A CASE OF CLEAR DECEPTION.

Mr. Greeley was invited to Stockton by the authorities, and was met by those deputed for the service of welcoming outside the city walls, and by them taken to the mayor's house.—There the corporation address was read at him, to which he replied briefly expressing thanks for his reception. He was then informed that, as the city's guest, rooms had been provided for him at their best hotel. Mr. Greeley, then, seated in a barouahe, was driven to the aforesaid hotel. In the evening he addressed the citizens, and in the morning as he had established himself in his carriage, (about starting for Mariposa, the boy of the house ran out, yelling: "Mr. G-r-e-e-l-e-y? O o- Greeley, yer havn't paid yer bill!" The distinguished philosopher philosophically took out his purse, paid it and left.

☞ The Lecompton party and the Democratic party—they are by no means one and indevisable. The New Albany Ledger says the Lecompton party, with the President's organ, Washington Constitution, and Judge Black, Attorney General, in the lead, profess a "serene indifference as to whether the Democrats or Republicans succeed in Ohio.' The Ledger gives its readers the following information: 'Although Judge Douglas was invited to speak in Ohio by the Democratic Central Committee, and he has been everywhere received by the Democracy of that State with the greatest enthusiasm and been accompanied in his tour by Ranney, Pugh, and other Democratic leaders, we find in the Washington Constitution such paragraphs as the following:

THE DOUGLAS FORAY IN OHIO.—It is the general belief in the political circles of the metropolis that if anything can endanger the the cause of Democracy in Ohio, it will be the visit of Mr. Douglas. The arch mischief maker has been potent there only for evil, and not for good, in the cause of the National Democracy.

Such is the "aid and comfort" which the Democracy of Ohio get from the Washington organ, in their gallant struggle to crush out abolition treason in their State, and put a quietus upon the doctrines of Giddings and Chase!"—*Mad. Cour.*

HIC, HÆC, HOC.—When the Rev. Dr. Patton was in England, he dined with several gentlemen who used a great variety of arguments to make him give up his cold water principles: "Now here," said one, "there, doctor, is some good old hock; surely you can't decline this?" "Can't replied the doctor; "who, sir, I learned to decline it when a boy—Hic, hæc, hoc." The table was in a roar, and the doctor came off triumphant. Let all boys when young decline hoc; if they will never know the drunkard's hic.—*Temperance Advocate.*

☞ In regard to the adulteration of whisky, the analysis of some of the beverage has developed the existence in it of the poisonous constituent of Coculus Indicus, in the proportion of two grains to the pint. It is a deadly poison, and as such considered fatal to human life in quantities of from five to ten grains. The death of a man from drinking whisky, in Pennsylvania, le to the investigation.

Blondin in Cincinnati—He is Challenged by a Local Editor.

Blondin, the great tight rope performer is in Cincinnati. We observe that the local editor of the McKean Citizen, emulous of tight rope honors, has extended the following challenge to Mr. Blondin:

A single telegraph wire shall be extended from the American to the Canada shore, without a single guy, directly over the the cataract at Niagara Falls. The "Local" of this paper, wearing a pair of cowhide boots and dressed in the costume of a female Dutch cook, will proceed to the middle of the wire, with a common clay pipe as a balancing pole ,driving before him a hog and cow, and carrying on his back a cooking stove, a coop of chickens, a bed and bedding, a keg of lager beer, a barber's chair, and various cooking utensils. He will then unload himself and immediately go to bed. After a snooze of fifteen minutes he will rise, dress himself, take a glass of beer, milk the cow, kill the hog and dress it, cook fresh pork for breakfast, after which he will eat a wolf's meal. He will then throw one hundred and thirty summersaults, sucking an egg while in the air at each evolution, alighting the last time on the tip of the cow's horn, and while in this position will take up the chicken coop, and after having taken the chickens one at a time and wrung their necks consecutively, will balance the coop on the tip end of his nose, balance the cooking stove on his right hand thumb, balance the bedstead on his left thumb, at the same time finishing the beer, and making a Dutch speech to the admiring crowds on either shore. After which—after the manner of Levi Norths' celebrated one horse act—the "Local" will perform the cow act. The foreman of this paper will then come out on the wire, blindfolded and shackled, walking on his hands. Then there will be a representation of Heenen and Morrissy's prize fight, in which the "Local" and foreman will exchange sundry knocks and kicks, and black eyes. The last scene will be both parties standing on their heads, and while in this predicament, play a rub of twenty one games of old sledge for the treat of all hands. The whole to conclude with a representation of some loving scenes in Romeo and Juliet.

Treasure Trove.

The New Orleans correspondent of the St. Louis Republican writes:

A rumor is current in Second District that an old seller of Charcoal has suddenly stumbled upon a handsome fortune. He lives in a building at the corner of Orleans and Bourbon streets, dating back to the years of Spanish rule, (there are many such in this city, and so worn and dilapidated by time as to be hardly habitable even for the most miserable tenant While repairing a decayed floor with his own hands, a few days ago, the vender of charcoal (so the story goes) discovered beneath it what had once been a strong oaken iron-bound box, which fell into dusty fragments under a few light blows, disclosed to his amazed and greedy eyes a glittering pile of Spanish doubloons, amounting in the aggregate to about twety five thousand dollars. By whom they were thus deposited, or for what purpose, are questions not to be answered at this day.

QUAILS.—One of the prettiest of our American birds is the quail, and although not very musical, its notes are clear, thrilling, and pleasant With anything like decent treatment, quails become semi-domesticated, though never entirely so, and add not only in beauty, but in real value to the farm; for they are not grain eaters, but immense insect destroyers; and a farmer should no more permit a quail to be destroyed about his premises than he should his domestic poultry—in fact, not as much, for it may be necessay to kill off the surplus. to eat or sell, to save the expense of Winter feeding.—But that is not the case with quails; and even should they increase to such extent as to require a little grain to sustain them through the deep snows, they will pay back all the cost of keeping in the Spring. A flock of quails in your garden or vine-patch would be the most effectual remedy for striped bugs that could be applied, and then the remedy costs nothing.

☞ A little tool has been invented for threading a needle. It is made with two blades, which holds the needle with the eye opposite a little funnel-shaped opening, into which it is perfectly easy for a person of weak sight to pass the thread, and the thread inevitably passes through the eye.

☞ A penny was deposited in the corner stone of a church at Jackson, Mich., last week, that had been taken from the corner stone of a temple in Rome, built during the reign of the first Cæsar.

☞ Henry Ward Beecher attended a New York county fair last week with two young heifers, a yoke of short horn oxen, and a pair of Yorkshire pigs.—He got two premiums and a bad cold.

☞ The Seymour Times says that Lawrence county refuses to accept a strip of territory from Jackson county containing forty-seven Lecomptonites. We do not blame her. The acquisition would be by no means a valuable one.

☞ The New York Herald announces that the proceedings of Congress will this winter be telegraphed from Washington to that city verbatim. The Herald estimates that the increased expense to each of the New York papers will be about $10,000 per annum.

☞ A reform movement has been commenced in England. Mr. Cobden and other reformers had meetings at which it was resolved that branch financial reform associations shall be established in the principal towns, and that lectures shall be given so far as to prepare the way for an organized Parliamentary attack upon the system at present in vogue.

☞ The action of the master builders of London in throwing open their yards to all men who would sign the obnoxious declaration had proved a failure. Only thirty or forty signed the declaration, and at some establishments the masters had yielded to the men.

☞ Horace Greeley reached home on the Moses Taylor on Monday. So the Tribune says.

THE MEXICAN.
MUSTANG LINIMENT
THE POPULARITY OF THE MEXICAN Mustang Liniment, is co-extensive with the civilization of the globe. Other articles claim to alleviate pain and distress—this cures. Family Physicians; Government Hospitals, Farriers, Planters, Farmers Livery-men, &c., have practically demonstrated this fact throughout the world. No article ever received such undivided praise and support from Medical and Scientific men.

RHEUMATISM
Of years' standing, has been totally cured. Piles, Ulcers, Tumors, Running sores, Scrofula, Stiff Joints, Felons, Swellings, Burns, Bites, Boils, Chaps, Neuralgia, Salt Rheum, and all aches and pains upon man and kindred complaints upon

HORSES CATTLE, &C.,
Such and as Ring-Bone, Gall, Scratches, Spavin, Poll-Evil, Sweeney, Hoof ail, etc., are subdued and cured by the MUSTANG LINIMENT.
VALUABLE HORSE SAVED!—Mr. S. Litch, Hyde Park, Vt., writes: "That the horse was considered worthless," (his case was Spavin,) "but since the free use of Mustang Liniment, I have sold him for $150 cash. Your Liniment has been doing wonders up here."

420 BROAD STREET, PHILADELPHIA, PA.
(Extract.) "In lifting the kettle from the fire it became unmanageable, tilted over, and scalded my hands very severely, almost to a crisp. It was an awful sight. The Mustang Liniment appeared to extract the pain. It healed rapidly, without soreness, and left no scar of account.
Yours truly, CHARLES FOSTER.
Such language as this is but the constant and natural echo wherever this article is used.
This Liniment is indispensable to planters and owners of horses and mules. Mr. John Daniels, of Montgomery, Ala., sold a slave for $800, who was raised from utter uselessness by this Liniment. Every family should have it. Be very particular and enquire for the Mustang Liniment and take no other.
Sold by all dealers throughout North and South America, Europe, and all the islands of the Ocean, for 25 cents, 50 cents and $1 00 per bottle.

AYER'S
Ague Cure.
FOR THE SPEEDY CURE OF
Intermittent Fever, or Fever and Ague, Remittent Fever, Chill Fever, Dumb, Ague, Periodical Headache, or Bilious Headache, and Bilious Fevers, indeed for the whole class of diseases originating in biliary derangement, caused by the Malaria of of miasmatic countries.
NO ONE REMEDY IS LOUDER CALLED for by the necessities of the American people than a sure and safe cure for Fever and Ague.—Such a remedy we are now enabled to offer, with a perfect certainty that it will eradicate the disease, and with assurance, founded on proof, that no harm can arise from its use in any quantity.
That which protects from, or prevents this disorder must be of immense service in the communities where it prevails. Prevention is better than cure, for the patient escapes the risk which he must run in violent attacks of this baleful distemper. This "Cure" expels the miasmatic poison of Fever and Ague from the system and prevents the development of the disease if taken on the first approach of its premonitory symptoms. It is not only the best remedy ever yet discovered for this class of complaints, but also the cheapest. The large quantity we supply for a dollar brings it within the reach of every body, and in bilious districts, where Fever and Ague prevails, every body should have it and use it freely both for cure and protection. It is hoped this price will place it within the reach of all—the poor as well as the rich. A great superiority of this remedy over any other ever discovered for the speedy and certain cure of intermittents is, that it contains no Quinine or mineral, consequently it produces no quinism or other injurious effects whatever upon the constitution. Those cured by it are left as healthy as if they had never had the disease.
Fever and Ague is not alone the consequence of the miasma of ponds. A great variety of disorders arise from its irritation, among which are Neuralgia, Rheumatism, Gout, Headache, Blindness, Toothache, Earache, Catarrh, Asthma, Palpitation, Painful Affection of the Spleen, Hysterics, Pain in the Bowels, Colic, Paralysis, and Derangement of Stomach, all of which, when originating in this cause, put on the intermittent type, or become periodical. This "Cure" expels the poison from the blood, and consequently cures them all alike. It is an invaluable protection to immigrants and persons travelling or temporarily residing in the malarious districts. If taken occasionally or daily while exposed to the infection, that will be excreted from the system, and cannot accumulate in sufficient quantity to ripen into disease. Hence it is even more valuable for protection than cure, and few will evo. suffer from Intermittents, if they avail themselves of the protection this remedy affords.

Blood Purifier and Blood Pills.

BOTANY · CHEMISTRY · EXPERIENCE · PHARMACY.

DR. ROBACK'S
SCANDINAVIAN REMEDIES.
WHEN DR. ROBACK, THE CELEBRATED Swedish Physician, introduced his Blood Purifier and Blood Pills in the United States, he set forth in plain language their curative properties. This was years ago. The task of recommending them has since been taken out of his hands. Enlightened men whose character for sound judgment and philosophy, gives their opinions weight in the community, men who observe, reflect, and make 'assurance doubly sure' before they decide—are everywhere approving and urging the use of these wonderful Preparations. All who confide in the wisdom and honesty of this class, or who chose to investigate for themselves are now of one mind on this important subject.
Dr. Roback invites the attention of the sick to the

LYON'S MAGNETIC POWDERS
Will destroy Garden Insects, Cockroaches, Bed Bugs, Fleas, Ants, Moths, and all pests of the Vermin kind.
THE IMPORTANCE OF A RELIABE ARticle of this kind is inestimable. In warm weather all nature teems with these annoying foes. This powder is the only article ever discovered which will exterminate them. A company of botanists, from the Horticultural Society of Paris, while amidst the forests of Asia, observed that all insects lighting upon a certain kind of plant very soon dropped dead. This fact was made use of to guard their night camps from these intruders. Quantities of the plant were brought home by Mr. E. Lyon, and found a positive insect destroyer in every experiment. It is simply a powdered leaf, chemically prepared to resist the effect of age and climate. Medals and Letters Patent have been obtained from the Governments of England, France, Germany and Russia, from the world's Fair, and numerous medical and horticultural colleges and societies.
Letter from the President of the United States.
Executive Mansion, Washington, Jan. 31, '59.
Mr. Franklin Lyon—Dear Sir: I have the pleasure to inform you that the Royal Commission of the World's Fair, at London, have awarded you a medal and certificate for the great value of your Magnetic Powders, for exterminating insects, &c.
MILLIARD FILLMORE, Chm'n.
The above was accompanied by a certificate from Prince Albert.
IT IS FREE FROM POISON,
New York, October 1, 1858.
Mr. E. Lyon—Dear Sir: We have analysed and tested your Magnetic Powders, and find them perfectly harmless to mankind and domestic animals, but certain death when inhaled by bugs, ants and insects.
RESER, CHILTON, CHEMIST.
SARANCE REID, PROF. CHEMISTRY, N. Y. HOLAU
Mr. John L. Rowe, Superintendent New York Hospital, says, "he has expelled all the bugs, ants, roaches, moths, &c., with Lyon's Powder, and finds it of immense value."
Every gardener and housekeeper must have a direct interest in an article of this kind. References can be made to the Astor, St. Nicholas, and Metropolitan Hotels; to Judge Meaux, President of the American Institute; James Gordon Bennett, Gen. Winfield Scott, Cyrus W. Field, L. M. Pease, the Five Points Mission, &c., &c. Judge Meigs says "This discovery of Prof. Lyon is of national importance. The Farmers' Club have tested it thoroughly. It will destroy locusts, grasshoppers, ants, moths, bugs, and all vermin. Garden plants can be preserved, and houses made pure."
Arrangements are now made through Messrs. Harnes & Park, of New York, to have it sold throughout the world. Many worthless imitations are advertised. Be cautious!

Agricultural
—AND—
STOVE STORE
S. WOLF & CO.,
Are in the field—and will be until the harvest closes—with their usually large and well selected stock of.

Reapers and Mowers.
Of which we will have
KIRBY'S COMBINED AMERICAN HARVESTER—which for lightness of draft, cheapness and great durability is unsurpassed by any machine in use. Upon examination any one will see at a glance the many advantages claimed for it.
RUGG'S SQUARE DRAFT REAPER AND MOWER—Has been fully tested in this market and receives the warmest recommendations from all who have used them. All side draft is obviated as the cutting is done in front of the horses.
DAVIS' COMBINED HARVESTER—Will give entire satisfaction to all who may purchase. You cannot choke it—it is light draft and easily adjusted to reap or mow and does either to the most successful manner.
REED'S & MANNY'S—Combined machines are too well know in this community to need more than a notice of the fact that we have sold of these, for three years past, as many as of any

Our stock of
