The Manchester market has been improved by the Cotton mail which arrived to-day, and we are without transactions of any importance to report.

BREADSTUFFS—No sales reported to day.

TALLOW—Steady, dull, and 6d nominally dd, for 84@5. Arrival, demand, prices weak, 14,000 casks delivered, 3100 casks. The quantity which we hold is 48,100 casks, at the same period last year it was 38,410 casks.

PROVISIONS.....IRISH BUTTER—The market is not yet recovered from the late failure, and but few buyers appear and a reduction of 2s has been accepted on Cork Firkins, which are quoted 74 to 84 dearer. The supply of Bacon has been small, and prices have advanced 2s.....Lard is firm.

STATE OF TRADE—The weekly reports from the manufacturing districts are again of a satisfactory character. At Manchester buyers are disposed to act with more confidence in anticipation of the Cotton market becoming more settled, and something like a rate estimate can be made as to future prices.

A steady business continues to be transacted both in Yarns and Piece Goods, without any material change in prices.

The Hosiery trade in the Nottingham and Leicester districts continues good.

At Leeds a fair amount of business has been transacted in Woollen Cloths. The stocks are quite moderate, and the low prices of a good spring trade were unfavorable.

There has been a steady demand for both English, foreign, and colonial Wools in the clothing districts, and the competition is stated to be fully equal to that of any previous period. Prices continue to have an upward tendency.

The several departments of the Linen trade in Ulster continue in nearly the healthy buoyancy by which they have been characterized for some time past.

The Cotton trade of this district is also active, but the wear of lower lace machines for the extension of the French or Marlatte lace, the use of which has now assumed an important position in the domestic and foreign trade of Ireland.

At Birmingham most branches of trade have been active, and employment abounds. In some departments of manufactures hands are scarce, and unless remedy succeeded the scarcity of workmen.

The Iron trade continues very brisk, and the demand is stated to be greatly in excess of the supply.

HAVRE, November 12.—Further occasions were made in Cotton this morning, which had the effect of somewhat lightening the demand, and up to the o'clock about 500 bales American changed hands at prices which represent much 1 to 2 francs more than the rates at which similar sorts sold, do has 800 bales.....The market for Cotton and all other provisions closed quiet.

The weekly reports of the Dutch and Belgian markets advise continued firmness in Cotton, but the transactions have been only to a moderate extent. The sales of Rice were quite limited, but the markets were firmer, and the tendency of prices upward. In other staple articles of foreign produce there was no material alteration.

At Hamburgh the market for foreign produce was generally dull, but prices were well maintained.

INDIA—The advices received from Calcutta by the overland mail report quite favorable prospects. The prices of produce have ut underpass any material change, and the shipments had been on the moderate scale. The only local intelligence regarding the Indian crop is, that it seems distinctly the plantain have rather reduced their previous estimates. The accounts, however, of the detailed estimates varies from 10,000 to 10,000 pounds, the latter account being considered as about the probable result.

There had been less doing in the import market, but the market for Cotton Goods was generally healthy and firm, and the advices from the upper provinces favorable.

The Money Market was abundantly supplied, and capitalists found great difficulty in obtaining good investments for their funds.

Exchange to London was good, at from 2s 0d to 2s 0½d, according to the class of bills.
