☞ **Association for the Exhibition of the Industry of All Nations.**—OFFICE OF THE SUPERINTENDENT, CRYSTAL PALACE.—Exhibitors or their Agents, are requested to present themselves, with their Certificates of Allotment of Space, at the Building on Reservoir-square, to make immediate preparations for fitting up the space allotted to them and arranging their articles. They will please enter on 42d-st., showing their Certificates at the North Gate.
JOHN M. BATCHELDER, Secretary of the Superintendent.
New-York, June 20, 1853.

NEW-YORK, May 31, 1853.

☞ **The Directors of the Association for the Exhibition of the Industry of all Nations** give notice that the Exhibition will be opened on the 15th day of July.

In making this announcement, the Directors avail themselves of the opportunity to state that the Building, which they have erected, and the Exhibition which they have prepared, will, they believe, fully meet the just expectations of the Public.

It is proper that it should be known that, in order to afford ample scope for the inventive talent and skill of our Countrymen in machinery and agricultural implements, we have increased the size of the building by adding nearly one-fourth to its area, beyond what was originally contemplated, so that we have now for the purposes of Exhibition, two hundred thousand square feet, or nearly five acres.

Not limiting their plans to a display merely curious or attractive, the Directors have organized a Department of Mineralogy and Geology in which some of the best scientific talent of the country has been employed; and the foundation is thus laid of a most valuable national collection of the mineral resources of the Country.

The Directors had hoped to open the Exhibition at an earlier period, but the novelty and intricacy of the style of construction and the high standard of architectural beauty, which it has been the object of the Association to attain, have produced delay, and it has been impracticable for the Directors, notwithstanding their utmost vigilance, and their most earnest desire, to announce the opening at an earlier day. In regard to the general character of the Exhibition, the result promises to be most gratifying and not unworthy of the confidence manifester toward it by the Government of the United States, a confidence which has elicited a cordial response from the Governments of foreign countries. It will, unquestionably, be the most attractive and interesting collection of the works of art, the results of science and the productions of industry that has ever yet been made in this country, and will tend to increase the active emulation of the age in every branch of intellectual development.

The sole charge of the interior of the building, its division, arrangements, classification and police, has been confided to two officers of the Navy of the United States, Captains S. F. DUPONT and C. H. DAVIS, and the selection of the Government clerks to the appointment of these gentlemen, who have so much distinguished themselves in the special services in which they have been employed, affords proof of the confidence reposed and the interest felt, by the highest authorities of the country, in the general objects of the enterprise.

Three gentlemen have organized their Department as follows:
J. M. BATCHELDER—Secretary of the Superintendent;
SAMUEL WARREN—Arrangement of Space and Classification;
Prof. R. SILLIMAN, Jr.—Mineralogy and Chemistry;
B. P. JOHNSON—Agricultural implements;
JOSEPH E. HOLMES—Machinery;
EDWARD VINCENT—Textile Fabrics;
PELEG FISHER—Sculpture.

The Official Catalogues and the Illustrated Weekly Record of the Exhibition are to be published in the Building, by Messrs. G. P. Putnam & Co., under the supervision of the Association.

The Directors have sensibly felt the confidence reposed in them by their fellow-citizens, in all parts of the country, and they will continue to make every effort to satisfy their just expectations.

They fill up the pores of the skin, which they also dry and stiffen, so as to produce much pain and annoyance. The Amole or shaving compound, invented and sold by WILLIAM BOGLE, No 277 Washington-st. Boston, is a purely vegetable production, of a peculiarly soothing nature and can be specially recommended for the use of those suffering from tenderness of the cuticle while shaving, are young men who have just began to use the razor. It is a foe to all those unsightly eruptions which arise from irritation.
