Special Notices.

☞ **Card.**—In consequence of the various articles which have recently appeared in the public prints, the DIRECTORS of the PACIFIC MAIL STEAMSHIP COMPANY deem it incumbent on them to announce that they have not authorized any combination with any party for the purpose of establishing higher rates of freight and passage money between the Atlantic ports and California—nor do they contemplate any such combination—their purpose being to confine their attention solely to their own business, and to the transportation of passengers and specie in the safest and cheapest manner practicable.

The time consumed by land carriage across the Isthmus of Panama has been lengthened by the greatly increased bulk of the mails and the measures necessary for the safeguard of the specie. A remedy for this will be provided by the early completion of the Panama Railroad and with the consequent saving of time the Directors have always anticipated a reduction in cost of freight and passage between California and Atlantic ports. By order of the Board of Directors,

New-York, July 1, 1853. WM. H. DAVIDGE, Secretary.

☞ **American Institute.**—A meeting of the Farmers' Club will be held TO-MORROW, July 5, at the rooms of the Institute, No. 351 Broadway, at 12 M., subject—"Benefits of Railroads to the Agriculture of the United States." Admission free.

H. MEIGS, Secretary.

NEW-YORK, May 31, 1853.

☞ **The Directors of the Association for the Exhibition of the Industry of all Nations** give notice that the Exhibition will be opened on the 15th day of July.

In making this announcement, the Directors avail themselves of the opportunity to state that the Building, which they have erected, and the Exhibition which they have prepared, will, they believe, fully meet the just expectations of the Public.

It is proper also to state, that, in order to afford ample scope for the inventive talent and skill of our Country, merchandise and agricultural implements, we have increased the size of the building by adding nearly one-fourth to its area, beyond what was originally contemplated, so that we have now for the purposes of Exhibition, two hundred thousand square feet, or nearly five acres.

Not limiting their plans to a display merely curious or attractive, the Directors have established a Department of Mineralogy and Geology in which some of the best scientific talent of the country has been employed; and the foundation is thus laid of a most valuable national collection of the mineral resources of the country.

The Directors had hoped to open the Exhibition at an earlier period, but the novelty and grandeur of the style of construction and the high standard of architectural beauty, which it has been the object of the association to attain, have produced delay, and it has been impracticable for the Directors, notwithstanding their utmost vigilance, and their most earnest desire, to announce the opening at an earlier day.

In regard to the general character of the Exhibition, the present promises to be equal and worthy of the confidence manifested towards it by the Government of the United States, a confidence which has elicited a cordial response from the Governments of foreign countries. It will, unquestionably, be the most attractive and interesting collection of the works of art, the results of science and the productions of industry that has ever yet been made in this country, and will furnish to the thinking mind a fairer estimate of the age in every branch of intellectual development.

The sole charge of the interior of the building, its division, arrangements, classification and police, has been confided to two officers of the Navy of the United States, Captains S. F. DUPONT and C. H. DAVIS, and the selection of the Government given to the appointment of these gentlemen, who have so much distinguished themselves in the service, and to which they have been employed, affords proof of the confidence reposed and the interest felt, by the highest authorities of the country, in the general objects of the enterprise.

These gentlemen have organized their Department as follows:

J. M. BATCHELDER—Secretary of the Superintendent;
SAMUEL WEBBER—Arrangement of Space and Classification;
PROF. R. SILLIMAN, JR.—Mineralogy and Chemistry;
B. P. JOHNSON—Agricultural implements;
JOSEPH E. HOLMES—Machinery;
EDWARD VINCENT—Textile Fabrics;
FELIX PIATTI—Sculpture.

The Official Catalogue and the Illustrated Weekly Record of the Exhibition are to be published in the Building, by Messrs. G. P. Putnam & Co., under the supervision of the Association.

The Directors have sensibly felt the confidence reposed in them by their fellow-citizens, in all parts of the country, and they will spare no pains to make every effort to satisfy their just expectations.
