ADVERTISING and GENERAL COMMISSION AGENCY for NORTH and SOUTH AMERICA.
Messrs. ETOURNEAU & Co., PARIS, 30 rue St. Marc.
The rapid and frequent means of communication which now unites the Old and New Worlds have created new commercial wants, which it is often found very difficult to satisfy. The French Manufacturer and Artisan have hitherto remained almost unknown abroad, because there has not existed a trustworthy intermediary agent capable of performing in an acceptable manner the duties of his distant mission. To remove all obstacles there has just been established in Paris AN ADVERTISING AND GENERAL COMMISSION AGENCY FOR THE TWO AMERICAS.
This establishment, conducted with integrity and skill, undertakes to transmit information of all kinds of which persons may stand in need, either in France or the United States; to collect debts; to effect payments; and fill, with particular attention, all orders it may receive for the purchase of any species of goods. An enterprise like this cannot fail to obtain the confidence which it merits, and patronage which is its due.
American merchants visiting France to make their purchases, may always procure competent guides, and any useful information, upon application as above, at the office of the agency, to Mr. ETOURNEAU, director of the establishment.
Mr. C. AUPOIX represents us as general agent for the United States. All business communications intended for us will receive prompt attention, upon application to him. No. 15 Beaver-st., New-York.

Machinery, &c.

A NEW THING ENTIRELY.—The astonishing performance heard of—Barrels Firkins, and the whole cooper family made and finished without a defect, air-tight and smooth enough to varnish, entirely by machinery.
Our Machine, with the tools used to perform the work, is a patent, for which we have received Gold and Silver Medals and State Diploma. It takes the timber in the bolt, saws the stave hollow in the grain, cuts them all of equal length, planes both the inside and outside perfectly smooth, trims the edges, and joints them in a perfect manner, giving each stave its equal proportion of bilge, according to its width, be it wide or narrow; chamfers bowls, cuts the crease, turns the head, and prepares the barrel or keg for the hooping process, in a manner so perfect, complete, and of superior finish, that we challenge the world to produce a better barrel, firkin or keg, than our Machines make, at the rate of 300 per day to the single set, to which we invite the particular attention of all who choose to give them inspection. We manufacture articles of the barrel family, from the smallest white lead keg to the largest cask in general use, all of which can be warranted to hold the most subtle liquids, or be adapted to the packing of dry goods. In fact, the Machine cannot make an imperfect article, except the defect is exclusively in the timber.
We have a shop at Elmira, N. Y., directly on the line of the New-York and Erie Railroad and the Elmira and Niagara Falls Railroad, five minutes' walk north of the depôt, where any persons who wish can witness the operation of the Machines, and test, to their perfect satisfaction, every branch of the work. We will feel the utmost pleasure in exhibiting to each everything connected with the work. Persons desirous of purchasing the Right and Machines for any location now unsold, can obtain any information in relation thereto by applying to us through the mail. There are but a few of the States remaining in our hands unsold, still, applicants will be referred to the present owners, most of whom will, no doubt, hold for disposal desirable locations within their respective territories. It is conceded by all judges who have examined the Machine, that it surpasses everything that has or can be invented for the same purpose, and must entirely supersede all hand-coopering.
Specimens of our work can be seen by calling on the Editors of The New-York Tribune.
