Allen Commissions are to be issued by the Grand Secretary, signed by the Grand Master or Grand Secretary, and be attested to the office of the Grand Secretary, Odd Fellows Hall.

To the Sugar Planters of Louisiana.—The most important improvement in the manufacture of Sugar is a method of Heat, so obvious to the practical planter that the iron theory of large crops is Plenty of Heat. Experience has proved that Heat is the great agent in producing a superior quality of sugar, yet although a saving of fuel is now effected with the use of the ordinary furnace, yet it is well known that the greatest heat is not obtained by the use of Apparatus so large as to cost Thousands in money.

The Steam Generator is now so fashionable, and this important object can now be completely attained by the use of the PATENT STEAM GENERATOR, upon the principle of the celebrated Cincinnati Steam Fire Engine, which will be found to be

The Steam Generator possesses the advantage of being all free from any chance of explosion, as it is made to run the Wind Engine, and has a proper arrangement for turning the burners, little if any other fuel, is required to take off the crop.

Applicable to the generation of steam, which is raised in a pressure of one hundred pounds per square inch, in the time of minutes after lighting the fire.

The advantages of the use of surcharged steam in the evaporation of Saccharine Juices, is well known, and in the operation the steam is heated to any which will change a pure red heat, without the slightest injurious effect.

Perfect safety from explosions, there are being any large body of water to explode, and hot steam being substituted for high pressure.

Economy in fuel, water and price of cost.

Simplicity in construction, easy to be managed and put in operation this season on the plantation of Col. R. C. Gunn, at Thorville, and the undersigned is ready to contract for one of the engines, and the model of fuel was one half of the quantity with the other boilers.

These Steam Generators are manufactured at the Eagle Works of Miles Greenwood, Cincinnati, and have been shipped to the principal Sugar Districts of Louisiana and the West Indies, and having had twelve years practical experience in steam building and successfully recommend the Steam Generator to the Sugar Planters, as the best, cheapest and safest to be now proposed to put up Steam Works complete, in all details, with Boilers, Steam Pipes, Tanks, Gauges, Gratings, Iron Chimnies, and first class workmanship, at lower prices than any thirteen Steam Boilers in Louisiana. Also, Tubular Boiler, Centrifugal Machines and Sugar Block Apparatus, which will be found to be the best in use. Address, New York.

The undersigned will attend the Steam Trial in connection, furnish the engineer, if required, and instruct the force on the plantation in the proper method of working them the first season, free of charge.

Those persons who use the Steam Generator, will be provided with a small Apparatus to manufacture it on the plantation, in case the supply of the original should not be at a distance.

Applications may be made to the undersigned, or to Messrs. TOOKHIRS, GRIGGS & CO., 18 Tchoupitoulas street.

UNIVERSITY OF LOUISIANA—LAW DEPARTMENT.

THE Lectures in this Department will commence on the second Monday in November, 1855, and continue until the first Monday of April, 1856. They will embrace the most important branches of the Civil, Commercial, Constitutional and Criminal Law, with the Law of Evidence, Pleadings and Practice. Lectures will be delivered by four Professors.

Those to Professor Randall Hunt will embrace:

I. Admiralty and Maritime Law, comprehending the rights and obligations of Masters and Mariners, Collisions and other Maritime Torts, General Average, Salvage, Civil and Military, Mariners' Contracts, Marine Insurance and Hypothecation, and Contracts for Maritime Services in Building, Repairing and Supplying Ships.

II. International Law, including the Law of Prize and the Practice of Prize Courts, the Jurisdiction of States in their ports and how to relate to Foreign Ships, Treaties of Peace and Private International Law.

III. The Jurisdiction of the Courts of the United States, and proceeding the Original and Appellate Jurisdiction of the Supreme and Circuit Courts, and the Original Jurisdiction of the District Courts in Courts of Revenue, and in Prize and Instance Courts of Admiralty.

Those by Professor Randall Hunt, will embrace:

I. Commercial Law, as it relates to Merchants, Persons, Marriage, the Property and Contracts, and Mercantile Remedies. They will treat of Sole Traders, Partnerships and Corporations, of Principal and Agent, of Bills of Exchange and Promissory Notes and Shipping, of Affreight and Contracts with Carriers, Contracts of Affreight, Sales and Warrants, Bottomry and Insurance; of Sales, Gifts and Mortgages and Bankruptcy.

II. Constitutional Law and Practice in Courts of Criminal Jurisdiction.

III. The Law of Evidence.

Those by Professor Rowson will embrace:

I. The Civil Code of Louisiana, in connection with the Roman, Spanish and French Laws, and the Jurisprudence of the Decisions of the Supreme Court of the State.

II. Land Tenures, whether derived from England, Spain, France or the United States.

III. The Practice of the Courts of Civil Jurisdiction in Louisiana.

Those by Professor Jonathan Rowson will embrace:

I. The Common Law and Equity Jurisprudence and Practice, and Pleadings in Civil Cases at Common Law.

II. Constitutional Law.

The fee rate of Regular of Laws will be conferred on those students only who shall have attended two full courses of Lectures, or the full course, after having read twelve months under the direction of a competent Course (see Law), and who shall, on examination by the various Professors, be found deserving the honor. The degree entitling the student to practice law in all the Courts of the State.

LARD OIL—75 bbls choice Winter Strained for sale by

JOSEPH LANDIS & CO., 32 Tchoupitoulas street.

MISCELLANEOUS.

ST. CHARLES INSTITUTE,

Situated at Greenville, near Carrollton, Jefferson Parish, La., conducted by Madame C. MACH.

THIS INSTITUTION, already favorably known to the public, having attained a great degree of prosperity, Madame Mach has found it necessary, in order to extend the accommodations and carry out improvements essential for the requirements of an establishment of this class, to add to the beautiful property which she has now occupied for one years. In pursuance of this object, spacious school rooms, large, lofty, and airy dormitories, with every convenience, have been added to the original buildings, have just been erected, and in their construction the most scrupulous regard has been directed to the health, comfort and convenience of the pupils.

The Institute possesses unquestionable advantages, being a location of the residence, sufficiently remote from the city to be free from the noise and bustle of its thoroughfares, and yet in the enjoyment of all the daily attendance of the most eminent Professors, furnish abundant security for successful study at the St. Charles Institute. The course of instruction embraces all the various branches requisite for a thorough English and French Education, and it is pursued under the superintendence of Madame and Mr. Mach, aided by most able and competent teachers, native from France and the North, who reside permanently in the Institution.

The English department is under the experienced and talented direction of Professor MELHADO, who is to accompanyously known. To do justice to the extensive and well merited patronage it enjoys, the attention is now performed every day in English and French, and there being about as many American as there are French pupils, they constitute a distinct and separate establishment, to subserve their interests. For the department of music, distinguished Professors are engaged, and every effort is made to insure excellence in this accomplishment.

Information respecting terms and all particulars may be obtained, on application personally or by letter addressed to the office of the Institution. Parents and guardians are invited to visit the establishment on Saturdays and Sundays, in order to satisfy themselves as to the interest and arrangements.

THE HALLADAY WIND-MILL.—Many of the most scientific, able and experienced Mechanics and Engineers in the United States have examined this Michine, and pronounced it one of the most beautiful and useful inventions of modern date.

It is a simple, yet ingenious device, on the gale necessary in necessity, to make a perpetual motion, and to make it go with the least force, or a gentle breeze; present loss and less resistance to the wind, still when the heaviest is raging and it is not to be overcome by its power nor to be injured by the force of the gale above, the power is gradually reduced, and the force of the gale above, the power is gradually reduced, and the force of the gale above, the power is gradually reduced, and
