President of the United States, are responsible to the country for the management of its affairs.

7. Three United States Commissioners must certify that the road is well built and equipped, and in all respects a first-class railway, before any bonds can be issued upon it.

8. The United States Government lends the Company its own bonds to the same amount that the Company issues, for which it takes a second mortgage as security.

9. As additional aid, it makes an absolute donation of 12,800 acres of land to the mile, lying upon each side of the road.

10. The bonds pay Six per Cent in gold. The principal is also payable in gold.

11. The earnings from the local or way business were over Four Million Dollars last year, or much more than sufficient to pay the interest.

12. The earnings upon the completed line of the only railroad connecting the Atlantic and Pacific Oceans will doubtless show a larger surplus over its interest account than any other.

13. The line will be completed next Summer. Three-fourths of it will be completed this Autumn.

14. The bonds have thirty years to run. Many have already gone to Europe, and it is probable that when no more can be issued they will command a higher premium than the shorter obligations of the United States Treasury. A long bond, at a high rate of interest, is always better than a short one.

15. The Union Pacific Railroad is a Government work, built under the supervision of Government officers—and to a large extent with Government money. No other bonds of a private corporation are made so secure.

16. No political party can reduce their rate of interest, nor can they be paid off in currency.

The price for the present is 103, but the right to advance is reserved.

Subscriptions will be received at the Company's office, No. 20 Nassau-st., New-York, and by John J. Cisco & Son, bankers, No. 56 Wall-st., where a new pamphlet containing a full description of the Pacific Railroad and its securities can be obtained.

$50,000.—Wanted a thorough business man, with this amount, to take charge of the manufacture and sale of Root's WROUGHT-IRON SECTIONAL SAFETY BOILER, in England and other European countries. Address JOHN B. ROOT, Nos. 26 and 27 Liberty-st, New-York.
