New Orleans Daily Crescent.

Passing the Icebergs.

BY T. BUCHANAN READ.

A fearless shape of brave device,
Our vessel drives through mist and rain,
Between the floating fleets of ice—
Those navies of the northern main;

These Arctic pastures, blindly meet,
The proofs of Nature's olden force,
Like fragments of a chrystal world
Long shattered from its shiny course.

These are the buccaneers that fright
The middle sea with dreams of wrecks,
And freeze the south winds in their flight,
And chain the Gulf Stream to their decks.

At every dragon prow and helm
There stands some Viking, as of yore,
Grim heroes from the boreal realm
Where Odin rules the spectral shore.

And soft beneath the sun or moon
Their swords and eager talchions glow;
While, like a storm-vexed wind, the Rune
Comes chafing through some beard of snow.

And when the far North flashes up
With fires of mingled red and gold,
They know that many a blazing cup,
In brimming to the absent bold.

Up, signal there! and let us hail
Yon looming phantom as we pass;
Not all her fashion, form and sail,
Within the compass of your glass!

See at her mast the steadfast glow
Of that one star of Odin's throne;
Up with your flag, and let us show
The Constellation of our own!

And speak her well, for she might say,
If from her heart the words could thaw,
Great news from some far frozen bay
Of the remotest Esquimaux.

Might tell of channels, yet untold,
That sweep the pole from sea to sea;
Of lands which God designs to hold
A mighty people, yet to be;

Of wonders which alone prevail
Where day and darkness dimly meet;
Of all which spreads the Arctic sail;
Of Franklin and his venturous fleet.

How, haply, at some glorious goal,
His anchor holds, his sails are furled;
That Fame has named him on her scroll,
"Columbus of the Polar World."

Or how his plowing bark on,
Through splintering fields, with battered
sterns;
Lit only by that spectral dawn,
The mock that mocking darkness wears.

Or how, o'er embers black and few,
The last of shivered masts and spars;
He sits amid his frozen crew,
In council with the norland stars.

No answer, but the silken flow,
Of ocean heaving long and vast;
An agony of ice and snow,
The voiceless North swings proudly past.

Thirty-Fifth Congress—First Session.

WASHINGTON, Jan. 19.—*Senate.*—Mr. Seward presented a petition from citizens of New York praying that some measure be adopted for the peaceful and gradual extinction of slavery, by making compensation out of the public treasury—laid on the table.

On motion of Mr. Chandler, a resolution was adopted requesting the Secretary of War to furnish the Senate with statements showing the number of troops stationed in Kansas, for each quarter, from the 1st of January, 1855, to the present time.

A bill was passed authorizing certain officers and men who were engaged in the search for Sir John Franklin to receive the medals presented them by the British Government.

Mr. Hale made a speech in condemnation of the Lecompton Constitution and against the extension of slavery. He announced the next head of argument to be the Dred Scott decision, but gave way for a motion to go into an executive session, which prevailed.

The Senate afterwards adjourned.

House.—The special committee appointed to investigate the charges against the members or officers of the last House, growing out of the expenditure of the Middlesex Manufacturing Company's tariff fund, are as follows: Messrs. Stanton of Ohio, Moore of Alabama, Kunkel of Pennsylvania, Wright of Georgia, and Russell of New York.

Mr. Florence introduced a bill for the ascertainment and settlement of claims for French spoliations.

Mr. Morris, of Pa., introduced a bill to providing for an international copyright law.

Mr. Grow introduced a bill to prevent the future sale of public lands under proclamation of the President until they shall have been surveyed at least fifteen years.

Mr. Letcher introduced a bill to establish a branch mint in the city of New York; which was referred to the Committee of Ways and Means.

Mr. Campbell asked but did not obtain leave to introduce a joint resolution instructing the President to enter into negotiations for the acquisition of the North American British possessions, Cuba, etc.

Mr. H. Marshall asked but did not obtain leave to offer an amendment to the Constitution of the United States, with a view that no person born on a foreign soil shall vote for President and members of Congress unless he shall be naturalized according to the United States law on the subject of naturalization.

Mr. Giddings made an ineffectual effort to introduce a resolution censuring the Supreme Court for its decision in the Dred Scott case.

Mr. Zollicoffer offered a resolution instructing the Committee on the Judiciary to inquire into the expediency of reporting a bill to regulate or restrain the migration of foreign paupers and criminals. It was adopted—yeas 137, nays 88.

The House then adjourned.

WASHINGTON, Jan. 13.—*Senate.*—The Vice-President laid before the Senate the message from the President, transmitting a copy of the convention between the United States and Denmark, on the subject of Sound dues.

Mr. Gwin reported a bill authorizing the President to contract for the transportation of the mails, troops, munitions of war, etc., over railroad, from the Missouri river to San Francisco, which was made the special order for the first Monday in February.

On motion of Mr. Seward, a resolution was adopted requesting the President, if it is not incompatible with the public interests, to communicate to the Senate any information in his possession, derived from officers of the United States squadron on the coast of Africa, or from the British or French Governments, or any other official sources, concerning the revival of the African slave trade.

Mr. Clay, from the Committee on Commerce, reported back the bill to repeal all laws granting bounties to vessels engaged in the banks or other cod fisheries.

The bill from the Committee on Commerce, on the subject of the fisheries, was made the order of the day for this day two weeks.

Mr. Hale submitted an amendment to the bill purporting to abolish the naval school at Annapolis and the military school at West Point.

Several private bills were considered and passed; also, a bill to authorize notaries public to take and certify oaths, affirmations and acknowledgments in certain cases.

Mr. Houston delivered an eulogy upon the character of the late Senator Rusk, of Texas, and the Senate then adjourned.

House.—The House refused, by a vote of 43 yeas against 143 nays, to table the bill introduced yesterday, providing for the equitable distribution of the clerks and messengers of the departments at Washington, among the several States and Territories.

Mr. Warren said that he wanted the chief clerks and the heads of the bureaus included.

Mr. Giddings suggested to distribute the offices according to the population, instead of representation; which occasioned much laughter.

The bill was referred to the select committee.

Mr. Kellogg introduced a bill authorizing deposits of bullion and gold and silver coin, and the issuance of certificates therefor.

Mr. Greenwood asked but did not obtain consent to introduce a resolution instructing the committee on the judiciary to inquire into the expediency of reporting a bill to punish negro stealing in the Indian country.

A WIFE MURDERED.—A dispatch of the 18th, from Worcester, Massachusetts, says:

Edward Boyle was this morning brought before the Police Court of this city, charged with the willful murder of his wife, Isabella R. Boyle, in Leicester, about six miles from here, on Friday night. She was found dead in her home on Saturday morning, her head terribly bruised. Boyle has made several contradictory statements, and circumstances are very strong against him. He had not lived happily with his wife for some time past. He pleaded "not guilty," and his case will go before the Grand Jury this week.

Bean Brummel was once sitting at a table with one Bligh, who was known to be a bean. The Bean, having lost a considerable stake, affected, in his facical way, a very tragic air, and cried out, "Waiter, bring me a flat candlestick and a pistol." Upon which Bligh, who was sitting opposite to him, calmly produced two loaded pistols from his coat pocket, which he placed on the table, and said, "Mr. Brummel, if you are really desirous to put a period to your existence, I am extremely happy to offer you the means without troubling the waiter." The effect upon those present may be easily imagined at finding themselves in the company of a known madman who had loaded weapons about him.

SHOCKING.—A dispatch of the 9th inst. from Romulus, N. Y., says:

A most distressing occurrence took place last night in this town. The dwelling of Aaron Warner, situated one mile south of Romulusville, took fire and burned to the ground. Mr. Warner's three eldest children perished in the flames. The parents, with their youngest child, were absent on an evening visit.

Schedule of Mails.

NEW ORLEANS POST-OFFICE.

WINTER ARRANGEMENT.

A. W. MERRIAM,
n17 1y St. Charles Billiard Room, N. O.

GILMAN'S PNEUMATIC STEAM GRANULATOR is now in use on seven plantations, comprising the largest and smallest classes; on some of which it has taken off three crops, with a combination of the following advantages over any other known application of steam to a steam Granulator or at sentre steam train:

1. It requires but a pressure of 20 pounds of steam to "strike a Battery."

2. It requires no additional water for the boilers.

3. Its pipes never "scale" or require cleaning.

4. Its heating surface is equally distributed throughout the body of juice, so that no even and hard grained sugar is made.

5. The steam being all condensed and returned to the boilers direct, no additional boilers are required where the sugar mill boilers are large and Gilman's Sugarcane Furnace is used—one of 12 cylinder boilers 30 inches in diameter and 36 feet long, with Gilman's Sugarcane Furnace, has been sufficient to grind the cane and run the Pneumatic Battery, making 10 hhds. sugar per day.

6. The Pneumatic Battery or Granulator is put in operation at much less expense to the planter than any other steam battery or application of steam to making sugar, in part or entirely by steam.

For further information, a pamphlet with full specifications and drawings will be furnished on application to the subscriber, who is now prepared to make contracts for the Battery, Evaporators or Clarifiers, to be used with direct or exhaust steam.

SAMUEL H. GILMAN,
d4 70 Gravier street, New Orleans, La.

THE BAGASSE KETTLE TRAIN AND FURNACE.—The subscriber is now prepared to close contracts with full guarantee, to take off crops with GILMAN'S PATENT BAGASSE FURNACE AND KETTLE TRAIN, with a consumption of Wood not to exceed one-half a cord per hogshead for the entire boiling of the juice into Sugar, or one cord per hogshead for both grinding the Cane and Boiling the Juice into Sugar.

The management of the Bagasse Kettle Train is precisely the same as that required for the old kettles, employing an equal number of hands to clean the juice. The Furnace needs the attendance of one hand only, as the Bagasse is never touched after it enters the Furnace.

For further particulars, inquire of

ANDERSON D. DIETER, COMMISSION MERCHANT, AND AGENT FOR JEFFERY'S DOUBLE-ACTING SUCTION AND FORCE PUMP WITH INDIA RUBBER BALL VALVES.

NOTICE.

Jeffery's Double-Acting Suction and Force Pump, with India Rubber Ball Valves,

Suitable for Sugar and Cotton Plantations, Draining Excavations, Dry Docks, Ships, Ocean and River Steamers, Dwellings, etc., etc.

The subscriber having been appointed Agent for the State for the sale of Jeffery's Improved Double-Acting Pump, with India Rubber Ball Valves, is now prepared to receive orders and furnish same. The valuable invention was patented June 8th, 1850, and was awarded the FIRST PREMIUM at the New York State Fair, held at Albany, in 1856. In thus introducing this new Pump to this community, the undersigned feels a confidence that his efforts to bring it into general use will be seconded by all who seek its operation and construction.

The perfect adaptation of solid Balls of India Rubber for Pump Valves, will at once be apparent to every thinking mind. Their imperviousness to water and their yielding surface secure a certainty of operation and a perfection of action which cannot be attained by the use of any other Valves. The simplicity of arrangement, the facility with which the parts can be removed and replaced, the compact form, renders this the most perfect and desirable Pump in use. Heavy Plunger, thick as Gasbrackets. Captain should possess one or more of these valuable Pumps, as apart from their general purposes, they can in a moment be transformed into an efficient Fire Engine.

Size No. 2 possesses a capacity of forcing 40 gallons per minute. Price $25.

Size No. 3 possesses a capacity of forcing 40 gallons per minute. Price $35.

Size No. 4 possesses a capacity of forcing 75 gallons per minute. Price $50.

And larger sizes, suitable for Dry Docks or heavy Drainage, up to a capacity of 500 gallons per minute, are now in course of construction and may soon be expected. Nos. 2 and 3 are admirably adapted to Sugar Houses for forcing the cane-juice, molasses and the ordinary uses to which a Pump is generally applied, while for redeeming Swampy Lands, the No. 4's are indispensable.

The subscriber feels convinced that when these Pumps are seen they will speak for themselves, and that sooner or later they will gain general use.

Samples of Size No. 2 can be seen in operation, at C. O. Hier & Co.'s, No. 25 Camp street; Price & Colomb's, No. 107 Fayette street, or at the office of the undersigned, where persons are invited to call and examine same before purchasing.

ANDERSON D. DIETER, Agent,
32 Gravier street.

DOUBLING THE INCOME OF COTTON PLANTERS.

PATENTED IMPROVEMENT IN THE MANUFACTURE OF YARNS.

Employing to 8pts the Crop up but about one-fourth the number required to raise it (the number consisting of children of six years of age and above, and women only in hoeing or picking cotton.

Is now prepared to furnish Planters with the NEW COMBINATION OF MACHINERY, independent of the Gin, viz: Lapping Machine, and the Sequent Machines of the Spinning Series, and to have all arranged in the Spinning Room on the plantation, complete, with great dispatch. Also, competent Engineers.

ONE-HALF OF THE NEW PORTION OF THE INCOME the very first year, will MORE THAN PAY for the whole Machinery, inclusive of the Steam Engine and the Spinner's Wages.

MY IMPROVEMENT, in its results to the Planter, is equivalent to his having purchased one a plantation, negros, etc., more productive than those he now works; and while his pecuniary interest will prove his direction, it will be exempt from the cares and anxieties inherent to Planting, Gathering and Baling up a crop.

MY TERMS

MACHINERY is CASH ALTOGETHER, but for good acceptance I can grant reasonable facilities, and for the RIGHT OF THE PATENT, one-fourth to be paid to me each of the first five years of the second Patent Term (now pending) at which time, with a contract insuring payment should the plantation change proprietors.

Preparations from Planters may now be made, and to know costs of Machinery in their particular case, they must not omit to state what has been the number of pounds of their crops—or the many pounds of Yarn a day they must fabricate.
