On the Paris Bourse

PARIS, June 18.—Prices on the Bourse were firm to-day. Three per cent rentes were quoted at 61 francs 80 centimes for cash; exchange on London, 30 francs 2 centimes; 5 per cent loan, 88 francs 42 centimes.

The dollar was quoted at from 6 francs 48 centimes to 6 francs 53 centimes.

Meetings

Manufacturing prospects for spring and uniform terms and discounts will be discussed at a meeting of Group B, Athletic and Nightwear Manufacturers, International Association of Garment Manufacturers, at 320 Broadway, at noon to-day.

The board of directors of the International Association will hold a meeting at the organization's headquarters to-morrow.

Thayer Succeeds Vail as President Of American T. & T.

Changes in Organization Are Made Preparatory to Return of Wires to Control of Private Ownership

Theodore N. Vail announced yesterday changes in the official roster of the American Telephone and Telegraph Company which will involve his taking the position of chairman of the board of directors and the election of H. B. Thayer to succeed him as president. Mr. Vail said that the changes were "in titles rather than in functions," and were "preparatory to the end of the period of government control."

N. C. Kingsbury, who has been in charge of operations and the department of public relations, has been made first vice-president; N. T. Guernsey, the general counsel, has been made made vice-president in charge of the legal department; John J. Garty, head of the research, experiment and development department, has been made a vice-president in charge of that work; W. S. Clifford, who has been controller of the company, has been made vice-president in charge of accounts and finance; Bancroft Gherardi, who has been acting chief engineer, becomes chief engineer. In explanation of the above changes Mr. Vail's statement said:

"Preparatory to the end of the period of Federal control, and in view of the great development which has taken place in the art of transmission of intelligence by electricity, particularly of the great development of multiplex telephony, machine operation of both telephone and telegraph, and of wireless telephony, there are many large problems confronting the American Telephone and Telegraph Company, all in the line of greater, better development and wider usefulness.

"In view of all this, and to facilitate all the possibilities of the future, it is necessary that the organization be adjusted to meet these new problems and be put on a permanent basis.

"I will, as the chairman of the board, be in active direction of the policy and problems of the company, and by this change will be enabled to give more of my uninterrupted time and attention to the larger problems of the business.

"Vice-President Bethell, who has been in charge of the Federal operating board, was invited to rejoin the organization, but as he wishes to take a long rest has declined, to the regret of the board. H. B. Thayer, who has been for nearly forty years prominently identified with the operating of the telephone system, both from the manufacturing standpoint and from the practical operation, has been made president."

Bid and Asked Quotations

The following table gives the closing bid and asked quotations for stocks listed on the New York Stock Exchange but not traded in yesterday:

- Commodities -

Cotton

Cotton prices moved irregularly yesterday, closing with net gains of 7 to 19 points. The market declined sharply on publication of the weekly weather report, but recovered under the influence of private reports indicating that the crop was not doing as well as the government bulletin showed. The upward movement was aided by strength in the stock market.

According to the bulletin, temperatures for the week averaged slightly above normal in the central and eastern parts of the cotton belt, except in the extreme eastern section, but cool weather continued in Louisiana, Oklahoma and Texas. Rainfall was light to moderate in most sections east of the Mississippi River and also in considerable areas to the westward, but heavy rains occurred in parts of Oklahoma and Texas. These conditions were favorable for the advancement of cotton in most sections from Alabama and Tennessee eastward, but from the Mississippi Valley westward continued cool weather and wet soil were detrimental to satisfactory growth in many districts. The week was favorable to the crop in Arkansas except in the southeastern part, where it continued too wet.

The crop deteriorated in the lower Mississippi Valley and made little progress in Oklahoma. Some improvement occurred in Texas, except in the eastern and southeastern parts, where heavy rains fell. Many fields are grassy in that state and chopping out has been delayed. Conditions were favorable for cultivation in most central and eastern parts of the belt, but there was considerable complaint of grassy fields. The condition of the crop in general is satisfactory in most localities from Alabama eastward, but generally poor in most sections westward.

Following the appearance of the government report came private dispatches from Arkansas and Louisiana telling of extremely grassy fields and poor stands. Advices from Texas were conflicting.

New Orleans reported a good spot demand, sales being 2,460 bales. Savannah sold 137 bales, Norfolk 782 and Augusta 126, in the local spot market middling uplands was quoted at 32.60. Exports were 24,861 bales.

Cereals

Wheat—Warmer weather and generally moderate rainfall last week in the central and eastern parts of the spring wheat belt were favorable to the advancement of the crop. Conditions were generally favorable for the development of winter wheat. Receipts at New York yesterday were 103,600 bushels.

Corn—Corn prices went to new high records yesterday and closed with net gains of 3 to 4 cents. July rose to $1.80¼, September to $1.73½ and December to $1.50⅝. The chief factor in the advance was the "Price Current" report, giving a reduced acreage of about 7,500,000. If this figure is correct, the corn acreage is the smallest in ten years. It may be said, however, that this estimate is not accepted in many quarters. Other factors making for higher prices were light receipts, drouth conditions in Europe and the poor condition of corn arriving from Argentina.

Sugar and Coffee

	Current prices.	A year ago.
Sugar, granulated per lb....	9	7.45
Sugar, centrifugal, per lb....	7.28	—
Coffee, Rio No. 7, per lb..	21¼	8⅜
Coffee, Santos No. 4, per lb..	25	—

Sugar.—The Equalization Board reports purchases of 30,000 bags of Cubas and 5,493 tons of Porto Ricos for shipment this month. Receipts of raws at Cuban ports last week were 69,846 tons, against 91,293 the previous week. Exports were 75,013 tons, against 83,347 the week before.

Coffee Futures.—Coffee was active and strong, and prices moved up for net gains of 40 to 46 points. Early cables reported the Santos spot market 400 reis higher and soon afterward a further advance of 150 to 275 reis was announced. It is believed by many traders here that the violent advances in Brazil are due to wild speculation.

Prices for future contracts follow:
