Receipt given to purchasers to insure against moths. FLEMING, Manager. 435

OLD TYPE METAL WANTED—APPLY AT this office. 440

GENERAL BUSINESS.

AMERICAN MOWER.—THE ONLY SELFOILING MACHINE.

With the great perfection in construction to which Moving Machines have been brought, I call the attention of Farmers to a Machine embracing STILL GREATER IMPROVEMENTS than any before offered to the public.

Particular attention has been paid to the wants of the Farmer in the construction of the AMERICAN MOWER, to make it

THE VERY BEST MACHINE IN USE.

There are numbers of Machines that do their work comparatively faultless, and yet there are inconveniences that are greatly annoying to the operator, among them the frequent necessity of oiling the bearings, and more particularly the crank-pin, or pitman head, which, if neglected, (as it is very apt to be), results in cutting the journals or boxes, and in permanent injury to any machine. The AMERICAN MOWER has the following features of excellence:

The BEARINGS OF THE AMERICAN MOWER, as well as the CRANK PIN, are all SELF-LUBRICATING, and WASTE NO OIL.

The outer end of the Finger Bar will drop lower and lift higher than that of any other Mower.

You can elevate the Finger Bar from a declining position without raising the inner shoe.

The Finger Bar can be raised higher, to pass over obstacles, by means of the hand lever, than that of any other jointed bar Machine.

The Frame between the Driving Wheels will pass over higher obstructions than the frame of any other Mower.

The operator has a greater control over the Finger and Knife Bars than he has of any other Machine.

The Finger Bar will conform to a more uneven surface than that of ANY OTHER Machine, which is one of the MOST IMPORTANT features in a perfect Mower.

Either wheel operates the Cutter Bar, independently of the other, and in turning, either way, the knives are kept in rapid motion.

The Draft is from the front of the frame which gives it great advantages over those that draw from the pole.

IT HAS AN EASY SPRING SEAT FOR THE DRIVER.

It backs out of gear, and can be thrown in and out gear when in motion.

It has a folding Bar, and can be folded without disconnecting the Pitman.

It is of LIGHT DRAFT, and has no PERCEPTIBLE SIDE DRAFT.

It is more simple and perfect in its construction, and has more strength, with lightness combined, than any other Mower.

It cannot upset.

I defy contradiction to the above, and invite the scrutiny of ALL who are in any way interested in the Farming interest to examine this Mower, feeling confident of their approval.

Shafts or pills supplied with Machines for one horse.

WILLIAM VAN ANDEN,
400 Main Street,
508 Poughkeepsie, N. Y.

AMERICAN AND FOREIGN PATENT AGENCY—MESSRS. MUNN & CO, Publishers of the "Scientific American," continue to act as Attorneys for securing Patents for new Inventions in this and all foreign countries.
