REFRIGERATORS—IMPROVED GALVANIZED IRON REFRIGERATORS on practical and scientific principles, the best and most economical in use, for cooling and preserving meats, milk, butter, fruit, wines, etc. They are so arranged that the ice water runs slowly through each shelf, and keeps the contents cool and fresh, and yet keeps them at the coldest point, causing the refrigerating influence to be the same throughout the whole apparatus. This is effected by the deposition from the ice, which is lighter than all other refrigerators. They are open on the front and top, make a neat piece of furniture, can be placed in any room, and have a waste pipe, by which perfectly cold water can be had at all times for the trifling expense of a few cents per day. Other Refrigerators are no superior. They have been in successful use since the invention of ten years to the gratification of those who have them in use, as their certificates will show, and are now the most approved before the public. The improvements recently added by which the perfect ventilation is insured, and the great saving of ice has been observed, make Fridge the cheapest and desirable article ever offered for public patronage.

GALVANIZED IRON

Has been substituted for the common tin of zinc, thereby enabling us to offer them entirely free from oxydation and corrosion, and consequently void of that disagreeable odor which has heretofore been imparted to the contents of refrigerators. In addition to their being so vastly superior to others, owing to their convenient arrangements and improved principle, they are more serviceable, as the ice is kept colder than Galvanized Iron is more durable than any other metal, as it is not affected by acid, salt water, etc.

Jobbers and Retailers, whose orders are solicited, will be supplied on very favorable terms.

For sale at retail by
HENDERSON & GAINES, 99 Canal street.

The above ingenious invention has been in use but two seasons, and has attained a popularity rarely equaled in the history of new inventions. It needs only a trial to satisfy any one of its utility. Where it is kept running from the commencement of the season, flies will not become sufficiently numerous to be troublesome. Kept running at night, they will catch mosquitoes, which will be attracted to the trap in preference to alighting on persons in the room.

Whereas, the present urgent indebtedness of this Company, and the terms of the contract with Messrs. J. F. Grant & Co., for the completion of seventy miles of road, render it absolutely necessary that the Company should realize at once the instalments of its stock remaining due and unpaid on the 1st January, 1858, and without the retardation, where payments have not been made, the ordinary and stringent measures entered into for the adjustment of all such indebtedness to the subscribers or holders of the said stock will be enforced upon which there remains unpaid instalments, therefore, be it

Resolved, By the Directors of the Southern Pacific Railroad Company, that the subscribers to the stock, on the 1st day of February, 1858, between the hours of 10 A. M. and 4 P. M., at the Company's office, in the city of New Orleans, to sell at public auction, to the highest bidder, for account and at the risk of the subscribers to the capital stock of the Company upon which instalments are past due and unpaid—and shares to be transferred on the books of the Company to the purchasers, unless close thereof, as provided by the 6th section of the charter of this Company.

Resolved, That if the proceeds of sale, in any case, shall not be sufficient to pay the amount due by the subscribers whose stock is sold, with interest and charges thereon, the President of the Company is authorized, in his discretion, to cause to be instituted the proper legal proceedings to collect the deficit from such delinquent subscribers, or to compromise, delay or release of the same, to any person or party, at discretion, and make such transfer thereof as he may deem proper in the premises.

Resolved, That the President cause to be posted up notice that a sale has been made of all Stock with 3/4 per cent and less sums paid thereon; and also have a Circular Letter addressed to each Subscriber whose name appears on the books of the Company, notifying them of such sale, so that no consequential loss shall enter, and thereby all future sales and transfers may be stopped by the mere delivery of the Certificates of Stock, which may be outstanding.

OFFICE SOUTHERN PACIFIC RAILROAD COMPANY, New Orleans, February 16, 1858.

Sir: In accordance with the above resolutions, passed by the Board of Directors of the Company, I beg leave to inform you that all Stock in your name, upon which instalments were due and unpaid, was sold at public auction on the 17th inst.

The Stock has been purchased by some gentlemen who have future interest in the Road, and they have instructed me, should any such holder wish to pay the amount due on his Stock within one month from this date, to permit him so to do, and to waive all claim to the Certificate of Stock.

Official information has been received, that the twenty miles of the Road, required by our Charter to be completed by the 15th of July next, was finished and the cars running thereon on the 14th inst.

Very respectfully, your obedient servant,
GEO. S. YERKER, President.

ABITA WATER FOR SALE—
The water of the "Christy Abita Springs," so celebrated for the numerous cures it has effected in many of the worst cases, is now in some diseases, such as Scurvula, Chronic Diarrhea, diseases of the Liver, of the Skin, of the Kidneys, Bronchitis, Laryngitis, Nervous affections, etc., etc., is recommended by all the above cures, etc., may be purchased fresh in wood or glass vessels, at the following rates, at places: A. C. Wilber & Co., 99 Gravier street; E. Dorbancy's, 81 Royal street; D. Morton, 3 Poydras street, and of W. B. Abrams, corner of Camp and Common streets.

Dr. Riddell's as the following language in his report or analysis of the water:

"Among the recorded analysis of several hundred mineral springs in various quarters of the globe, I have seen none similar to the Abita Springs."

The Abita Spring is located on the head waters of the Abita river, about three miles east of Covington, parish of St. Tammany, in this State. It is very remarkable for the volume and quantity of water which it discharges, and the great force and rapidity of current as it makes its exit from the earth, which proves clearly that its fountain head is in an elevated region, and at a great distance from the place where it issues, and the quantity of water discharged is about 120 gallons a minute, and which never increases or decreases. This remarkable spring is in fact a natural Artesian well, and is protected by a large brick house.

To prevent the recurrence of much disappointment to persons wishing to use it to water in place and from state, the proprietor feels it to be a duty he owes to the public to state that it is in no manner connected with the spring recently excavated on an adjoining property, the water of which has been sold as the "Bubbling Springs" on the Bogley Spring.
