ROMAN EYE BALSAM—FOR INFLAMED EYELIDS.

The delicate structure of the eyelid renders it peculiarly sensitive and liable to disease. Scarcely a person may exist, or be affected, but the mucous membrane rapidly inflames, and the eyelid evinces the strongest predisposition to attract to itself humors from all parts of the body. Hundreds of persons of scrofulous habit are disfigured by tumors or redness of the eyelids, commonly called sore eyes, and tortured with apprehensions of impaired vision, who by using this Balsam, may obtain almost immediate relief.

READ THE FOLLOWING EVIDENCE.

New York, February 16, 1853.

Messrs Sands—Gentlemen: I was afflicted with a dry scaly eruption on my eyelids for fifteen years, commencing with small styes, which gradually grew together, and troubled me very much. Various remedies were resorted to, and several eminent physicians prescribed for me. I however resolved to permanent benefit until I used the Roman Eye Balsam. The first application relieved the unpleasant feeling and symptoms, and in one week I was entirely cured. It had the same good effect in curing a friend, to whom I recommended it, for sore eyes.

Yours, truly,

HIRAM NICHOLS,

REFRIGERATORS—IMPROVED GALVANIZED IRON REFRIGERATORS on practical and scientific principles. The best and most convenient Refrigerator for Hotels, Steamboats, Private families, Butter, fruit, wine, etc. They are so arranged that the ice water runs slowly through each shelf, and being constantly renewed, keeps the shelves at a cool and uniform temperature, causing the refrigerating influence to be the same throughout the whole apparatus. This is offered to the public as the best article ever yet tried, for all other refrigerators. They are open on the front and top, make a neat piece of furniture, can be placed in any room, and have a water jar, by which any quantity of water can be drawn as bad without additional ice. These Refrigerators are no experiment. They have been in successful use after repeated offers to try them to the public, for the last three years, and the owners of their certificates will show and are now the most approved before the public. They have generously received by which time more perfect knowledge of the merits of the article, it has been obtained, more friends are produced and durability effected, certainly bless them for in advance of anything ever offered for public trial.

GALVANIZED IRON

Has been substituted for the tin lining of the class, thereby enabling us to offer them entirely free from all distinct and corrosion, and consequently void of that disagreeable odor which has heretofore been the most objectionable in Refrigerators. In addition to their being so vastly superior in other, being to their convenient arrangements and unequaled principle, they are more durable, and are now offered at a less price than any other Refrigerator. Hotels, Steamboats, etc., that contract from a more durable than any other metal, as it is not affected by acid, salt water, etc.

ABITA WATER FOR SALE—

The water of the "Chalybeate Springs," so celebrated for the numerous cures it has effected of many of the most troublesome diseases, such as Scrofula, Chronic Diarrhea, diseases of the Liver, of the Skin, of the Urinary Organs, Rheumatism, Nervous affections, Paralysis, Diseases peculiar to Females, etc., may be purchased fresh in wood or glass vessels, at the following places, viz: Mr. Kennett's, 66 Carondelet street; E. Declouette's, 21 St. Louis street; M. Morton's, 4 Perdido street, and at W. B. Abrams', corner of Camp and Common streets.

Dr. Riddell uses the following language in his report on analysis of this water:

"Among the recorded analysis of several hundred mineral springs in various quarters of the globe, I have seen none so valuable as the Abita Springs."

This Spring is located on the head waters of the Abita river, about three miles east of Covington, parish of St. Tammany, in this State. It is very remarkable for the volume and quantity of water it discharges, as well as for the force of its ascending current as it makes its exit from the earth, which proves clearly that the Reservoir from which it is supplied must be at a great distance from the spring, as the quantity of water discharged is about 12 gallons a minute, and which never increases or decreases. This remarkable spring is in fact a "natural Arcesian well," as pronounced by Prof. Riddell.

To prevent the recurrence of much disappointment to persons wishing to use the water, it is now in fresh stock, in quantities for fresh it to be a duty he owes to the public to state that it is in no manner connected with the spring recently excavated on an adjoining property, the water of which has been sold as the "St. Abita Water" from the Bagley Spring.
