GILMAN'S PNEUMATIC STEAM GRANULATOR

is now in use on seven plantations, embracing the largest and smallest grinders, as some of the Bagasse Mills of three crops, with a combination of the following advantages over any other known application of steam to a sugar Granulator or entire steam train:

1. It requires but a pressure of 20 pounds of steam to "strike a Bagasse."
2. It requires no additional water for the boilers.
3. Its pipes never "scale" or require cleaning.
4. Its feeding entrance is equally distributed throughout the body of juice, so that an even and hard grained sugar is made.
5. The steam being all condensed and returned to the boilers direct, no additional heats are required and the small boilers are large enough and Gilman's Bagasse Furnace is used—one pair of grinder boilers 30 inches in diameter and 34 feet long, with Gilman's Bagasse Furnace, being sufficient to grind the cane and run the Pneumatic Battery, making 12 hhds. sugar per day.

The Pneumatic Battery or Granulator is not in operation at much less expense to the planter than any other steam battery or application of steam to making sugar, in part or entirely by steam.

For further information, a pamphlet with full specifications and drawings will be furnished on application, and a subscriber, who is now prepared to make contracts for the Battery, Evaporators or Clarifiers, to be used with direct or exhaust steam.

DOUBLING THE INCOME OF COTTON PLANTERS.

PATENTED IMPROVEMENT IN THE MANUFACTURE OF BALES.

Employing to Gin the Crop in but about one-fourth the number required to raise it, this number consisting of children of six years of age and above, and women unfit for plowing or picking cotton.

I am now prepared to furnish Planters with this NEW COMBINATION OF MACHINERY, inclusive of the STEAM ENGINE, of necessary power to wield a Bale of Cotton of dimensions in one Machine, and the Sequent Machines of the Spinning Series, and to have all arranged in the Spinning Room on the plan, complete, with great speed dispatch. Also, compressing Bales.

ONE-HALF OF THE NEW POETRY OF THE INCOME the very first year. WITH MORE THAN HALF for the whole Machinery, inclusive of the Steam Engine and the Spinner's Wages.

NO IMPROVEMENT, in its results to the Planter, is equivalent to his having purchased of me a plantation, negros, etc., more productive than those he now works; and while his Spinning income is thus secured, he will have the income from the cares and anxieties inherent to Planting, Gathering and Baling up a crop.

MY TERMS.

MACHINERY is a CASH ARTICLE, but for good accept, for a ten years' manufacture, and for the RIGHT OF THE PATENT, one-fourth to be paid to me each of the first five years of the excess the Yarns bring over Ginned Cotton. With a contract insuring payment, should the plantation change proprietors.

Propositions from Planters may now be made, and to know if I can meet them, a description of their crop, they must only state what has been the number of pounds of their crop—how many pounds of Yarn a day they must spin.
