EIGHT ARE KILLED IN WRECK

FOUR OTHERS PROBABLY FATALLY INJURED IN COLLISION OF TRAINS.

Macon, Ga., Feb. 14.—Eight persons were reported dead, four probably fatally injured and 20 more or less seriously hurt as a result of a head-on collision between southbound passenger train No. 5 and northbound train No. 2 on the Georgia Southern & Florida railroad, 19 miles south of here, early this evening. Among the dead are A. B. Johnson of Macon and Conductor Dupree of train No. 5 of Katerin, Ga.

It is said the crew of No. 2 mistook orders and ran past Bonair, where the train was ordered to meet No. 5. The two locomotives, baggage and express cars were demolished. The coaches were piled in one great heap. Much trouble was experienced in extricating the bodies of dead and injured from the wreck. Two relief trains were dispatched from this place. It is known one mail clerk was killed and two other members of the crew. It is stated that at least four white passengers were killed. The only means of communication with the wreck is by a telephone two miles from the scene.

STRONG OPPOSITION TO ALASKA MEASURE

Washington, Feb. 14.—Strenuous opposition from unexpected quarters was the reception met by the Alaskan legislative council bill during its brief consideration in the senate today. Assaults upon various features of the measure by Senators Clark of Wyoming, Crawford, Borah, Heyburn, Fraser and Clay were answered by Senator Beveridge, who has been in charge until his voice gave way, under a severe cold. Consideration of the bill was then postponed.

Senator Clark took exception to the power given to the proposed council to repeal laws enacted by congress; Senator Clay to the control of public lands vested in the council, and Senator Heyburn to the appointment of an army officer as a member of the council. Replying, Mr. Beveridge said that legislators would understand conditions in the territory better than congress possibly could, and the president had reached the same conclusion.

At the next meeting of the Montreal Trades and Labor council the question of forming a civic federation for the purpose of settling all labor troubles by conciliation and arbitration will be considered.

30 Day Trial FOR EVERY BODY

WHY suffer with RHEUMATISM, nervous headaches and other nervous ailments, bad circulation and cold feet, when a $1.00 treatment will cure you. All druggists sign A LEGAL BINDING CONTRACT with each sale agreeing to refund the money at the end of a thirty day trial if they are not satisfactory or fail to cure.

ELECTROPODES

Are metal insoles, zinc and copper, the same as a galvanic battery. The zinc is worn in one shoe, the copper in the other. The nerves themselves are the connecting wires between the positive and negative, and every nerve of the body is fed a mild and soothing current of electricity the entire day, which positively cures.

Are mailable. If your druggist cannot furnish them, send us $1.00 and we will see that you are supplied. Money positively refunded if they fail to cure. In ordering, state whether for lady or gentleman.

HORSES AND MULES IN MONTANA

DEPARTMENT OF AGRICULTURE GIVES STATISTICS OF TREASURE STATE.

Washington, Feb. 14—(Special.)—According to a report of the department of agriculture, there are 319,000 horses on the farms of Montana. Their average price per head on January 1 is given at $80, as compared with $65 for January 1, 1900. Their total value is given as $25,520,000.

It is also stated that there were 5,000 mules on the Montana farms at the beginning of 1910, whose average price per head was placed at $102, as compared with $83 for January 1909. The total value of the mules is stated to be $510,000.

Montana also has 80,000 milk cows, valued at $46.50 per head, or a total of $3,720,000. The value per head in 1909 was $44.

Lots of Sheep.

There are over 5,000,000 sheep in Montana, according to the report, the number being, to be exact, 5,747,000 the average price per head is $4.20, as compared with $3.30 a year ago. The total value of the sheep in Montana is $24,137,000, which ranks second, Wyoming leading with $32,100,000 worth of sheep.

The number of swine in Montana is reported on January 1 to have been 75,000, the average price per head being $10.10, as compared with $10 a year ago. The total value of the swine is given as $758,000.

The report also states that there were 842,000 head of other cattle in Montana in January, whose average price per head was $27.40, as compared with $22. The total value of this cattle is placed at $23,071,000.

World's Supply.

Interesting statistics on the world supply of livestock have been compiled by the department of agriculture.

Sheep seem to be the most numerous of the large animals of the world, with a total of about 580,000,000 head. Australia ranks first, with about 88,000,000; Argentina second, with 67,000,000; United States third, with about 57,000,000; European Russia and Asiatic Turkey each have approximately 45,000,000; Great Britain, with 27,000,000 in 1908, has more in proportion to its area than any other important nation.

The number of cattle enumerated or estimated, about 430,000,000, although smaller than that of sheep, is much more important, owing to their larger size. In total number of cattle, British India ranks first, with about 91,000,000 (including buffaloes and buffalo calves); the United States ranks second with about 70,000,000; Russia third, with about 36,000,000; Argentina and Brazil each have about 30,000,000, Germany about 20,000,000, Austria-Hungry 12,000,000 (in 1900), France 14,000,000, and the United Kingdom 12,000,000. The proportion of the total number of cattle which is beef cattle, work cattle, or milch cows has not been estimated.

The United States is pre-eminent as a swine-producing nation, being credited with approximately 50,000,000 head out of a world supply of less than 150,000,000; Germany ranks second, with about 22,000,000; European Russia has about 11,000,000; France, 7,000,000; Austria had 5,000,000 in 1900, and Hungary 7,000,000 in 1895. No other country is credited with as many as 5,000,000.

Horses aggregate about 95,000,000; European Russia and the United States have almost an equal number, between 20,000,000 and 25,000,000 head; Argentina has about 8,000,000; Asiatic Russia is credited with about 7,000,000, Germany 4,000,000, France 3,000,000, the United Kingdom 2,000,000; Austria and Hungary, each had about 2,000,000 in 1900 and 1895, respectively.

Of the 7,500,000 mules that are estimated in the world more than half are in the United States; no other country is credited with 1,000,000; Spain comes nearest, with about 810,000 in 1907.

The number of asses in the world is estimated to be between 8,000,000 and 9,000,000; Asiatic Turkey is credited with about 2,500,000; 1,300,000 were credited to British India in 1907; 850,000 to Italy in 1908, and 775,000 to Spain in 1907.

Nearly 100,000,000 goats are estimated in the various countries of the world; by far the largest number are in British India, nearly 30,000,000; Asiatic Turkey is credited with 9,000,000, the Cape of Good Hope with nearly 9,000,000, Algeria about 4,000,000, Mexico 4,000,000, and Argentina 3,000,000 (in 1907).

About 15,000,000 buffaloes were reported in British India in 1907, over 2,500,000 in Dutch East Indies in 1905; minor countries bring the total number estimated to over 21,000,000.

The approximate number of camels in important countries, so far as estimates can be made, is: Asiatic Russia 700,000; British India 450,000; European Russia 225,000; Algeria 200,000; Tunis 150,000; Soudan (Anglo-Egyptain, number assessed for tribute and tax in 1905) 132,000; Egypt 40,000.

Of the 900,000 reindeer reported from various countries, 350,000 were in Russia, 230,000 were in Sweden, 140,000 in Finland (in 1906), and 110,000 in Norway (1900.)

A petition from the Milk River irrigation association of Havre, asking that congress appropriate funds at this session to complete irrigation work on the Milk river valley projects, has been received by the senate and referred to the irrigation committee.

A civil service examination will be held at Missoula on March 16 to secure photo engravers for service in the Philippine islands, at from $1,600 to $1,800 a year.

An order has been issued by the postoffice department discontinuing on February 17 the exchange of brass-lock pouches between Darby and Hamilton.

FLOTILLA ARRIVES OFF LOS ANGELES

Los Angeles, Feb. 14.—The flotilla arrived off Los Angeles harbor at 9 o'clock, after a slow run from San Diego, and anchored outside the breakwater. The flotilla is composed of the destroyers Whipple (flagship), the Truxton, Hopkins, Stewart, Lawrence, Gainesborough, Perry, Preble and Hull. The commander of the flotilla said the accident today was doubtless due to a defect in the boiler tube, which burst. Three similar accidents of minor importance have happened aboard the Hopkins during the past 10 months. The board to investigate today's accident will be named tomorrow and the investigation begun at once.

BIG GOLD DISCOVERY IS MADE IN ALASKA

Washington, Feb. 14.—Alaska, which Secretary Ballinger has frequently said is America's prize package, may be a greater prize than man has ever dreamed. Recent investigations in the Innoko district, the central Kuskokwim valley and the new Iditarod district, now partially finished by the United States geological survey, disclose new placer gold districts which promise very heavy returns. The little territory bought from Russia for $7,000,000 in 1867 has to the present time paid $160,000,000 in gold alone since 1880, when placer mining there began, and what the resources of copper, coal and other materials will be, is beyond the imagination of man.

The discovery by agents of the survey of placers on the small streams in areas which are drained into the lower Yukon of the lower Kuskokwim proves that the formations of the upper Yukon belts extend much further southwest than had generally been supposed, and they bear gold at many scattered localities throughout their extent. The Innoko district has attracted some attention and others are being exploited with prospects of large results. Sufficient prospecting has been done there to indicate the presence of a pay streak 50 to 70 feet wide with gold uniformly distributed.

In the Famous Grass Valley

160-Acres, 10 miles west of Missoula for only $75.00 per acre; 100 acres river bottom, 60 acres wood and pasture land, all well fenced; house has 5 large rooms; large barn, wood house and other necessary out-buildings; also all farming tools, 7 head of horses, chickens, etc., goes with the place. Terms half cash.

PEERAGE ROMANCE COMES TO AN END

London, Feb. 14. — The Sackville peerage romance came to a prosaic end today with the dismissal of the petition of Ernest Henry Sackville-West, who sought to establish a legal claim to the title and estates of his father, the late Lord Lionel Sackville-West, former British minister at Washington.

Sir John Bigham, president of the probate court, condemned the petitioner to pay the costs, which must have been very heavy. The petition was opposed by the present Lord Sackville, a nephew of the late lord, on the ground that the uncle had never married Josefa Duran, the mother of the petitioner.

Satisfactory settlements of points in dispute have been effected by the Metropolitan (London, England) Railway company with the whole of its employes in the traffic and permanent way departments.

SLAYER OF PRINCE WILL BE EXECUTED

Port Arthur, Manchuria, Feb. 14.—In Chan Angan, the Korean who assassinated Prince Ito, the former Japanese resident general of Korea, at Harbin, October 26, 1909, was convicted today and sentenced to death.

Angan was formerly an editor and was alleged to be a member of a Korean secret organization, the purpose of which was the assassination of Prince Ito.

Bad Weather Has No Effect on the Donohue Crowds They Still Keep Coming TO THE
