VEGETABLE PULMONARY BALSAM.

THE GREAT REMEDY FOR COUGHS, COLDS, and CONSUMPTION, after a trial of twenty-five years, stands by almost general consent, at the head of Cough Medicines. It is a vegetable compound, and is the only article that has fully maintained its great and constantly growing reputation, for so long a period of time. Many eminent physicians do not hesitate to ask its use in their families, and with entire confidence to recommend it to their patients, as a superior preparation, which they have found to be perfectly safe, convenient, and effective in diseases of the Throat, Lungs, and Breast.

One who has used it thus speaks of it:

"CLINTON PARK N. Y., Dec. 1, 1851.

MESSRS. Reed & Cutler,—Nearly seven years ago I had a violent attack of inflammation of the lungs, which was treated by my physicians with the most powerful remedies, but with little effect, for the most part of a violent pulse about my chest. My cough was almost incessant, accompanied with expectoration of the most painful and oppressive kind, a part of the time mixed with blood, of a dark iron rust color. Several large ulcers broke on my lungs, which came near suffocating me. I had contracted night sweats, and was reduced almost to a skeleton. My case was considered hopeless, not only by my physicians, but by all who saw me. Accidentally hearing of a neighbor of this place to whom the Vegetable Pulmonary Balsam had produced such a similar case, I was induced to try it. I relished it, had used one bottle I began to improve, and by the use of four bottles I was restored to usual health. I had used a variety of other medicines which gave me no relief. A few weeks ago I was similarly attacked, and I am now using the Balsam with the same good result. This statement is unsolicited and it costs you nothing, but if it will be of any service to any one, my object is even satisfied. Signed,

Yours, &c., WM. P. NOXON, P. M."

NOV. 1, 1851.—New certificates, to almost any extent, might be added if deemed necessary; but the proprietors feel that the article has become so universally well known, and its virtues so generally acknowledged by physicians and others, as to make it unnecessary to offer, at this time, further proof of the merits of this highly popular article.

☞ BEWARE OF COUNTERFEITS AND IMITATIONS, such as Carter's Compound Vegetable Balsam, American Pulmonary Balsam, and others, in part, bearing the name. Enquire for the article by its full name,

The "Vegetable Pulmonary Balsam,"

and see that it has the written signature of WM. JOHN CUTLER upon a yellow label, on the blue wrapper. Each bottle and seal is stamped "Vegetable Pulmonary Balsam."

Prepared by REED, CUTLER & CO., Importers and Wholesale Dealers in Medicines, Paints, Chemicals and Dye Stuffs, 33 India Street, Boston, and sold by Druggists, Apothecaries, and Country Merchants generally. For particulars and recommendations, see pamphlet, accompanying each bottle.—Price 50 cents. For sale in Middlebury, by S. MOODY. 39 6m

WARRANTED PURE COD LIVER OIL!

JOSEPH BURNET,

APOTHECARY,
No 33 Tremont Row,·····Boston,

OFFERS to the public this valuable remedy for CONSUMPTION, SCROFULOUS, and RHEUMATIC AFFECTIONS, in the state of the greatest possible purity,—it being prepared by him-elf, from FRESH LIVERS OF NONE BUT HEALTHY COD.

Of the value of this Oil, in the affections above named, it is almost superfluous to speak at this time, when its merits are acknowledged by the most eminent of the Medical Faculty, and its adoption in their practice has become almost universal. Dr. J. B. C. WILLIAMS, of London, after prescribing it in

400 Cases of Consumption,

(in 214 of which he preserved full notes,) states, in the London Journal of Medicine, "As the result of experience, confirmed by a rational consideration of its mode of action, the PURE FRESH OIL, from the Liver of the Cod, is more beneficial in the treatment of PULMONARY CONSUMPTION, than any other agent,—medical, dietetic, or regimental, that has yet been employed."

The public should be cautioned that in consequence of the high reputation deservedly enjoyed by the

GENUINE COD LIVER OIL,

many unprincipled persons are imposing upon the public a worthless article, prepared from common Whale or Seal Oil, or that of other fish, blended to resemble in appearance the Oil from the Cod's Liver.

An impure Oil, or that prepared from stale or diseased livers, may be productive of the deleterious consequences, causing aggravation of disease, derangement of the digestive economy, &c. &c. Hence

THE UTMOST IMPORTANCE,

that the article should be not only COD LIVER OIL, but prepared from FRESH and HEALTHY LIVERS; and of this nature the subscriber warrants the article offered by him as especially worthy the attention of medical men, and others who suffer from the diseases above specified

For sale by all the principal dealers in New England.

☞ Orders by Mail or Express promptly answered.

Oct. 8, 1851.

ONLY $25 FOR A HOMESTEAD.

50 FARMS, worth over $ 10000 and 5,000 Lots, to be distributed among 800 Subscribers.

To supply the demand for the lots and farms, I have laid out another tract, adjoining the Long Island Railroad and the land already sold at Hermanville, to be of the same size, and disposed of and divided among the purchasers in the same manner as those recently sold there, with 50 farms instead of 22.

I have been induced to do this from the great number of persons wishing to purchase these Lots and Farms, as the improvements in that part of the Island are constantly increasing, and large numbers of persons have now become interested in those lands. This additional tract is in every respect equal to the other, and at the rate they are now being taken they will all be sold in a few weeks. About 600 shares are now subscribed.

Each subscriber is entitled to 8 Lots, 25 by 100 feet, lying together, or a FARM of from 4 to 29 acres. The shares are limited at $25—payable, $5 when subscribed for, $5 on or before the day of distribution, and the balance in monthly instalments of $3.

The lots are situated in the Village of LAKELAND, on the Long Island Railroad, County of Suffolk, and 48 miles from the city of New York, where handsome buildings are erected, and the Railroad Company contemplate making a large depot for the termination of the early and late trains between that place and Brooklyn. It is one of the healthiest places in the United States and within one mile of Ronkonkoma Lake, a beautiful sheet of water about three miles in circumference, of singular transparency, and of great depth with an abundance of fish. The village is but 4 miles distant from the great South Bay, which is 5 miles wide and 40 miles long, abundantly supplied with oysters, clams, and fish of various kinds.

These lands will produce as much per acre, with the same cultivation, as any land within 60 miles of the city of New York.

Several gentlemen of the first respectability who have lately visited Lakeland and examined the crops now growing there, declare that the wheat, rye, potatoes and garden vegetables are equal to any they have seen in any part of the country, proving conclusively that the soil is capable of producing, and that in the highest perfection, all that the agriculturist can wish or desire.

Wheat of the same quality, which grows here unanimously, was raised by Mr. Samuel Thompson of Setauket, last season (about 8 miles from this place,) who received for the product of a little more than two acres, $400.

Lakeland Station is located on the borders of the Long Island Railroad, where cars run several times a day to Brooklyn and New York. The surface of the land is smooth and level, and surrounding country is perfectly healthy, and within a few miles of this place, highly cultivated and valuable having been settled for more than a hundred and fifty years, and where similar lands sell at from $50 to $200 per acre.

The lands are as good as represented, and as good as any new land on the Island, and when cultivated, will produce in the highest degree

The land was once heavily timbered; some portions are now covered with a thrifty growth of young wood, oak and pine. Wood is plenty, and generally cheap in that part of Island. Firewood is cheap; that which is suitable to be cut into cord-wood, for the New York market, is of uniform price, and has for it a great many years, been always considered a fair article on the Island. There is a brick-kiln within two miles of Lakeland—cost of brick $2.50 to $5.00 per 1000.

There is material on the land for common fencing—good chestnut rails can be had within a few miles of these lands in abundance. All building materials can be had at the depots of Brooklyn and Greenport, and at many intermediate places, at the usual market prices. There are numerous streams of water rising in these new lands, and running into the great South Bay, which are remarkable for the purity and never fail—indeed, dry weather makes very little change in them, they are unfailing. Land wells are of various depths—probably over these new lands, in the middle region of the Island, the average depth will be about 25 feet at Lakeland, as the ground is higher they are deeper. Subscribers are not compelled to build.

There are now churches and schools within two or three miles of the village; and within four miles mills, factories, stores, and villages. All the privileges of an old settled country are to be had there; and the people of Suffolk County pride themselves on being a highly moral, orderly and religious people. All of my subscribers are persons of respectability.

In consequence of the great number of letters from all parts of the country, desiring information of these lands it has been found necessary to answer them in this form.

☞ Apply to CHARLES WOOD, Stationer, 117 John street, near Pearl, N. Y., who will receive remittances and forward receipts therefor by return of mail. He will also gratuitously furnish new maps and pamphlets of the property, and cheerfully give such other information as may be desired.

I also desire to say that I have good FARMING LANDS near my Village Lands, for which I sell to actual settlers or upwards, at $20 per acre, on reasonable terms. These lands are well situated for farming & gardening purposes, in every respect; & having the advantage of a good price for Railroad, when cleared and cultivated, they will be equal to any land on the Island, and equal to that which, in the vicinity of all the old villages and settlements of Long Island, sells for $50 to $200 per acre.

LIFE INSURANCE.

"It is an institution contemplating unmixed good to mankind."

We invite the attention of the Public to the principles of the National Life Insurance Company.

The Charter is liberal and particularly adapted to the wants of all who may desire to embrace such an institution. It should be embraced—

1st, By Husbands and Fathers, to make provision after their death, for their widows and children.

2d. By the young to provide for themselves to mature age.

3d. By creditors to insure the loss which the death of the debtor might occasion.

4th. By the borrower to enable his representatives, in case of his death, to repay the loan.

5th. Those who save a little from their daily labor, or yearly income, should invest it in this Savings Bank, that it may be beyond the reach of accident, and that the widow and child may receive "their own with usury." 41 1tfy

PLOUGHS!

The subscribers would respectfully invite the attention of the Agricultural Public to the above Plough, which has been in use in Western Vermont three years past, during which time it has obtained a popularity beyond that of any other now in use. The Contractors claim for it its lightness of draft, ease of guiding, and beauty of workmanship, that it could not be excelled has been thoroughly tried, and we feel confident in the belief that our plough need but to be introduced, to become a general favorite with the Tillers of the Soil. It has taken the first premium in Addison County, and wherever it has been seen, has been thought to be a superior article.

The Share of the Beam prevents all choking. The elevation of the Beam brings the team more the wind, which is a great advantage in the draft, ease in working, and driving the team. The flange upon the land side is different from any thing of the kind in the country, and contributes to the ease of guiding the Plough. Various testimonials can be produced in favor of the above Ploughs from the best Farmers in the State. The article needs but to be seen to convince any one of its popularity.

GREAT CURE OF DYSPEPSIA!

ANOTHER SCIENTIFIC WONDER!

DR. J. S. HOUGHTON'S

PEPSIN;

THE TRUE
DIGESTIVE FLUID,
OR GASTRIC JUICE!

Prepared from RENNET, or the fourth STOMACH OF THE OX, after directions of BARON LIEBIG, the great Physiological Chemist, by J. S. HOUGHTON, M. D. Philadelphia, Pa.

This is a truly wonderful remedy for INDIGESTION, DYSPEPSIA, JAUNDICE, LIVER COMPLAINT, CONSTIPATION, and DEBILITY, curing after Nature's own method, by Nature's own Agent, the Gastric Juice.

☞ Half a teaspoonful of PEPSIN, infused in water, will digest or dissolve Five Pounds of Roast Beef in about two hours, out of the stomach.

PEPSIN is the chief element, or Great Digesting Principle of the Gastric Juice—the Solvent of the Food, the Purifying, Preserving, and Stimulating Agent of the Stomach and Intestines. It is extracted from the Digestive Stomach of the Ox, thus forming an ARTIFICIAL DIGESTIVE FLUID, precisely like the natural Gastric Juice in its Chemical powers, and furnishing a COMPLETE and PERFECT SUBSTITUTE for it. By the aid of this preparation, the pains and evils of INDIGESTION and DYSPEPSIA are removed, just as they would be by a healthy Stomach. It is doing wonders for Dyspeptics, curing cases of DEBILITY, EMACIATION, NERVOUS DECLINE, and DYSPEPTIC CONSUMPTION, supposed to be on the verge of the grave. The Scientific Evidence upon which it is based is in the highest degree CURIOUS and REMARKABLE.

SCIENTIFIC EVIDENCE!

BARON LIEBIG, in his celebrated work on Animal Chemistry, says: "An Artificial Digestive Fluid, analogous to the Gastric Juice, may be readily prepared from the mucous membrane of the stomach of the Calf, in which various articles of food, as meat and eggs, will be solution, changed, and digested, just in the same manner as they would be in the human stomach."

Dr. PEREIRA, in his famous treatise on "Food and Diet," published by Fowlers & Wells, New York, page 35, states the same great fact, and describes the method of preparation. There are few higher authorities than Dr. Pereira.

Dr. COMBE, in his valuable writings on the "Physiology of Digestion," observes that "a diminution of the sympathy of the Gastric Juice is a prominent and all-prevailing cause of Dyspepsia;" and he states that "a distinguished professor of medicine in London who was severely afflicted with this complaint, finding everything else to fail, had recourse to the Gastric Juice, obtained from the stomachs of living animals, which proved completely successful."

Dr. GRAHAM, author of the famous work on "Vegetable Diet," says: "It is a remarkable fact in physiology, that the stomachs of animals, macerated in water, impart to the fluid the property of dissolving various articles of food, and of effecting a kind of artificial digestion of them in nowise different from the natural digestive process."

Professor DUNGLISON, of the Jefferson College, Philadelphia, in his great work on Human Physiology, devotes more than fifty pages to
