CULLUM SPRINGS, CHOCTAW COUNTY, ALA. Eighty miles above Mobile, twenty-five miles east of Mobile and Ohio Railroad, and five miles west of the Tombigbee river.
The undersigned takes pleasure in announcing to his friends and the public generally, that his establishment is now opened for the reception of visitors. During the past year many improvements and additions have been made, which will be found to increase comfort and convenience, not only to the invalid, but to the traveling or pleasure seeker. These improvements consist of the erection of several new cottages, a commodious grill-room, etc., and the whole establishment has been repainted and refurnished. The bath-houses for ladies, and the medicinal spring house, have been expressly for their accommodation, have been materially improved, and also the barber's shop furnished.
An experience in the management of a public house of more than twenty-four years, and a determination to keep house on the old "Southern plan," will, I believe, be sufficient to secure to him a liberal share of patronage. A splendid band of music has been engaged for the season. To politicians and other place-seekers attendance will be provided on the premises. The cottages are all separate, and are neat, clean and airy.
Conveyances (light change) leave Mobile every Saturday, a week to the landing on the Tombigbee river, at the time when prefer travelling by the Mobile and Ohio Railroad can do so, connecting at the Silas Lane with a good stage team to the Springs. By this last route passengers can leave the Springs at 5 o'clock in the morning, and arrive in Mobile in the afternoon in time for the night train. Passengers can also take daily trips to and from the Springs about the 15th of July, if desired.
As to the curative virtues of the waters, they have not only surpassed the most sanguine expectations of the proprietor, but he believes he can say with perfect propriety that there are no Springs in the United States, for the short time they have been made known to the public, that have such a wonderful range of obstinate chronic diseases, some certainly, I trust, to stand a variety of rare and valuable chemical or medical combinations.
The Springs are of all the three most valuable kinds of waters found in the country, viz: The celebrated Vichy, the Chalybeate and the Sulphur. Such is the variety of their tests as to be found upon any single purse in the whole South—a fact which is publish round the well side.
Arrangements are being made so as to have an Express from New Orleans to Mobile to these Springs, in order to prevent the usual delay of letters and papers caused by the mails, which has very much set the country at a disadvantage, sometimes for a week.
——Rates of Board——
Per Month.....$40
Per Week.....12
Per Day.....2
Carriages will be waiting at the landing upon the arrival of the boats, to convey passengers immediately to the Springs.
An abundance of the water can be had by applying to J. WATERMAN & BROTHERS, corner of Magazine and Common streets, who are my agents in New Orleans.
CHARLES CULLUM.

FIFTY DOLLARS REWARD—THE above reward will be paid by us for the arrest and return of the negro man GEORGE, a slave for life, recently purchased of John Adams, of Hinds county, Mississippi, who ran away on or about the 25th inst. He is about 5 feet 10 inches high, dark complexion, very stout, and has a small scar on one of his cheeks, and has been in company with a white man on that day.
George is black, very stout, under height, 5 feet 11 inches, to 6 feet; has African features, good teeth, and prepossessing appearance.
The above reward will be paid for his return to us, if found outside the city limits, or $25 if found within the city, by
BISCOE & SIMMS,
1y1 30 Nos. 15, 17 and 19 New Levee.

FOWLER'S PATENT STEAM BOILERS have now been extensively used for the last two years, and for economy in fuel have proved to be far preferable to the ordinary boilers. They combine the maximum of safety with Economy in fuel, never require cleaning, occupy a small space, are simple in construction, and do not cost as much as the ordinary cylinder or flued Boiler, and not half as much as other fire-rating, but at the same time, complicated Boilers.
Planters and others interested can see these Boilers in operation at the following places in the city:
Levee Steam Cotton Press, Commercial Place, Carondelet Railroad, N. Hoover Ornamental Iron Works.
Numerous certificates can be seen at the office of the patentee, and circulars, with a plan of the Boiler, will be sent to any part of the country on application by
H. H. FOWLER, 171 Baronne street.
Manufacturer of Low-Pressure, Locomotive, Flued and Cylinder Boilers, Steam Pipes, Fire Fronts, Grate Bars, Valves, Chimneys, etc.

☞ **To the Stockholders of the Southern** Pacific Railroad of Texas:
A general meeting of stockholders will be held in Louisville, Ky., on the 24th day of August, 1858. Business of great importance will be brought before the meeting, demanding the attention of all interested. The enterprise promises all that has been claimed for it by its most enthusiastic and extravagant advocates. Its past management has been marked by features of the greatest character, but it may be, by wise counsels and good management in future, be made to meet the largest expectations of its friends. This is the shortest, best and cheapest route, connected by railway, of the Atlantic and Pacific oceans. The press throughout the country will render this notice and the assured social feeling of the stockholders of the Union a great service by rendering the call for a convention of stockholders, on the 24th day of August, in the city of Louisville, Ky.

IT IS CHEAPER—It costs much less than the tight roofs, and is cheaper than the leaky Tarred roofs, and lasts much longer than the tarred roofs.
IT IS BEAUTIFUL—Its appearance is unsurpassed by any composition roofing, or equals offered to the public across the water, slate and tarred.
IT IS ADMIRABLE—It will resist fire better than a slate roof.
IT IS EXPERIENCE—Tried and approved under the heat of the Mexican and Indian climate, and in the use of tar for large time, that it forms a tight roof.
IT IS DURABILITY—It covers harder and smoother from a water than any other roofing, and is free from the tar, which, when melted, does not require heavy coals to keep it in a fluid state.
IT IS ECONOMY—It costs no more than a good tarred roof, and is cheaper than any other roofing, and is free from the tar, which, when melted, does not require heavy coals to keep it in a fluid state.
The "FLORIDA" and "ALABAMA" roofs have been in operation for two years, some of which are in operation in other states, and are pronounced by all who have seen them to be equal to any roofing in use.
Parties desirous of ascertaining the merits of the above are invited to call at the store and may be satisfied by any person wishing it to be put on their roofs.
All orders left at the Post-Office, Box N, No. 2, will be promptly attended to.

PATENTED COPPER LIGHTNING RODS
Copper is eight times the conducting power of iron, and is more durable and less liable to rust. Again, a single charge of electricity will burst from the iron conductor, but a copper rod defies it. For further particulars apply for circulars, at the office of the undersigned.
Applications for agencies, orders for Stock or Models, and all communications relating to the business, will receive immediate attention, if addressed to

GILDING, PLATING AND BRONZING BY GALVANISM.—Gold, silver, and all other metals of TINNING.
BY C. ROUYER,
153 Chartres street, near the Orleans Hotel.
Gilding, or adding, plating and bronzing is a charge for the restoration of what long practice is necessary.
The undersigned has gone much during the ten years he has been established in this city, that he has realized it.
He can add that the confidence with the public has been so fortunate as to merit, is due not only to the result of his knowledge and practice, but also to the assurance assured by his probity.
Twenty-nine years of his life have been devoted to the improvement of electrical work, and from his shop during the absence in Europe.
C. Rouyer, after more than two years spent in costly experiments, has succeeded in discovering, or rather inventing, a new process for finishing by means of galvanism.
He will therefore undertake the gilding of chafing-dishes, dishes, tureens, etc., small styles, for steamboats, hotels, boarding houses, etc., etc., etc.
C. ROUYER.
