LEE & LEAVITT'S PATENT CIRCULAR SAW MILLS, with Patent Rocker Boxes, and Steam's Patent Eccentric Head Block.

This Mill is fully one third stronger both in iron and wood work, and much superior in every respect, and gives better satisfaction, than any Circular Mill heretofore in use.

Horizontal Patent motion is suspending the saw so that it can have a lateral vibration, and when thrown out of line will recover itself by the action of the driving belt and the arrangement of the parts by which it is suspended; while at the same time the arbor has no lateral play in its boxes, and is made to fit close with the shoulders, to prevent the off from getting out of line, which is a matter of great importance when the motion is rapid, as in Circular Saw Mills.

Steam's Patent consists in enabling one man to move the log on the ways with ease and with accuracy, thereby saving one man's wages, and making better work than Mills with the usual screw head blocks.

Twenty-five of these Mills now in store ready for delivery, with Saws from 24 to 60 inches in diameter; also, Steam's Portable Mills, with Top Saws, and a full assortment of the "Young America" iron frame Mills. For sale by

S. H. GILMAN, 70 Gravier street, New Orleans.

LEEDS' FOUNDRY, NEW ORLEANS.
