New Orleans Daily Crescent.

SATURDAY MORNING, FEBRUARY 19, 1859.

[illegible]—Feb. 12.

[illegible] passage, from Liverpool to [illegible] on fire at sea, only one was picked [illegible] ship, the survivor of [illegible] died one by one of cold and star-[illegible]

[illegible] a servant of Washington at the [illegible] died at Staunton, [illegible] served with the General at the [illegible] and was accustomed on holi-[illegible] during his life, to the [illegible] of the boys.

[illegible] sailed to the United States by Spain. [illegible] Dardanelle, with 8 ships of the [illegible] together with fire ships and gun [illegible] during pass of the Dardanelles, [illegible] and appeared before Constantinople, [illegible] that never seen an enemy's fleet. [illegible] shot from their batteries upon [illegible] of them weighing upwards of 800 [illegible] squadron, consisting of a 67 [illegible], 5 corvettes, a brig and 2 gun [illegible]

[illegible] Cruising between the British [illegible] and the French frigate L'Af-[illegible] guns. The Frenchman lost [illegible] 12 wounded, and was captured, [illegible] and 13 wounded.

[illegible] the renowned and rich Lon-[illegible] sold 18,000 copies of Burke's [illegible] French Revolution.

[illegible] Otter and Mountney, with 21 men [illegible] Virginia, raised the tower of Mar-[illegible] and hoisted the British flag for the [illegible] Islands.

[illegible] Yacht Sled at Anchinleck, aged [illegible]

[illegible] Marquis De Favras executed. His judges [illegible] by the mob shouting during the [illegible] to murder.

1776—Capt. Jason Willing took possession of [illegible] in the name of the U. S.

1778—In Quito, in South America, attacked by [illegible] swarms of locusts.

[illegible] between the French and [illegible] under Kouligsang; and the latter of [illegible] with the loss of 5,000 men, in-[illegible] at Wittemburg.

[illegible] consisting of 18,000 foot, 2,000 [illegible] 700 dragoons, passed the Tweed at [illegible] in behalf of the Parliament.

[illegible] of the Edinburgh Presbyterians, [illegible] their allegiance, and entered into a [illegible] against the Government, [illegible] compelled all people to subscribe; sev-[illegible] Bishops were forced to fly to England.

[illegible] Vanini, a learned Italian, burnt. He [illegible] himself with arabic letters, studying [illegible] astrology, at Rome and [illegible] throughout every country of [illegible] himself with instruction; but [illegible] he became obnoxious to sus-[illegible] of his religious views. In 1617 he [illegible] where he was accused of atheism [illegible] condemned to the flames. He was [illegible] of execution, when after his [illegible] tongue was cut out, he was strangled, and burnt at the stake at Toulouse.

[illegible] passed the English Parliament allow-[illegible] marriage, on the ground that it was a [illegible] charity.

[illegible] Sacre, an English clergyman, was [illegible] hung, by the clergy, with the permission [illegible] IV. This is said to have been the first exe-[illegible] put to death on account of religion.

[illegible] Claudius Albinus, a Roman who as-[illegible] the imperial purple in opposition to Severus, [illegible] was slain in battle on the river Rhone.

Events of Feb. 20.

[illegible]—Joseph Hume, the English statesman, died, aged 78. He was a member of the House of Commons 32 years.

[illegible]—The most violent snow-storm that had occurred since 1831, commenced at Washington, and [illegible] over the middle and New England States. [illegible] Elliott Cresson, President of the Penn-[illegible] Colonization Society, died, leaving $127,000 [illegible] institutions.

[illegible]—The first Legislature of Texas under the United States met at Austin. Gen. Henderson was [illegible] the first Governor.

[illegible] tremendous earthquake in Chili. The [illegible] Concepcion, containing 25,000 inhabitants, was reduced to a heap of ruins, not a single house [illegible] standing; many other towns and villages were [illegible]. At first, the sea retired and left the vessels in the harbor aground; but it soon rushed vio-[illegible] full 30 feet above its level.

[illegible] Battle of San Christoval in Spain, in which [illegible] insurgent army was defeated with the loss of [illegible] 12,000 killed and prisoners, by the French un-[illegible] Lopez, whose loss was stated at 400 only.

[illegible] Andreas Hofer, the leader of the Tyrolese [illegible], executed. He was a brave patriot, and [illegible] with heroic firmness.

[illegible] Managua surrendered to the French. The garrison was reduced to 13,000 men, who, when they marched out of the city, had more the appearance of spectres than of human beings. During this second siege 14,000 perished, of whom one fourth were sol-[illegible]

[illegible]—British evacuated Egypt.

[illegible] at Stanwell, England, while excavations were being made for a wet dock, several hazel trees [illegible] were found deeply imbedded below several [illegible] of sand and clay. The same day Joseph II, [illegible] of Germany, died.

[illegible]—Gouverneur Morris appointed by Congress su-[illegible] of finance.

[illegible]—British under General Clinton invaded South Carolina.

1772—The royal marriage act of England was passed.

[illegible]—Peter Gahagan, executed at Tyburn. He was a gentleman by birth, and a scholar; he edited [illegible] a beautiful edition of the classics, and translated [illegible] Musaeus and Temple of Fame into Latin verse. [illegible] was fond of clipping coin!

[illegible]—British ship Chester, Capt. Geary, captured the French ship Elephant with $24,000 on board.

[illegible]—A party of 40 New Hampshire volunteers on [illegible] for hunting Indians, discovered a party [illegible] encamped for the night round a fire. Advancing cautiously at midnight, the enemy were found asleep and the whole shot. The party entered Dover in triumph, with the ten scalps stretched on hoops and elevated on poles, and received a bounty of £100 for each scalp, at Boston, out of the public treasury.

[illegible]—Thomas Dunme buried at Minshull, England, "being of the age of seven-score and fourteen" (134 years).

[illegible]—Drake, after many profitable captures in the Pacific, arrived at Lima, where he plundered all the ships in the harbor, in one of which was found a chest full of reals of silver, and a good store of silks and linen cloth.

1494—Master Marie Bolardo, count of Scandiano, died. In his Orlando Innamorato he immortalized his own peasants and the charms of the scenery at Scandiano in the persons of his heroes and the beauties of nature.

1437—James I, of Scotland, murdered, at the age of 44.

Monkey Racing.—From the Tribune of Wednesday we extract the following:

The weather was a little better yesterday for the second day's racing, but the track was rather heavy. There were two races announced—the first—trotting [illegible] to 3 to harness, was won very handily in three straight heats by Sam Hyer. The second race was trotting, for all Mobile horses which had never shown [illegible] to the public. There were three entries, viz: Steeplechaser, Sam Houston and Josephine, and a sor-[illegible] pacing. It was a crowded point by all that the [illegible] would win the race. Steeplechaser took the two first heats, both being well contested by Josephine. The third was won by Sam Rice's [illegible] Mobile K 50 night and we left the [illegible] to learn that Steeplechaser won the [illegible] race.

SUMMARY.

WASHINGTON CORRESPONDENCE.

Special to the New Orleans Crescent.]

WASHINGTON, Feb. 11, 1859.

The report that the Hon. George Eustis, of your city, would ere long lead to the hymenial altar the daughter and only child of Mr. Corcoran, the great Washington banker, is confirmed. The betrothed couple "received" together on Monday last, the regular reception day of the Corcorans. It was rumored that the marriage would take place on Tuesday next, but this is a mistake; it will not occur until after the adjournment of Congress.

A bill appropriating $90,000 for the construction of an iron lighthouse at the South-West Pass has passed the House and is now before the Senate.

Mr. Benjamin's speech this morning in favor of the acquisition of Cuba was one of the finest specimens of parliamentary oratory I ever heard. It was listened to with profound sensation by an immense audience, and many of its passages elicited the applause of the galleries. It will create a profound sensation both in this country and in England. Indeed much of the ablest portion of it was devoted to the trimming and trickery of English diplomacy and philanthropy in past and present times. The necessity of slave labor for tropical productions was never so exhaustively treated or so irrefutably established. As the first effort after a re-election, this speech is well calculated to produce the utmost satisfaction in Louisiana.

We have had still another Democratic caucus, resulting in a triumph of the Pennsylvania men over the Sea-them Rights wing. We now hear positively that there will be an increase of the revenue, or an extra session. Clingman yesterday declared his willingness to spend the whole of his Senatorial term in extra sessions, rather than yield to the protectionists. Railroad iron he would admit duty free. Thus, one by one, the ancient landmarks of Democracy disappear, and are swallowed up in the ocean of Buchanan federalism; if there remains one principle for which the Whig party contended, not now embraced in the Democratic platform, it is the United States Bank, and that alone. Of a truth, "times change and we change with them;" yes, verily, and with a vengeance.

"Poverty makes us acquainted with strange bed-fellows." An exhausted treasury has acquainted us with facts more strange and astounding than any bed-fellows. Not only do we find the most wanton and wasteful extravagance in every department of the Government, but the gravest corruption in the highest places. As yet no charge of venal jobbery has been preferred against the Chief Magistrate himself, nor is it possible there will be; but he has sins enough of another sort to answer for. Mr. Floyd's performances in forts and beef cattle are familiarly known to a grateful and admiring country. He has been white-washed, and the story is old. But here of late it turns up that both the Secretary of the Navy and of the Treasury have been following in the footsteps of their illustrious predecessors of the War Department. Nepotism rules rampant in the Navy Yards. Suprising coal contracts are made with kinsmen of Mr. Toucey. As to Mr. Cobbs' dealings in stone for the public buildings, the facts are not so clear. We may reasonably look for more light on this particular branch of the broad general subject of public peculation.

This much, however, we do know. That, although a Post-Office and Custom-House in Baltimore have been authorized by Congress, and the money for their erection appropriated, not one blow has been struck upon them. When Congress inquires why this is so, Mr. Cobb retorts the inquiry with the flimsy excuse that there was no money in the Treasury, when the fact is well known that at the time the above buildings were authorized, there was a surplus of twenty millions in the Treasury. The truth is, Baltimore was punished by Mr. Cobb for being the most exemplary American city in the Union. This resistance of the laws by the very officers sworn to execute them, has reached a serious hight. Not only does Mr. Cobb dare to resist Congress, but in the case of Carmack & Co., we find a subordinate official, a mere head clerk indeed, setting at defiance both branches of the National Legislature, by refusing to execute a law which had passed the Senate and House, and been re-affirmed in the former.

Mr. Miles Taylor's proposition for a temporary revival of the tariff of 1846, meets with much approval among the Southern Democrats who find themselves compelled to yield to a modification of some sort. All agree that an increase of revenue is not so much needed as a reduction of expenses. So the work of retrenchment goes bravely on, the mileage, the members, the salaries of clerks in the Surveyor's offices, and the appropriations for printing, falling one after another under the pruning knife of reform. This may be well enough in its way, but Toombs touched the center of the ulcer when he pointed to the Executive and his Cabinet as the great offending head of improvidence and corruption. Page, in his recent work on La Plata, states that at the time of the disagreement between Lopez and himself, which brought on the present Paraguan war, he agreed to whip out Lopez with a single armed vessel. He applied to the Commodore of the Pacific squadron for this vessel, and it was refused, until the application could reach the Navy Department here. The application came, Page was ordered home, and an armada comprising nearly the entire American navy, was sent to do the work of a single vessel. The cost cannot be less than several millions. But this was not enough. No sooner had the American fleet been fitted out and got fairly to sea, than another vessel containing one of these patent new-fangled ante-war implements called a commissioner, was sent after it. Of course the Commissioner has a high salary. And *this* is the way the money goes.

The nomination of the Hon. Wm. L. Goggin for Governor by the Whig Convention, which met yesterday in Richmond, was, perhaps, the very best that could have been made. Mr. Goggin is a man of decided talent, and of great energy and capacity, as a stump-speaker. He can hardly hope to defeat John Letcher; but he well knows that the eyes of the nation will be turned to the leader of the Whig battle in Virginia, and that if he makes a brave fight the highest honors may await him in the early future. The canvass, therefore, will be one of scarcely less interest than was that of '55, when Wise so distinguished himself.

To-day we have Hunter's thunder on the tariff. I must hasten to a close, in order that I may hear it.

A Mr. Groux, who has no breast-bone, is lecturing here on the circulation of the blood. Savage's new play, "Waiting for a Wife," is being acted; and Lord Napier's farewell ball comes off next Thursday.

MALOU.

RACING AT CHARLESTON.—We learn from the Charleston Courier that two races, extra of "racing week," came off on the 12th over the Washington Course, the track being very heavy. The Courier furnishes the following summary:

MARCH RACE—$2,500 a-side—Two Mile Heats.

C. c. Planet, 3 years old, by Revenue, out of Nina, by Boston	1	1
B. f. Hornet Fairow, 3 years old, by imp. Glaucus, dam by imp. Belshazzar	2	2

Time—3:47—3:48.

The first heat was excitingly contested, and decided by neck. On the second round the Planet completed the orbit with ease relatively, and took the heat and match stakes by a good gap.

Second Race.—Citizens' Purse—Three mile heats.

C. f. Fanny Washington, 3 years old, by Revenue, dam Sarah Washington	1	2	2
B. c. Mazeppa, 3 years old, by Sovereign, dam by Boston	2	3	0
B. f., 4 years old, by Glencoe, dam by Priam	4	dr.	
Ch. h. Tar River, 5 years old, by Nicholas, dam by Cymon	3	1	1

Time—5:40½—5:47½—5:56.

On the first heat the contestants huddled well together. Afterwards the challenges fell to Fanny Washington, who made a good second, and kept up a thrilling suspense for some time.

Tar River pitched in to win honor, and by steady efforts and endurance, took the closing heats and the purse.

SHIPPING COTTON TO GALVESTON.—The Galveston Civilian of Tuesday last says:

One of the largest planters on the Sabine river, living on the Louisiana side, informed us the other day that he finds a decided advantage in sending his cotton to this market instead of New Orleans. While there is very little, if any, difference in price, it costs only half as much to send it from Sabine Pass here as to New Orleans, freight here being but 75 cents per bale, and $1 50 to New Orleans. He thinks this is the natural market for a large portion of Louisiana near the Sabine and the Gulf, and believes many more of the planters would send their crops to Galveston but for the fact of outstanding balances with the New Orleans merchants. He entertains no doubt that the completion of the proposed canal, connecting East Bay with Taylor's Bayou, will be the means of bringing a very heavy trade to this city. He informs us that the improvement of the Sabine, under a contract with our State Engineer, has materially benefitted the navigation, though not yet completed. He thinks that river will be made navigable for a large portion of the year as high up as Logansport.

OFFICE AND RESIDENCE AT

THE ELECTRO-CHEMICAL INSTITUTE,

No. 146 ST. JOSEPH STREET,

Between Camp and St. Charles,

NEW ORLEANS,

Where the Doctor can be consulted from 8 A. M. till 9 P. M. Families visited at their Residences if desired. Special Department for Ladies.

That the public may properly understand his method of curing the above-named diseases, the Doctor begs to call attention to the following extracts of his work upon CONSUMPTION, CATARRH, and Diseases of the EYE and EAR:

Consumption.

Consumption is a local disease, generated and fed by the blood in a certain chemical condition, and can only be removed by local chemical means, capable of altering that condition, through the medium of the diseased organ. To accomplish this purpose, as we cannot apply solids or fluids to a cavity designed only for the reception of air, we reduce them to a volatile condition, and form an appropriate instrument to inhale or breathe the vapor.

By the inhalation of vapors, we can produce all the beneficial effects capable of being produced by medicines much more speedily and efficiently than from the administration of crude medicines through the stomach. The practice of giving medicines by the stomach, in the treatment of this disease, is objectionable; first, because they do not come in direct contact with the organ affected; secondly, because their most powerful actions is expended on organs in a healthy state, or only disordered through sympathy, thereby deranging digestion, and destroying the nutrition of the body; and finally, because many agents of great value can only be administered in the gaseous state.

Catarrh.

Catarrh is a diseased state of the Pituitary or mucus Gland, situated within the head back of the eyes, which secretes in health a pure, limpid fluid, and is given out through minute vessels or tubes traversing each nostril for the purpose of lubricating the schneiderian or lining membrane of the nose and shielding it from acrid substances. Upon this membrane are the olfactory nerves. When this gland is once diseased, the fluid is morbid and vitiated, and exerts an injurious and poisonous influence upon the whole portion of the membrane with which it comes in contact. It is produced from various causes. Sudden changes of the atmosphere, and malaria or floating media; empties fevers, scarlatina, erysipelas, measles, venereal or syphilis, will produce it. No medicine taken into the stomach, or "snuff" nostrums, can cause a removal of Catarrh, or obviate the tendency of these results.

I do not hesitate to affirm, without fear of contradiction, that this is a local diseased condition of the Pituary Gland, and can only be met and cured by local chemical means, capable of altering that condition through the medium of the diseased organ.

My method of applying the curative agents to the parts affected, by the inhalation and injection of medicated fluid and vapors through the nostrils, in catarrh and ozena, is the only rational and philosophical process, and the cures effected by me, and the testimony connected with them, are the best proof of the potency of the medicines administered by inhalation.

Diseases of the Eye.

Dr. Crane has been very successful, during the past six years, in this city, in treating the following diseases of the eye:

OPHTHALMIA TARSIA, or chronic inflammation in the edges of the eyelids.

ECTROPIAN, or permanent inversion of the eyelid.

ECTROPIAN, or eversion of the eye'lid.

PETOTIS, or falling of the upper eyelid.

XEROPTHALMIA, or dryness of the eye, resulting from a want of proper secretion of the conjunction.

EPIPHORA, a superabundance of tears, and all other diseases of the conjunction.

AMAUROSIS, or an imperfection of vision, arising from disease in the retina, optic nerve, brain, or fifth pair of nerves.

Diseases of the Ear.

In all cases of disease in this important organ, Dr. Crane's method will be found to effect cures even after all others had failed; and in Deaf and Dumb cases, if the hearing was ever good at any time, both the hearing and speech are very often restored.

Electro-Chemical Baths.

DR. CRANE, in connection with his specialities, has also a PERMANENT OFFICE and INSTITUTE at 146 St. Joseph street, for the thorough treatment and cure of all functional diseases, and for the extraction of mercury, and all foreign substances, from the system, by the application of the ELECTRO-CHEMICAL FORCES, or ELECTRO-CHEMICAL BATHS, as discovered by his late associate, Prof. Vergnes.

In the preparation of the ELECTRO-CHEMICAL BATHS, for the extraction of metals and other foreign substances from the human system, the science of Chemistry is brought into requisition, acting in unison with nicely-adjusted currents of electricity, surcharging every fibre of the system, and radiating through every pore.

Their efficacy in extracting all metallic substances, either taken as medicines, or absorbed, while exercising the professions of Painters, Gilders, Looking-Glass Platers, Plumbers, Lead and Paris Green Manufacturers, Chemists, Electrotypists, Daguerreotypists, Brass Founders, etc., is no longer a question of doubt.

For Scrofula and all affections arising from the impurities of the blood, and in the class of Uterine maladies, these baths have proved infallible. Their electric and beneficial effect in cases of Fever and Ague, and upon weak and debilitated females, who lack vital energy, is truly wonderful.

The remedy is simple in its arrangement, and almost instantaneous in its effect; differing far from all other medical expedients; it simply strengthens nature, in her efforts, by an agent at once potent and kindred in character, and thus enables her to expel the morbid causes of disturbance, and reform the normal conditions of health.

The five years' experience of DR. CRANE warrants him in affirming and guaranteeing, that these Baths will relieve and permanently cure, all those afflicted with Rheumatism (inflammatory or chronic), Paralysis, Neuralgia, Contracted Muscles, Stiff and Enlarged Joints, and the various nervous and dyspeptic affections caused by the presence of minerals in the system.

TESTIMONIALS.

That the public may judge for themselves as to the success of the Doctor in treatment of the diseases in his speciality, the following certificates, selected by chance from among thousands given by citizens of this city and neighboring country, are copied:

ASSUMPTION, LA., May 15, 1857.

This may certify that my boy, Davy, had been afflicted with disease for four or five years, and under care of several of our best physicians, who pronounced his case dropsy, but were unable to benefit him or arrest the progress of the disease, and we considered him incurable. In May, 1856, I called upon Dr. Crane, who examined the boy, and said his disease was Hypertrophy and Imperfect closure of the mitral valve of the heart, and the dropsical state of the blood, the effect of disease in that organ. He further stated that the disease was considered incurable by the usual method of treatment. He was then suffering from the dropsical effusion and dyspnea, so that he was unable to lie down at all. After a week's treatment the symptoms were decidedly favorable, which induced the Dr. to continue the treatment, and at the expiration of one month all the characteristic symptoms of the disease had left him. The treatment was continued another month, when he was pronounced by him to be fully satisfied that the disease had entirely disappeared, when I took him home. He was at first very thin and weak, but rapidly recovered his strength and flesh, and has since been entirely well, and for about nine months a full field hand, weighing two hundred pounds, and one of my most valuable negroes.

F. W. PIKE.

NEW ORLEANS, May 8, 1857.

This may certify that my wife was suffering from a most severe attack of Inflammatory Rheumatism, and had been, for many days, unable to move a limb, and for some time unable to swallow, when I heard of the wonderful cures which Dr. C. P. Crane was performing at the Electro-Chemical Institute, 146 St. Joseph street. My wife was carried there upon a couch, in a state of helplessness. She took one Electro-Chemical Bath, and was by this means restored in a short time to her usual state of health.

WM. A. WILLETT,
125 Julia street, New Orleans.

NEW ORLEANS, June 15, 1857.

Having witnessed the complete restoration to health of a friend in the second stage of Phthisis pulmonalis, or consumption, I feel it a duty to make known the means by which this result was accomplished.

As briefly as possible, I will state the circumstances of the case. This young lady had been examined by one of our best physicians, considered most skillful in diseases of the chest and lungs, who pronounced her in consumption; that one lobe of the lungs was gone, and she would probably not live more than two months. About the first of December, 1856, I called on Dr. C. P. Crane, 146 St. Joseph street, who made an examination of her chest and lungs, and pronounced them as before described by Dr. W——, mortal diseases, and positly beguiled; but added, "I do not consider it a hopeless case, for by stress ing further tubercular deposition, she will have sound lung enough left to live on, and will be no more liable to die of consumption than if she had not been sick. She then commenced treatment under his peculiar system of inhalation, and in three months was so much improved as to consider herself as well as ever. Having every reason to be grateful to Dr. Crane, to whom, under God, she considers she owes her life and present state of health, I have given this publicity, that others suffering from this hitherto considered hopeless disease, might feel that there is still hope, if they will avail themselves of the skill and experience of this scientific practitioner.

J. WRIGHT & CO.

DR. WRIGHT'S CELEBRATED REJUVENATING ELIXIR,

Prepared on the strictest Pharmaceutical Principles, by one of the Ablest Chemists of the Age.

NO MINERALS.

Dr. Wright thinks it well to stake his professional character on the fact that no minerals whatever from the least component part of the ingredients in his REJUVENATING ELIXIR—well knowing what ruin has been entailed on the community by opium and mercury.

Generally, to the debilitated, Dr. Wright would say, never despair. No matter how worn down you may be—no matter how weak you are—no matter what the cause may have been—forsake at once whatever has led you to depart from Hygienic principles; take his

REJUVENATING ELIXIR,

and you will soon find yourself a new man, a pride instead of the reverse, to your friends, and a healthy, sound and worthy member of the whole human family.

For sale by the Proprietors,

And by Druggists generally throughout the United States.

HELMBOLD'S EXTRACT BUCHU.

JOY TO THE AFFLICTED.

It cures Nervous and Debilitated Sufferers, and removes all the symptoms, among which will be found—

Indisposition
to Exertion, Loss
of Power, Loss of Memory, Difficulty of Breathing, General Weakness, Horror of Disease, Weak Nerves, Trembling, Dreadful Horror of Death, Night Sweats, Cold Feet, Wakefulness, Dimness of Vision, Languor, Universal Lassitude of the Muscular System, Often Enormous Appetite, with Dyspeptic Symptoms, Hot Hands, Flushing of the Body, Dryness of the Skin, Pallid Countenance and Eruption on the Face, Pain in the Back, Heaviness of the Eyelids, Frequently Black Spots Flying before the Eyes, with

Temporary Suffusion and Loss of Sight, Want of Attention, Great Mobility; Restlessness, with Horror of Society. Nothing is more desirable to such Patients than Solitude, and nothing they more Dread for fear of themselves, no Repose of Manner, no Earnestness, no Speculation, but a Hurried Transition from one question to another.

These symptoms, if allowed to go on—which this medicine invariably removes—soon follows LOSS OF POWER, FATUITY and EPILEPTIC FITS—in one of which the patient may expire. Who can say that these excesses are not frequently followed by these direful diseases—INSANITY AND CONSUMPTION? The records of the INSANE ASYLUMS, and the melancholy deaths by CONSUMPTION, bear ample witness to the truth of these assertions. In Lunatic Asylums the most melancholy exhibition appears. The countenance is notually sodden and quite destitute—neither mirth nor grief ever visits it. Should a sound of the voice occur, it is rarely articulate.

"With woeful measures wan despair
Low sullen sounds his grief beguiled."

Debility is most terrible, and has brought thousands upon thousands to untimely graves, thus blasting the ambition of many noble youths. It can be cured by the use of this

INFALLIBLE REMEDY.

WINER'S CANADIAN VERMIFUGE.

IMPORTANT MEDICAL INFORMATION.

The late Dr. Chapman of Philadelphia has laid it down as a rule, that "worms may be suspected in a child where there is emaciation, and especially weakness of the bowels, accompanied by a discharge of slime and mucus," and all medical authorities agree that to work a thorough cure, the stomach and bowels must be invigorated as well as the worms themselves discharged. Winer's *Canadian Vermifuge* fulfils both these conditions. It not only extirpates the vermicules, but strengthens the digestion, increases the solvent power of the gastric juice, and imparts a healthy action to the bowels. Hence its cures are complete and permanent.

THE IDEA OF THE LIVING BODY

Being the receptacle of greedy worms, is sickening; and yet six out of every ten children are more or less afflicted with them. Why should this be the case when there are volumes of testimony to prove that a few doses of Winer's Canadian Vermifuge will eradicate the disease? Parents make a note of this established fact, and remember that the medicine is free from all deleterious substances.

PAINLESS IN ITS OPERATION.

Certain in its results; free from all mineral substances, and invigorating to the system; these are the merits of WINER'S CANADIAN VERMIFUGE, a preparation which eradicates every class of internal worms, with a degree of dispatch that is as agreeable as it is astonishing.

DALLEY'S MAGICAL PAIN EXTRACTOR.

THERE IS NOTHING LIKE IT.

How much pain and suffering—nay, even life itself—may be saved, by having a supply of "Dalley's Magical Pain Extractor" on hand, in case of sudden accidents. In cuts, wounds, burns, scalds, sprains and bruises—casualties to which children are constantly subject—the action of the Pain Extractor is ever the same. Families should never be without it. Full directions accompany each box. The genuine is always signed HENRY DALLEY, manufacturer, upon a steel engraved label.

DALLEY'S MAGICAL PAIN EXTRACTOR

Has now been in use over thirty years; there is hardly a person but what has heard of it, and not a family that has used once, that could be induced to be without a box on hand in case of sudden accident. Where once used it is sure to become a standard remedy, because it has no equal in curing burns, scalds, cuts, wounds and bruises, fever sores, piles, and all other inflammatory and cutaneous diseases, where the parts affected can be reached.

A WORD TO FAMILIES.

When you look around your houses, and you think there is nothing wanting, your children all playful and smiling, and everything foretokens comfort and happiness, suddenly one of the dear young ones falls, and a deep cut is the result of the accident. You now look everywhere for relief and you can't find it—why? Because you have neglected to have on hand a box of "Dalley's Magical Pain Extractor"—this is the whole trouble. Remember and always have it on hand. Instant relief will be at hand.

DALLEY'S MAGICAL PAIN EXTRACTOR

Will subdue the pain and inflammation from the severest burns or scalds, in from one to twenty minutes, heal the wounds without scar, and effectually cure fever sores, piles, salt rheum, inflammatory rheumatism, sore and inflamed eyes, cuts, wounds bruises, old sores, scald head, corns and bunions, sprains, swellings, felons, chilblains, bites of insects, sore nipples or swelled or broken breasts, and all other inflammatory and cutaneous diseases, where the parts affected can be reached.

FEVER AND AGUE.

OSGOOD'S CHOLAGOGUE.

This is the only sure and certain remedy for this baleful disease. No one need ever again complain of having it, unless they have never taken this celebrated remedy. If once they take

OSGOOD'S CHOLAGOGUE,

then farewell to Chills and Fever forever.

Sole Agents for the South, and to whom all orders should be addressed.

GREAT DISCOVERY.

Ample tests, both by able practitioners and chemical analysis, have demonstrated the great value of Prof. De Grath's beautiful combination, called

ELECTRIC OIL,

for the relief and cure of pain. But the people themselves are rendering their verdict in a manner both unmistakable and satisfactory. More than twenty thousand bottles have been sold in a very short time—a great proportion to those who heard others recommend it, who had tried it. That it's a splendid discovery is everywhere acknowledged, and nothing like it was ever before prepared.

The only genuine ELECTRIC OIL is Prof. DeGrath's, which is to be had at all the respectable Druggists in this city, and at wholesale and retail, at the proprietor's prices, of the Agent.
