New Orleans Daily Crescent.

SATURDAY MORNING, MARCH 5, 1859.

SUPPOSE PANORAMAS.

[illegible] "Niagara."

We advise everybody to go and see "The Niagara" at Church—Frederic Edward Church, the great native landscape painter, whose work has conquered competition from the very lips of prejudice, forcing critics even to acknowledge its superiority. Go and look it and converse face to face with the eloquent [illegible] which speaks from the wonderfully painted canvas, and your expectations will not be disappointed however high they may have been raised by eulogistic, never so general and unqualified, lavished on both sides of the Atlantic.

Painters of inanimate nature—land and waterscapes—for the most part belong to two classes: those whose great aim is the conveying an impression of general effect to the comparative neglect of nicety of detail; and those who, aiming at minute precision in the representation of the several objects, generally sacrifice effect. But Church, and a few illustrious brethren who constitute the family of "masters," belongs to neither class, happily combining the peculiar genius and ability of both. He paints nature—nature's whole—the entire nature which is made up of many parts, great and small, their contrasts and harmonies, the lights and shades, the arrangements which produce effects.

In this picture each little wave, foam dash, spray sparkle, moss covering in the moveless colors, and the water rose in paint as the torrent rushes forward to hang into the gaudy chasm which gapes its abysmal mouth to receive the flood of the broad river—the little manikin that happens which in falling over a precipice that is unexpectedly comes upon constitutes the great terrestrial wonder of wonders, "The Falls of Niagara." The rainbow child of sun and spray, broken by rising mist clouds from the boiling confusion of the waters, arches the fall in matchless colors, and the hues of autumn dye the foliage of the wooded hodgepodge of the Canadian shore; from the brink of the fall a dozen miles of water stretch away up the river, pictured in really wonderful perspective, on two inches breadth of the canvas, with all the rushing fury of the rapids, the swirl of eddies, and dashing foam conflicts with opposing rocks; the light of the descending sun gilds the fleece of a cloud pile on the left, on the right strata cloud layers stretch eleganly along the horizon, and the soft, gauzy haze of the Indian summer atmosphere is over all.

The picture gives the whole sweep of the Horseshoe Falls, from Goat Island to the Canadian shore—or what was the Horseshoe, for the gnawing tooth of that omnivorous flood has eaten it out of the shape which gave it name. The artist gives nothing to distract the attention from the one great object—no blight of sky scene to lessen it by contrast, no surrounding scenery save that which was necessary, and which is lessened to background insignificance; the Fall commands the canvas solely, occupying the fore and middle ground. The picture gives a perfectly correct idea of the Fall to those who have never seen the original, and those who have, see it again in the artist's work.

The chromolithographic copies of the picture are its perfectly correct miniatures, approved by Church himself, and are entirely worthy admiration for their truthfulness and beauty of execution.

Marine Insurance.

A publication of an "Abstract of the Returns made to the Lords of the Committee of Privy Council of Wrecks and Casualties which occurred on and near the Coasts of the United Kingdom in 1857," has lately been made in England, and it sets forth that one of the great causes of wreck disasters is not rocks, shoals and stress of weather, but something more dangerous than either to life and property—Marine Insurance. To this source is attributed the unseaworthiness and overloading of vessels, their being ill found in anchors, cables, etc., want of good charts, incompetent masters, and all other disabilities to safe navigation, and the purport of the report is to suggest authoritative action on the part of Government to make a radical change in the system of marine insurance, in order that its indemnities may present no temptations to villainy, and that a character for carelessness or incompetency may be an impregnable bar to the employment of such shipmasters by owners. The terms of insurance seem to offer a direct premium to create in all cases a "total loss," and so captains often leave ships to their fate when they might be saved, and rascal captains often steer old but well insured vessels to certain destruction, a cause to which is accredited a large proportion of the wrecks on those "ship-traps," the Florida reefs, a safe place for being wrecked, for a vessel may be put among the coral breakers with an almost impunity of danger to life, and a little careful carelessness in that dangerous latitude will save the master's conscience and secure his owners the too good price for their old craft secured to them by the underwriters' policy. It is very probable that any action adopted in this matter by England will be so wise as to commend it a like approval and adoption in the United States. The Quarterly Review has an interesting article upon this subject.

JUDGES TANEY AND MCLEAN.—The Washington correspondent of the Philadelphia North American says, there is not a particle of foundation for reports that Judge Taney and McLean intend to resign their seats in the Supreme Court from ill-health, or indeed, from any other cause. They may be both seen daily in the discharge of the responsible and onerous duties to which they are fully equal.

THE RIFF PIRATES.—A private letter from Melilla of the 14th January, received at Madrid, states that an officer of the Emperor of Morocco had arrived in the mountains of the Riff, and summoned the rebel chief Benisidel to deliver up Lieutenant Alvarez and other Spanish prisoners. The chief of the tribe formally refused to obey the Emperor until the Spaniards had delivered up the cannon which they had taken from him. It now remains to be seen whether the Emperor of Morocco will be strong enough to enforce obedience on Benisidel and his tribe.

GENERAL JAIL DELIVERY.—Twenty-one prisoners escaped from the jail at New Castle, Delaware, on Friday night the 18th ult. Three of them were convicted murderers, and one was under the sentence of death. Six of the fellows were afterward recaptured. The jails of Delaware are notoriously insecure, not to say such, for the confinement of criminals, and it is not surprising that so many escapes are effected.

AN ANECDOTE OF HANCOCK.—One of the descendants of John Hancock relates the following incident:

During the revolutionary war Mr. Hancock gave a grand entertainment to Count de Estaing, commander of the French fleet. As the time for dinner approached, Mr. H. was informed that by some oversight there was not a drop of milk in the house, and as the lactal fluid was not as plentiful in the days of war and embargo as in the present of peace and quietness, the deficiency was a matter for grave consideration. Finally he gave his domestics an order to proceed to the adjoining common, where the cows of some of the townspeople were quietly grazing, and milk them. This was done, the necessary supply was obtained, and the feast proceeded. The next day Mr. Hancock gave public notice of his filibustering proceeding, and stated his readiness to pay all demands for damages, but, under the circumstances, the owners declined any compensation.

A NEW GAME SHARE.—The village of B——was often visited by flocks of wild geese, which occasionally stopped over night, and continued their journey next morning.

They came one intensely cold winter night, and settled down on farmer H.'s field. He was in want of game and anxious to secure some, but not having ammunition, he did not know what to do. After deliberating a long while, and when about to give up the idea of taking some of the geese, a plan struck him which he concluded to adopt forthwith.

He went to his pond, opened the flood-gate, and let the water run slowly on his field till it was covered to the depth of an inch and a half.

In the morning, when the geese attempted to fly away, they found to their great astonishment that they were frozen in. [N. Y. Picayune.

MURDER IN MISSISSIPPI.—The Paulding Clarion of Wednesday last says:

We learn that a murder was committed, at Sogge' Store, in the western part of this county, last week. The testimony taken before the Coroner's Jury is to the effect that a man named John B. Williams, of Smith county, who was on his way to DeSoto with his wagon, stopped at the store to get a jug of liquor. He was followed into the house by two Cargills, father and son, between whom and himself an old feud existed. The elder Cargill commenced a quarrel with him, and the younger one struck him on the back of the head with a weight, which caused his death in the course of an hour or two. The Deputy Sheriff, Mr. Bridges, used every effort to arrest the Cargills, but they made their escape. A party started in pursuit of them, but it was thought that they could hardly be overtaken. Williams and the Cargills are reported to have been sober at the time.

Anniversary Events—March 5.

1856—Covent garden theater, London, burnt at the close of a masked ball.

1837—Oliver Elliot died at Mason, N. H., aged 103 He was a soldier of the French war of 1756, and of the revolutionary war.

1829—Battle near the river Natonebi, in Asiatic-Turkey, between the Turks and Russians, in which the former lost 1000 and the latter 200 men.

1627—Pierre Simon Laplace, the French mathematician, died. His principal work, which will render him an object of admiration to posterity, is the Mechanique Celeste.

1811—Battle of Barrosa in Portugal, between the French under Victor, and the English, Spanish and Portugese allied army, under Graham. The French were defeated with the loss of 3000; allied loss 2742.

1798—An Algerine bark arrived at Baltimore, eighty-five days out, manned by Algerines; being the first that ever entered an American port.

1785—Joseph Reed died at Philadelphia, aged 43. He was one of Washington's aids in the revolutionary war, and subsequently an adjutant-general, member of Congress, and Governor of Pennsylvania.

1775—The citizens of New York held a town meeting, in which it is said the question of Congress or no Congress was carried in the affirmative by the aid of hoop-poles obtained from a neighboring cooper's yard.

1770—Boston massacre. This occurrence, which is variously stated, is supposed to have arisen as follows: A crowd surrounded a corporal's guard in the evening, and commenced pelting them with snowballs, which exasperated his majesty's legions to such a pitch of valor, that they turned their muskets upon the citizens. The leaden balls of the soldiers were more than a match for those of the people, and five men fell mortally wounded. Their names were Mattucks, Gray, Caldwell, Maverick and Carr.

1744—At Huddersfield, Yorkshire, a Roman temple was discovered and an altar inscribed to Antonius Modestus of the sixth conquering legion.

1737—The servants called footmen occasioned a riot at Drury Lane theater, London, alleging that they had been shut out of the gallery, to which they were entitled.

1605—Clement VIII (Hippolitus Aldobrandi,) Pope of Rome, died. He was a liberal minded and benevolent pontiff.

1545—Isabella Losh died; a native of Cordova in Spain, so illustrious for her acquirements that she was honored with the degree of D. D.

1534—Antoni Allegri, an illustrious Italian painter died. He is better known as Corregio, from his birth place.

1223—Alonzo II of Portugal died.

493—Odoacer, chief of the Heruli, murdered. It was reserved for him, at the head of a tribe of barbarians almost unknown, to strike the decisive blow that overthrew the great mistress of the world—Imperial Rome.

13 B. C.—Marcus Emilius Lepidus, one of the Roman triumvirs, with Augustus and Anthony, died at Cercili.

EVENTS OF MARCH 6.

1854—The block of marble sent by the Pope as a contribution to Washington's Monument was destroyed by unknown persons at night.

1817—Insurrection at Pernambuco, Brazils, headed by Domingos Jose Martins. The insurgents took possession of the town, and the Governor fled to Rio de Janeiro.

1815—A great riot around the British Parliament house, on account of the Corn bill. A great many lives lost.

1815—Louis XVIII declared Napoleon Bonaparte a traitor and a rebel, for having entered by main force the department of the Var.

1799—The French, under Bonaparte, took Jaffa by assault. The garrison consisted of 1,200 Turkish artillery, and 2,500 Magrubins, or Armnts, who were put to the sword.

1781—Battle of Whitsell's mill, an important pass of Reedy Fort creek, in which the British were worsted.

1762—The supposed ghost that had for so long a time alarmed the people of Cocklane, London, was detected.

1615—The yacht Halve Maan, in which Hudson entered the river which bears his name, was wrecked and destroyed on the Island of Mauritius.

1557—Lord Stourton hung at Salisbury in a halter of silk to mark his dignity. His crime was the murder of two persons whom he had decoyed to his house.

1521—Magellan, in the service of the King of Spain, on his voyage round the world, discovered the Ladrone, or Marian Islands, and may be considered as the first discoverer of that portion of the world called Australia. This opened the way for the subsequent discoveries made in that quarter.

1363—John Hawkwood, an Englishman, died at Florence. He was bred a tailor, but signalized himself so greatly in the wars in Italy that he was promoted to the highest posts; and after his death the Florentines erected a black marble statue as an acknowledgment for the services he had done them.

13, B. C.—Augustus Cæsar assumed the office of high priest, in which capacity he destroyed 2,000 books of prophecy, for want of authority.

KEY WEST CORRESPONDENCE.

KEY WEST, Feb. 26, 1859.

Special to the New Orleans Crescent.]

Messrs. Editors—The brig D. B. Doane, Capt. Gilkey, from Attakapas bound to New York, put into this port on the 22d in distress. She had very bad weather and labored heavily in a high sea, and the 20th, when off Tortugas, sprung her foremast. A part of the cargo was discharged, and the old mast taken out. It will be replaced with a new one. Consigned to A. F. Tift.

The ship Emily Augusta, 43 days from Liverpool for New Orleans, passed the city the 22d. Bark A. T. Sharring, Rogers, from New Orleans for Cadiz, and brig Brownsville, Marsh, from New Orleans for coast of Africa, and steamer Quaker City, passed Key West the 23d.

ORGANIZED DESPERADOES.—A great excitement exists at the present time in Wayne and Holmes counties, Ohio, on account of the discovery of a most desperate organized band of burglars, horse thieves and counterfeiters, reaching from that locality through to Lagrange county, Ind. The citizens have formed a vigilance committee, who have made several arrests, and it is said that a number of persons heretofore considered respectable are connected with this gang. A large quantity of the goods and other things stolen have been recovered on the information given, and the names of the accomplices disclosed.

COL. SANDIDGE.—We sincerely regret to inform the numerous friends of this popular gentleman, that he will not be a candidate for Governor, as some had supposed. If Col. Sandidge would allow his name to go before the Convention, he would prove a formidable competitor to any who might oppose him. He is strong in the affections of the people, and surpassed by none as a man of the most spotless purity and integrity. We are also informed that Col. Sandidge will not suffer his name to be brought before the people for re-election to Congress.

THE PRINCESS DISASTER.—The Vicksburg Whig of Thursday last says:

Among the many incidents related to us of the terrible disaster, we have been told that one of the subordinate engineers, while dying, related to a lady the circumstances of the explosion, and in his dying moments exclaimed, "I told him she would not bear so much steam!"—evidently referring to the foolhardiness of the engineer who was killed, and who determined to run her to New Orleans within a certain time or blow her up.

Another incident worthy of mention was the fact, that a gentleman went into the barber shop a few minutes before the explosion, and the barber told him the boat had on too much steam, and shook too much for him to shave any body.

These incidents prove that the boat, being behind time, and the passengers anxious to reach New Orleans, too much steam was pressed on her, attended with the horrible results already detailed.

THE LEVEES.—The Baton Rouge Gazette of Thursday says:

If there is work to be done on the levees below, now is the time to do it. The attention of our coast friends is respectfully called to the news elsewhere this morning, from Louisville, Cincinnati and places above. The streams are all overflowing full—washing out towns and villages, and rolling a mad and remorseless torrent upon us. Look out below, and calculate upon no relief from the "Board of Swamp Land Commissioners." Should the apportionment bill pass, and the Legislature go to work and pass an hundred bills making appropriations for special work from the swamp fund, they will amount to nothing at all, until some action is had to settle the difficulties, and define the respective duties of the Auditor and Treasurer.

J. WRIGHT & CO.

DR. WRIGHTS' CELEBRATED, REJUVENATING ELIXIR,

Prepared on the strictest Pharmaceutical Principles, by one of the Ablest Chemists of the Age.

NO MINERALS.

Dr. Wright thinks it well to stake his professional character on the fact that no minerals whatever from the least component part of the ingredients in his REJUVENATING ELIXIR—well knowing what ruin has been entailed on the community by opium and mercury.

Generally, to the debilitated, Dr. Wright would say, never despair. No matter how worn down you may be—no matter how weak you are—no matter what the cause may have been—forsake at once whatever has led you to depart from Hygienic principles; take his

REJUVENATING ELIXIR,

and you will soon find yourself a new man, a pride instead of the reverse, to your friends, and a healthy, sound and worthy member of the whole human family.

For sale by the Proprietors,

J. WRIGHT & CO.,

Sole Proprietors,
And by Druggists generally throughout the United States.

HELMBOLD'S EXTRACT BUCHU.

JOY TO THE AFFLICTED.

It cures Nervous and Debilitated Sufferers, and removes all the symptoms, among which will be found—

Indisposition to Exertion, Loss of Power, Loss of Memory, Difficulty of Breathing, General Weakness, Horror of Disease, Weak Nerves, Trembling, Dreadful Horror of Death, Night Sweats, Cold Feet, Wakefulness, Dimness of Vision, Languor, Universal Lassitude of the Muscular System, Often Enormous Appetite, with Dyspeptic Symptoms, Hot Hands, Flushing of the Body, Dryness of the Skin, Pallid Countenance and Eruption on the Face, Pain in the Back, Heaviness of the Eyelids, Frequently Black Spots Flying before the Eyes, with Temporary Suffusion and Loss of Sight, Want of Attention, Great Mobility; Restlessness, With Horror of Society. Nothing is more desirable to such Patients than Solitude, and nothing they more Dread for fear of themselves, no Repose of Manner, no Earnestness, no Speculation, but a Hurried Transition from one question to another.

These symptoms, if allowed to go on—which this medicine invariably removes—soon follows LOSS OF POWER, PATUITY and EPILEPTIC FITS—in one of which the patient may expire. Who can say that these excesses are not frequently followed by those direful diseases—INSANITY AND CONSUMPTION? The records of the INSANE ASYLUMS, and the melancholy deaths by CONSUMPTION, bear ample witness to the truth of these assertions. In Lunatic Asylums the most melancholy exhibition appears. The countenance is actually sodden and quite destitute—neither ruth nor grief ever visits it. Should a sound of the voice occur, it is rarely articulate,

"With woeful measures wan despair
Low sullen sounds his grief beguiled."

Debility is most terrible, and has brought thousands upon thousands to untimely graves, thus blasting the ambition of many noble youths. It can be cured by the use of this

INFALLIBLE REMEDY.

WINER'S CANADIAN VERMIFUGE.

IMPORTANT MEDICAL INFORMATION.

The late Dr. Chapman of Philadelphia has laid it down as a rule, that "worms may be suspected in a child where there is constitution, and especially weakness of the bowels, accompanied by a discharge of slime and mucus," and all medical authorities agree that to work a thorough cure, the stomach and bowles must be invigorated as well as the worms themselves discharged. *Winer's Canadian Vermifuge* fulfils both these conditions. It not only extirpates the vermicules, but strengthens the digestion, increases the solvent power of the gastric juice, and imparts a healthy action to the bowels. Hence its cures are complete and permanent.

THE IDEA OF THE LIVING BODY

Being the receptacle of greedy worms, is sickening; and yet six out of every ten children are more or less afflicted with them. Why should this be the case when there are volumes of testimony to prove that a few doses of Winer's Canadian Vermifuge will eradicate the disease? Parents make a note of this established fact, and remember that the medicine is free from all deleterious substances.

PAINLESS IN ITS OPERATION,

Certain in its results; free from all mineral substances, and invigorating to the system; these are the merits of WINER'S CANADIAN VERMIFUGE, a preparation which eradicates every class of internal worms, with a degree of dispatch that is as agreeable as it is astonishing.

DALLEY'S MAGICAL PAIN EXTRACTOR.

THERE IS NOTHING LIKE IT.

How much pain and suffering—nay, even life itself—may be saved, by having a supply of "Dalley's Magical Pain Extractor" on hand, in case of sudden accidents. In cuts, wounds, burns, scalds, sprains and bruises—casualties to which children are constantly subject—the action of the Pain Extractor is ever the same. Families should never be without it. Full directions accompany each box. The genuine is always signed HENRY DALLEY, manufacturer, upon a steel engraved label.

DALLEY'S MAGICAL PAIN EXTRACTOR

Has now been in use over thirty years; there is hardly a person but what has heard of it, and not a family that has used once, that could be induced to be without a box on hand in case of sudden accident. Where once used it is sure to become a standard remedy, because it has no equal in curing burns, scalds, cuts, wounds and bruises, fever sores, piles, and all other inflammatory and cutaneous diseases, where the parts affected can be reached.

A WORD TO FAMILIES.

When you look around your houses, and you think there is nothing wanting, your children all playful and smiling, and everything foretodes comfort and happiness, suddenly one of the dear young ones falls, and a deep cut is the result of the accident. You now look everywhere for relief and you can't find it—why? Because you have neglected to have on hand a box of "Dalley's Magical Pain Extractor"—this is the whole trouble. Remember and always have it on hand. Instant relief will be at hand.

DALLEY'S MAGICAL PAIN EXTRACTOR

Will subdue the pain and inflammation from the severest burns or scalds, in from one to twenty minutes, heal the wounds without scar, and effectually cure fever sores, piles, salt rheum, inflammatory rheumatism, sore and inflamed eyes, cuts, wounds bruises, old sores, scald head, corns and bunions, sprains, swellings, felons, chilblains, bites of insects, sore nipples or swelled or broken breasts, and all other inflammatory and cutaneous diseases, where the parts affected can be reached.

Sole Agents for the South, and to whom all orders should be addressed.

GREAT DISCOVERY.

Ample tests, both by able practitioners and chemical analysis, have demonstrated the great value of Prof. De Grath's beautiful combination, called

ELECTRIC OIL,

for the relief and cure of pain. But the people themselves are rendering their verdict in a manner both unmistakable and satisfactory. More than twenty thousand bottles have been sold in a very short time—a great proportion to those who heard others recommend it, who had tried it. That it's a splendid discovery is everywhere acknowledged, and nothing like it was ever before prepared.

The only genuine ELECTRIC OIL is Prof. DeGrath's, which is to be had at all the respectable Druggists in this city, and at wholesale and retail, at the proprietor's prices, of the Agent.
