COMPTROLLER--OFFICIAL.

Comptroller's Office, City of New Orleans, March 3, 1860.

[No. 4978.]

Resolved, That the Comptroller be and he is hereby authorized to adjudicate to the lowest bidder, after ten days notice in the official journal, a contract for paving with square blocks Natchez street, from Tchoupitoulas to Magazine street, in accordance with petition of property-owners and specifications of the City Surveyor—the said adjudication to be subject to the approval or rejection of the Common Council.

[Signed] JOHN T. MONROE, President Board of Assistant Aldermen.
[Signed] J. O. NIXON, President Board of Aldermen.
Approved Feb. 13, 1860.
[Signed] GERARD STITH, Mayor.

Notice is hereby given that on FRIDAY, 16th inst., I will adjudicate at my office, at 12 o'clock M., the above contract.
mh3 12t V. DUPLESSIS, Comptroller.

SPECIFICATIONS FOR THE CONTRACT

for paving with square blocks Natchez street, from Tchoupitoulas to Magazine street.

QUALITY AND DIMENSIONS OF THE MATERIALS.—The square block shall be of good hard granite, not in any respect inferior in quality to the granite obtained from Boston. They shall be oblong in shape, not less than ten nor more than sixteen inches in width, and not less than twelve nor more than twenty-four inches long, and not less than nine inches in thickness. They shall be well quarried, having parallel or square sides and ends, so as to make tight joints, and the tops shall be dressed square, flat and free from lumps. The square blocks adjoining the gutter stones shall be cut at an angle of forty-five degrees with the sides, so as to be laid diagonally from the curbstones bordering the sidewalks.

The gutter stones shall be of good hard granite, obtained from Boston. They shall be from twenty to thirty six inches long, twelve inches wide, and not less than eight inches thick. They shall be well quarried, having parallel or square sides and ends, so as to make tight joints, and the tops shall be perfectly well hewed and dressed, otherwise they shall be rejected.

The curbstones shall be of North river blue stones, perfectly well hewed and dressed, bevel dressed on the top to answer the slope of the sides, from three to six feet long, from eighteen to thirty inches wide, and in no case less than four inches in thickness.

The crossing stones shall be of North river blue stones of the best quality, perfectly well hewed and dressed, not less than four feet long, two feet wide, and not less than six inches thick, with the ends cut at an angle of forty-five degrees with the sides, so that the joints will be on a diagonal with the street.

The flagstones for the sidewalks shall be of North river blue stones of the best quality, rubbed or tooled on the surface, or half dressed to a smooth surface, and having rubbed joints. No flagstone shall measure less than three feet square by two and a half inches thick.

The gravel shall be the best London gravel, not over one and a half inch in diameter.

The sand shall be clean, sharp sand, of large grain.

MANNER IN WHICH THE WORK SHALL BE EXECUTED.—The old curbstones shall be taken up by the contractor and relaid, if found good by the City Surveyor, and if not, new curbstones shall be substituted in their stead. The new and old curbstones shall be set according to the lines and grades to be given by the Surveyor, in good joints and in a workmanlike manner. They shall be duly interspersed in lengths of from three to six feet throughout the work, and each curbstone shall have a slope of three inches for every foot of its hight towards the adjoining sidewalk, and shall also be solidly fixed and backed in the most approved manner. Apertures for draining lots shall be nicely cut through the same by the contractor whenever required by the Surveyor.

The crossing stones shall be laid according to the lines and grades to be given by the Surveyor, in good joints and in the best workmanlike manner, on a bed of London gravel and sharp sand mixed, of at least six inches in thickness, said bed to be well rammed and hardened with the head of the crowbar.

The gutter stones shall join in their length the curbstones, and shall be laid with a slope of one inch towards the same, on a bottoming of four inches of London gravel and sharp sand mixed; said bottoming to be strongly hardened with the head of the crowbar until solid. The stones shall be well jointed, the joints not to be over half an inch wide, otherwise they shall be rejected, and to be filled up with fine gravel and sharp sand mixed.

The contractor shall take up the old round stone paving, and, after the same shall be hauled away by him, shall pick and grade the surface of the street in accordance with the grades to be given by the Surveyor, to a depth of fourteen inches below the superior face of the square blocks when laid. The contractor shall dress the road-bed of the street to the curve to be given by the Surveyor, and shall place on the top of the same a soiling of not less than four inches of London gravel and sharp sand mixed, and shall thoroughly roll the same with a 6000 pound roller until it forms an even and hard foundation. The square block paving shall then be laid. In laying the paving, the contractor shall lay the blocks diagonally, or at an angle of forty-five degrees with the street line, breaking joints with every tier, carefully bedding the blocks and hardening the materials under the same, in order that each block may rest on a solid foundation. He shall use all care to lay the blocks so they touch and make close joints, as all joints over half an inch in width shall most positively be rejected by the Surveyor. When the blocks are laid the joints shall be accurately filled with fine gravel and sharp sand mixed, and the paving shall be conveniently rolled with a 6000 pound roller. After the rain has settled the gravel completely into the joints, a covering of three inches of fine gravel and sharp sand mixed shall be placed upon the paving, and the same shall be opened for travel.

The old bricking of the sidewalks shall be taken up and hauled away by the contractor; the sidewalks shall be filled by the contractor; the said filling shall be well rammed, and the flagging shall then be laid. The flags shall be laid and well bedded in cement, and close jointed in the same manner, and shall be laid in regular courses. The flagging shall, when completed, present an even surface, free of all ragged or hollow places, and capable of supporting a straight edge; otherwise it shall be rejected.

The old flagging of the sidewalks shall be taken up by the contractor whenever ordered so to do by the City Surveyor; the sidewalks shall be filled so as to correspond with the new grades to be given by the City Surveyor, and the flagging shall be relaid in the best workmanlike manner, and to the entire satisfaction of the City Surveyor.

All new flags which may be required to replace the old broken and missing flags, shall be furnished by the contractor without extra compensation.

The gutters for draining across the sidewalks shall be of the best cast iron, similar to the pattern in the Surveyor's office, and shall run through the whole width of the sidewalks.

GENERAL CLAUSES.—The whole work shall be executed to the entire satisfaction of the City Surveyor, who, in conformity with the petition, will be the sole judge of the quality of the work.

The old curbstones, the old gutter stones, and the old round stone paving, the old flagging, and the earth picked from the street, shall be the property of the contractor, and shall be removed and hauled away by him.

All the materials required for the performance of the work shall be of the best quality, and shall be furnished by the contractor, as well as the labor.

The contractor shall be bound to begin the work in the two months following the approval of the adjudication by the Common Council, and to complete the same four months after, under a penalty of ten dollars per day for each and every day thereafter the same is not completed.

Good and solvent security to an amount of $2000 shall be required to guarantee the faithful performance of the contract.

Payments to be made on the completion of the work and acceptance of the same by the City Surveyor, as follows, to-wit: the proportion to be paid by the city of New Orleans in cash, and the proportion to be paid by the property-holders in bills against said property-holders, to be made by the City Surveyor, in conformity with section 120 of the new City Charter; said bills to be collected by the contractor, who shall be subrogated to all the rights of the city to sue and seize the property in case of non-payment of any or all of said bills, and the city of New Orleans not to be held liable or responsible for any of said bills should the same not be paid by the property-holders.

The contractor shall pay into the City Treasury, prior to receiving his certificates, the cost of publication of the petitions of the property-holders; it being well understood that said contractor shall have the right of demanding of said petitioners the reimbursement of said costs of publication.

It is well understood that in case of failure by the contractor to begin or finish the work or any part thereof within the period fixed, or in case the Council be dissatisfied with the manner in which the work is being executed, the Council shall have the right to annul the contract without putting the contractor in default, as required by article 1905 of the Civil Code, and without applying to a court of justice to annul the same and without indemnity; and it is also well understood that in case the contractor shall at any time abandon the work or not finish and complete the same in conformity with his contract, the said contractor shall forfeit all claims he may have for any part of the work done by him up to the date of the abandonment, and that the city shall be thereby discharged from any and all liability therefor; and it is also well understood that in case the contract be resold, the contractor and his securities shall be held and bound, in solido, to pay unto the city all loss or difference between the price at which the contractor originally contracted to perform the work and the price at which it may be adjudicated at a resale or re-adjudication.

Bids to be per superficial yard of square block paving furnished and laid complete, including the gutter stones; per superficial foot of curbstones furnished and laid; per running foot of curbstones taken up and relaid; per superficial foot of crossing stones furnished and laid; per running foot of flagging of the sidewalks taken up and relaid, including the new materials which may be necessary, and the iron gutters for draining lots; per running foot of new flagging of the sidewalks furnished and laid complete, including the iron gutters for draining lots.

Notice is hereby given that on FRIDAY, 9th of March, I will adjudicate at my office, at 12 o'clock M., the above contract.
fe25 12t V. DUPLESSIS, Comptroller.

SPECIFICATION FOR THE CONTRACTS

for lighting with oil all the oil lamps of the city.

The lighting shall be adjudicated into four separate contracts, as follows, viz:

First contract—All the oil lamps in the First District.
Second contract—All the oil lamps in the Second District.
Third contract—All the oil lamps in the Third District.
Fourth contract—All the oil lamps in the Fourth District.

Each of the above mentioned contracts shall be adjudicated for a term of three years, to date from the signing of said contracts.

The lamps shall be delivered to the contractors in whatever condition they may be found in on the day of their delivery by the Street Commissioner, and the contractors shall be bound within forty days after, to have the same repaired and placed in good order and condition, and also to make such changes and alterations to the same as will afford a sufficient quantity and quality of light, and also during the continuance of their contracts, should any of the lamps require repairs, to have the same taken down and put in good repair and condition; the whole at their own expense.

The said contractors shall further be bound at the expiration of their contracts, to return to the city all the oil lamps in perfect good order and condition, in which they were received by them, to the satisfaction of the Street Commissioner, failing in which on the part of any of said contractors, said Street Commissioner shall have the right to cause the necessary repairs to be made, and the cost thereof deducted from the last monthly payment, and the reserved per centage hereinafter provided for.

The contractors shall, during the whole term of their contracts, regularly and faithfully light and keep burning, or cause to be lighted and keep burning, during the usual time, according to the moon, (i. e. whilst there is neither day nor moon light) all the oil lamps now existing or which may hereafter be put up, excepting those where gas may be substituted; and they shall employ for said lighting the best quality of sperm oil during such times as, by reason of cold weather, lard oil is liable to be congealed, or sperm or lard oil, at his option, during warm weather; they shall also use round cylinder-shaped wicks, the three fourths of which shall be lighted; they shall also furnish all ropes, blocks and other fixtures required for the suspended lamps, and they shall keep in good repair and return to the city in good condition, all the ladders and other fixtures used in lighting which belong to the city.

In cases of bad weather and dark nights, the contractors shall be bound to light and keep lighted during said darkness all the oil lamps included in their several contracts.

All the market lamps and such lamps on the public squares as may be designated by the Street Commissioner, shall be lighted every night, from one half hour after sunset until one half hour before sunrise, and these lamps shall be counted at double rates of ordinary street lamps.

There shall be deducted from each monthly certificate, fifty cents for each and every lamp reported by any city and police officer or citizen, who shall make the report in their own names, as not burning or giving sufficient light during or within the hours or time above specified, unless caused by some unavoidable occurrence. It is well understood, however, that this deduction is predicated only upon the report made at the Street Commissioner's office, and police stations of the District in which the lamps are reported.

Security to an amount of $4000 shall be required from each of the contractors, to guarantee the faithful performance of their contracts.

Payments will be made monthly on the Street Commissioner's certificate, the city reserving five per cent. from each monthly payment until the expiration of the contract.

The notarial acts by all parties shall be signed in the ten days following the approval of the adjudications by the Common Council, otherwise said adjudications shall be, ipso facto, null and void.

Upon the adjudications being made by the Comptroller, each of the contractors shall deposit into the hands of said Comptroller, the sum of $500, as security for the signing of the contracts, and should any of the contractors refuse or neglect to sign the contract with his security, or his security refuse to sign the same, said sum of $500 shall be forfeited in favor of the city; otherwise, said sum shall be returned to the contractor, immediately upon the perfection of the contract.

It is well understood that in case of failure by the contractors to begin or finish the work or any part thereof within the period fixed, or in case the Council be dissatisfied with the manner in which the work is being executed, the Council shall have the right to annul the contract without putting the contractors in default, as required by article 1905 of the Civil Code, and without applying to a court of justice to annul the same and without indemnity; and it is also well understood that in case the contractors shall at any time abandon the work or not finish and complete the same in conformity with their contracts, the said contractors shall forfeit all claims they may have for any part of the work done by them up to the date of the abandonment, and that the city shall be thereby discharged from any and all liability therefor; and it is also well understood that in case the contracts be resold, the contractors and their securities shall be held and bound, in solido, to pay unto the city all loss or difference between the price at which the contractors originally contracted to perform the work and the prices at which they may be adjudicated at a resale or re-adjudication.

Bids to be per lamp per annum, for the whole work included in each and every contract complete.

New Orleans, Feb. 18, 1860.
Signed, LOUIS H. PILIÉ, City Surveyor.
Approved by the Committees on Streets and Landings of both Boards of the Common Council.
Signed, H. T. VENNARD, ROBT. HUYGHE, } Chairmen.
Registered February 24th, 1860.
fe25 12t HENRY DUREL, for Comptroller.

SPECIFICATIONS FOR THE CONTRACT

for ditching and grading Gentilly road from the Pontchartrain Railroad to Michaud's plantation.

Ditches three feet wide at the top, eighteen inches wide at the bottom, and two feet deep, shall be dug on both sides of said Gentilly road from the Pontchartrain Railroad to Michaud's plantation, in accordance with the lines to be given by the City Surveyor. The sides and bottom of said ditches shall be cut in straight line, and well even and smoothed off.

The roadway between the ditches shall be twenty-four feet in width, and shall be graded in accordance with the grades and rounding to be given by the City Surveyor, the contractor filling the same where too low, and picking and removing the earth where too high. All stumps, roots, etc., etc., which may be found on said roadway shall be removed by the contractor at a depth of one foot below the surface of said roadway when graded and completed; and said surface of the road when completed shall be well even and uniform, otherwise it shall be rejected.

The whole work shall be executed to the entire satisfaction of the City Surveyor.

All work or labor required to perform the work shall be furnished by the contractor.

The contractor shall be bound to commence the work in the ten days following the approval of the adjudication by the Common Council, and to complete the same ninety days after, under a penalty of ten dollars per day for each and every day thereafter the same is not completed.

Security to an amount of $500 shall be required to guarantee the faithful performance of the contract.

Payments to be made in cash on the completion of each and every twenty acres of the work and acceptance of the same by the City Surveyor, the Treasurer retaining in guarantee ten per cent. of the amount of each settlement, until the completion of the whole work.

It is well understood that in case of failure by the contractor to begin or finish the work, or any part thereof, within the period fixed, or in case the Council be dissatisfied with the manner in which the work is being executed, the Council shall have the right to annul the contract without putting the contractor in default, as required by article 1905 of the Civil Code, and without applying to a court of justice to annul the same, and without indemnity; and it is also well understood that in case the contractor shall at any time abandon the work, or not finish and complete the same in conformity with his contract, the contractor shall forfeit all claims he may have for any part of the work done by him up to the date of the abandonment, and that the city shall be thereby discharged from any and all liability therefor; and it is also well understood that in case the contract be resold, the contractor and his securities shall be held and bound in solido to pay unto the city all loss or difference between the price at which the contractor originally contracted to perform the work, and the price at which it may be adjudicated at a resale or readjudication.

Bids to be per running acre of 208 feet for the whole work complete, ditches and roadway included.

New Orleans, January 28, 1860.
Signed, LOUIS H. PILIÉ, City Surveyor.
Approved by the Committees on Streets and Landings of both Boards of the Common Council.
Signed, H. T. VENNARD, Signed, ROBT. HUYGHE, } Chairmen.
Registered February 24th, 1860.
fe25 12t HENRY DUREL, for Comptroller.

SPECIFICATIONS FOR THE CONTRACT

for paving with square blocks Tchoupitoulas street, from Nuns to Josephine street.

QUALITY AND DIMENSIONS OF THE MATERIALS.—The square block shall be of good hard granite, not in any respect inferior in quality to the granite obtained from Boston. They shall be oblong in shape, not less than twelve nor more than sixteen inches in width, and not less than twelve nor more than twenty inches long, and not less than nine inches in thickness. They shall be well quarried, having parallel or square sides and ends, so as to make tight joints, and the tops shall be dressed square, flat and free from lumps. The square blocks adjoining the gutter stones shall be cut at an angle of forty-five degrees with the sides, so as to be laid diagonally from the curbstones bordering the sidewalks.

The gutter-stones shall be of good hard granite, obtained from Boston. They shall be from twenty to thirty inches long, twelve inches wide, and not less than eight inches thick. They shall be well quarried, having parallel or square sides and ends, so as to make tight joints, and the tops shall be perfectly well hewed and dressed, otherwise they shall be rejected.

The curbstones shall be of North river blue stones, perfectly well hewed and dressed, bevel dressed on the top to answer the slope of the sides, from three to six feet long, from eighteen to thirty inches wide, and in no case less than four inches in thickness.

The crossing stones shall be of North river blue stones of the best quality, perfectly well hued and dressed, not less than four feet long, two feet wide, and not less than six inches thick, with the ends cut at an angle of forty-five degrees with the sides, so that the joints will be on a diagonal with the street.

The flagstones for the sidewalks shall be of North river blue stones of the best quality, rubbed or tooled on the surface, or half dressed to a smooth surface, and having rubbed joints. No flagstone shall measure less than three feet square by two and a half inches thick.

The bricks which may be required for the sidewalks shall be lake bricks of the best quality.

The gravel shall be the best London gravel, not over one and a half inch in diameter.

The sand shall be clear, sharp sand, of large grain.

The plates for the tops of the bridges at the intersections of the street shall be of the best cast iron, (tough) similar in pattern, length and thickness to those now on Camp street, and two feet wide in the clear.

MANNER IN WHICH THE WORK SHALL BE EXECUTED.—The old curbstones shall be taken up by the contractor, and relaid, if found good by the City Surveyor, and if not, new curbstones shall be substituted in their stead. The new and old curbstones shall be set according to the lines and grades to be given by the Surveyor, in good joints and in a workmanlike manner. They shall be duly interspersed in lengths of from three to six feet throughout the work, and each curbstone shall have a slope of three inches for every foot of its hight towards the adjoining sidewalk, and shall also be solidly fixed and backed in the most approved manner. Apertures for draining lots shall be nicely cut through the same by the contractor whenever required by the Surveyor.

The crossing-stones shall be laid according to the lines and grades to be given by the Surveyor, in good joints and in the best workmanlike manner, on a bed of London gravel and sharp

COMPTROLLER--OFFICIAL.

sand mixed, of at least six inches in thickness, said bed to be well rammed and hardened with the head of the crowbar.

The sides, bottoms and wings of the bridges shall be of curbstones, and shall be laid in good joints and in the best workmanlike manner, in accordance with the directions to be given by the City Surveyor. The cast iron plates for the top of the bridges shall rest upon the sides, and shall be all joined.

The gutterstones shall join in their length the curbstones, and shall be laid with an inclination or slope towards the same of one inch, on a bottoming of four inches of London gravel and sharp sand mixed; said bottoming to be strongly hardened with the head of the crowbar until solid. The stones shall be well jointed, the joints not to be over half an inch wide, otherwise they shall be rejected, and to be filled up with fine gravel and sharp sand mixed.

The contractor shall take up the roundstone paving, and, after the same shall be hauled away by him, shall pick and grade the surface of the street in accordance with the grades to be given by the Surveyor, to a depth of fourteen inches below the superior face of the square blocks when laid. The contractor shall dress the road-bed of the street to the curve to be given by the Surveyor, and shall place on the top of the same a soiling of not less than four inches of London gravel and sharp sand mixed, and shall thoroughly roll the same with a 3000 pound roller until it forms an even and hard foundation. The square block paving shall then be laid. In laying the paving, the contractor shall lay the blocks diagonally, or at an angle of forty-five degrees with the street line, breaking joints with every tier, carefully bedding the blocks and hardening the materials under the same, in order that each block may rest on a solid foundation. He shall use all care to lay the blocks so they touch and make close joints, as all joints over half an inch in width shall most positively be rejected by the Surveyor. When the blocks are laid, the joints shall be accurately filled with fine gravel and sharp sand mixed, and the paving shall be conveniently rolled with a 6000 pound roller. After the rain has settled the gravel completely into the joints, a covering of three inches of fine gravel and sharp sand mixed shall be placed upon the paving, and the same shall be opened for travel.

The bricking or flagging of the sidewalks shall be taken up wherever ordered by the Surveyor, the sidewalks shall be filled and the bricking and flagging relaid to correspond with the new grades, in the best workmanlike manner and to the entire satisfaction of the City Surveyor. The contractor shall furnish all new flags and bricks which may be required to replace the old broken flags and bricks.

The gutters for draining across the sidewalks shall be of the best cast iron, similar to the pattern in the Surveyor's office, and shall run through the whole width of the sidewalks.

GENERAL CLAUSES.—The whole work shall be executed to the entire satisfaction of the City Surveyor, who will be the sole judge of the quality of the work.

The old curbstones, the old gutter stones, the old round stone supports; and the earth picked from the streets, shall be the property of the contractor, and shall be removed and hauled away by him.

All the materials shall be of the best quality, and shall be furnished by the contractor, as well as the labor.

The contractor shall be bound to begin the work in the four months following the approval of the adjudication by the Common Council, and to complete the same one year after, under a penalty of ten dollars per day for each and every day thereafter the same is not completed.

Good and solvent security in the sum of $5000 shall be required to guarantee the faithful performance of the contract.

Payments to be made on the completion of the work of each and every square and acceptance of the same by the City Surveyor, as follows, to-wit: the proportion to be paid by the property-holders in bills against said property-holders to be made by the City Surveyor in conformity with section 120 of the new City Charter, said bills to be collected by the contractor, who shall be subrogated to all the rights of the city to sue and seize the property in case of non-payment of any or all of said bills, and the city of New Orleans not to be held liable or responsible for any of said bills should the same not be paid. The proportion to be paid by the city in cash, the Treasurer retaining in guarantee ten per cent. of each settlement until the completion of the whole work.

The contractor shall pay into the City Treasury, prior to receiving his certificates, the cost of publication of the petitions of the property-holders, it being well understood that said contractor shall have the right of demanding of said petitioners the reimbursement of said cost of publication.

It is well understood that in case of failure by the contractor to begin or finish the work, or any part thereof, within the period fixed, or in case the Council be dissatisfied with the manner in which the work is being executed, the Council shall have the right to annul the contract without putting the contractor in default, as required by article 1905 of the Civil Code, and without applying to a court of justice to annul the same, and without indemnity; and it is also well understood, that in case the contractor shall at any time abandon the work, or not finish and complete the same in conformity with his contract, the said contractor shall forfeit all claims he may have for any part of the work done by him up to the date of the abandonment, and the city shall be thereby discharged from any and all liability therefor; and it is also well understood, that in case the contract be resold, the contractor and his securities shall be held and bound in solido to pay unto the city all loss or difference between the price at which the contractor originally contracted to perform the work and the price at which it may be adjudicated at a resale or re-adjudication.

Bids to be per superficial yard of square block paving furnished and laid complete, including the gutter-stones; per superficial foot of new curbstones, furnished and laid; per superficial foot of old curb-stones, taken up and relaid; per superficial foot of crossing-stones, furnished and laid; per running foot of bricking and flagging of the sidewalks taken up and relaid, including the new materials which may be necessary, the iron gutters for draining lots and the relaying of the old curbstones, and per iron bridge top furnished and laid complete.

New Orleans, 13th February, 1860.
Signed, LOUIS H. PILIÉ, City Surveyor.
Approved by the Committees on Streets and Landings of both Boards of the Common Council.

Registered February 24th, 1860.
fe25 12t HENRY DUREL, for Comptroller

SPECIFICATIONS for the contract for attending to and keeping in repair the bridge across the Bayou St. John at Telemachus street.

The bridge shall be delivered to the contractor in whatever condition it may be found on the day of delivery by the city, and it shall be the duty of the contractor, within thirty days after, to place said bridge in complete good order and condition, by removing all worn-out, decayed and rotten lumber, and substituting in its stead lumber of the same dimensions and of the best quality; in taking out and removing all parts of the machinery which may be worn out or broken and substituting in their places new machinery of proper dimensions and quality; in furnishing and replacing all parts of the machinery which may be missing; and in giving to the whole wood and iron work of said bridge, usually painted, three good coats of best paint in oil of such suitable colors as the Street Commissioner may select.

The contractor shall bind himself, during the continuance of his contract, to keep the bridge constantly in good repair and condition, and at the expiration of said contract to return the same to the city in complete good order and condition.

The contractor shall bind himself to keep constantly in attendance during day and night the requisite number of hands to open and shut said bridge as often as may be necessary, and he shall furnish all oil, etc., which may be required to keep said bridge in good working order.

All damage which may occur to said bridge through the negligence or incapacity of the contractor, shall be repaired and paid for by him.

The contractor shall be fined in the sum of ten dollars for each and every neglect of duty, said fine to be retained by the Comptroller out of any of the monthly payments to be made to said contractor.

Security to an amount of $1000 shall be required to guarantee the faithful performance of the contract.

Payments to be made monthly on the certificates of the Street Commissioner.

It is well understood, that in case of failure by the contractor to begin or finish the work, or any part thereof, within the period fixed, or in case the Council be dissatisfied with the manner in which the work is being executed, the Council shall have the right to annul the contract without putting the contractor in default, as required by article 1905 of the Civil Code, and without applying to a court of justice to annul the same, and without indemnity; and it is also well understood, that in case the contractor shall at any time abandon the work, or not finish and complete the same in conformity with his contract, the said contractor shall forfeit all claims he may have for any part of the work up to the date of the abandonment, and the city shall be thereby discharged from any and all liability therefor; and it is also well understood, that in case the contract be resold, the contractor and his securities shall be held and bound in solido to pay unto the city all loss or difference between the price at which the contractor originally contracted to perform the work and the price at which it may be adjudicated at a resale or re-adjudication.

The contract to be adjudicated for one year, to date from the day of the delivery of said bridge to the contractor.

Bids to be for the whole work complete.

MISCELLANEOUS.

SPALDING'S PREPARED GLUE!
SPALDING'S PREPARED GLUE!
SPALDING'S PREPARED GLUE!

Save the Pieces!

ECONOMY! DISPATCH!

"A Stitch in Time Saves Nine."

As accidents will happen, even in well-regulated families, it is very desirable to have some cheap and convenient way for repairing Furniture, Toys, Crockery, etc.

Spalding's Prepared Glue

Meets all such emergencies, and no household can afford to be without it. It is always ready and up to the sticking point. There is no longer a necessity for limping chairs, splintered veneers, headless dolls, and broken cradles. It is just the article for cone, shell, and other ornamental work, so popular with ladies of refinement and taste.

This admirable preparation is used cold, being chemically held in solution, and possessing all the valuable qualities of the best cabinet-maker's glue. It may be used in the place of ordinary mucilage, being vastly more adhesive.

"USEFUL IN EVERY HOUSE."

N. B.—A Brush accompanies each bottle. Price, 25 cents.

Wholesale Depot, No. 48 Cedar street, New York.
Address HENRY C. SPALDING & CO., Box No. 3,600, New York.

Put up for Dealers in Cases containing four, eight, and twelve dozen—a beautiful Lithograph Show-Card accompanying each package.

A single bottle of SPALDING'S PREPARED GLUE will save ten times its cost annually to every household.

Sold by all prominent Stationers, Druggists, Hardware and Furniture Dealers, Grocers, and Fancy Stores.

Country merchants should make a note of SPALDING'S PREPARED GLUE, when making up their list. It will stand any climate.

CHEAP FUEL—WHILE THE PRESENT building is going forward at the Station, the price of COKE will be continued at the very low price of THIRTY-FIVE CENTS per barrel.

It is a clean and pleasant fuel for house use, and superior to either wood or coal for cooking.

At this price it is full 25 per cent. cheaper than the best coal.
N. J. TISDALE, Treasurer,
New Orleans Gas Light Company Oct. 10, 1859. o11 tf

IT IS NOT TOO MUCH TO SAY, SINCE —ALL— OLD AND YOUNG, Affirm its Truth,

—Viz: That—

PROFESSOR WOOD'S HAIR RESTORATIVE

Will preserve infallibly the growth and color of the hair, if used two or three times a week, to any imaginable age. Perfectly restore the gray, cover the bald with nature's own ornament, the hair; make it more soft and beautiful than any oil, and preserve the scalp free from all disease to the greatest age. Statesmen, Judges, Attorneys, Doctors, Clergymen, Professional men and gentlemen and ladies of all classes, all over the world, bear testimony that we do not say too much in its favor. Read the following and judge:

HICKORY GROVE, St. Charles Co., Mo., Nov. 19, 1857.

O. J. Wood—Dear Sir: Some time last summer we were induced to use some of your Hair Restorative, and its effects were so wonderful, we feel it our duty to you and the afflicted, to report it.

Our little son's head for some time had been perfectly covered with sores, and some called it scald head. The hair almost entirely came off in consequence, when a friend, seeing his sufferings, advised us to use your Restorative; we did so with little hopes of success, but to our surprise, and that of all our friends, a very few applications removed the disease entirely, and a new and luxuriant crop of hair soon started out, and we can now say that our boy has as healthy a scalp, and as luxuriant a crop of hair as any other child. We can, therefore, and do hereby, recommend your Restorative, as a perfect remedy for all diseases of the scalp and hair. We are yours, respectfully,

GEO. W. HIGGINBOTHAM,
SARAH A. HIGGINBOTHAM.

Prof. Wood—Dear Sir: My hair had, for several years, been becoming prematurely gray, accompanied by a harshness which rendered the constant application of oil necessary in dressing it. When I commenced using your Hair Restorative about two months ago it was in that condition; and having continued its use till within the last three weeks, it has turned to its natural color, and assumed a softness and lustre greatly to be preferred to those produced by the application of oils or any other preparation I have ever used. I regard it as an indispensable article for every lady's toilet, whether to be used as a Hair Restorative or for the simple purpose of dressing or beautifying the hair. You have permission to refer to me all who entertain any doubt of its performing all that is claimed for it.

MRS. C. SYMONDS,
Cincinnati, O., Feb. 10, 1857. 114 Third street.

WELLINGTON, Mo., Dec. 5, 1857.

Prof. Wood—Dear Sir: By the advice of a friend of mine, who had been using your Hair Restorative, I was induced to try it. I had the fever, some time last May, and nearly every hair in my head came off. Now my hair has come in a great deal thicker than it ever was. Nothing but a duty and sympathy that I feel to communicate to others who are afflicted as I have been, would induce me to give this public acknowledgment of the benefit I have received from Prof. Wood's Hair Restorative.

Yours respectfully, A. R. JACOBS.

The Restorative is put up in bottles of three sizes, viz: large, medium and small; the small holds one-half a pint and retails for one dollar per bottle; the medium holds at least twenty per cent. more in proportion than the small, retails for two dollars per bottle; the large holds a quart, 40 per cent. more in proportion, and retails for $3 a bottle.

O. J. WOOD & CO., Proprietors, 312 Broadway, New York, (in the great N. Y. Wire Railing Establishment,) and 114 Market street, St. Louis, Mo.

And sold by all good Druggists and Fancy Goods Dealers.

CHARLES HEIDSIECK CHAMPAGNE—

This celebrated Wine, of the above well-known brand, has been, and will continue to be, received by the undersigned in quantities to meet the increased demand of dealers and consumers. Thoroughly satisfied, from the strongest evidence, that it comes from the closest lineal descendant of the old and first established house of Heidsieck & Co., of Rheims, they have taken hold of it with a determination to bring it and its claims to distinction, before the public, even more generally than heretofore. The superior quality of this article must satisfy any one that its emanation is from a source where great attention, as well as thorough experience, have been brought to bear in its production. Charles Heidsieck has given his whole mind to the perfection of his wine, and to making it worthy of the name. Frequent visits to the United States have enabled him more fully to understand and appreciate the tastes and wishes of consumers; and of his having profited by that information is evidenced by the Champagne now presented for the palate of the connoisseur—a wine unsurpassed for its rich bouquet and general excellence. The varieties of brands of Champagne tend greatly, no doubt, to confuse the purchaser, but the lovers of good and genuine wine must look for "Charles Heidsieck" in full on the label, as well as on the corks and capsules.

T. W. BAYAUD & CO., General Agents for North America, New York.

The Charles Heidsieck can be obtained in quantities at the under mentioned houses, besides many others not here named, and at retail with all the principal hotel-keepers.

SUGAR HOGSHEADS, RICE, MOLASSES, ROSIN AND TURPENTINE STAVES, AND SHINGLES.

The principle embraced in this Machine is the old process of splitting and dressing by hand labor. Working directly with the grain of the timber, it produces an article not liable to warp or check from exposure. The Stave Mill will rive shave and joint, from the bolt, from 7000 to 10,000 Staves per day, and the Shingle Machine from 10,000 to 15,000 Shingles. It requires two horse power to work it, and can be attached to any team engine, gin or saw mill power. It can make any required length, and can be adjusted to any thickness or taper. The timber is neither steamed nor sawed, but riven and shaved directly from the bolt.

Both Machines can be seen in full operation, between the hours of 10 and 2 o'clock, every day, at No. 1 Canal street. These Machines are made in Augusta, Ga.

Any party wishing to purchase Parish, State, County and single rights, or Machines, can obtain them from the Agent, who will give full particulars. F. W. C. COOK.

Sole Agent for the States of Louisiana, Arkansas, Mississippi, Texas and Alabama. ja31 6m

SOUTHERN WOOD AND MACHINE WORKS.—

SMITH & HOW.

115.........................AND.........................116

New Levee street.

All orders for GUMMING executed with dispatch. PRICES MODERATE.

Being both practical and experienced Mechanics ourselves, we employ none but A No. 1 men. This, with the aid of Machinery, enables us to defy superiority. ja31 6m

TO SUGAR PLANTERS—

Sugar Planters visiting the city are invited to call and examine the model of Wade H. Gilbert & H. O. Ames' IMPROVED PROCESS FOR TREATING CANE JUICE IN MANUFACTURING SUGAR, with the use of the Improved Connected Steam Train.

The cane-juice treated by this process being free from the imperfect defecation caused by the "too high" liming of the juice in the grande of the old kettle train, and the imperfect clarification and cleaning of the juice in the isolated evaporators of the ordinary open steam train, results in the finest quality of Brown Sugar that can be made.

The working of the CONNECTED STEAM TRAIN is one of extreme simplicity, and always under the complete control of the sugar-maker. With this Train it is unnecessary to use Bone Black, and Clarifiers may be altogether dispensed with, together with all such cumbrous appliances as Vacuum Pans, Centrifugals, Tanks, Steam Pumps, etc.

Also, AMES' STEAM PANS for making Sugar. They are the best in use.

By permission, the following Planters, who have them in use can be referred to:

Dr. JOS. MARTIN, Valence Plantation, Assumption.
Mr. JAS. H. RIGGIN, Magnolia, St. James.
Mr. VALERY LANDRY, Ascension.
Hon. MILES TAYLOR, Assumption.
Mr. P. C. RICARD, Iberville.
Dr. J. MARTIN, Voison Plantation, Assumption.
Mr. JULIEN TOURNILLON, Ascension.

H. O. AMES,
No. 109 Poydras street, near St. Charles,

JACOBS' ART GALLERY, 93 CAMP STREET, New Orleans—E. Jacobs at his old post again.

The subscriber respectfully informs the numerous patrons of this celebrated Daguerreotype, Ambrotype and Photograph Gallery, established in 1842, that he has secured, for a term of years the services of Mr. E. JACOBS, the original proprietor, who has just returned from Europe with all the late improvements in the art. Patrons may therefore rely on being furnished with portraits of the finest finish.

Miniatures of all sizes in oil colors, on ivory or other material, so as to suit the taste and price of all, will be taken in unsurpassable style. Photographs from life or from other pictures, of public or private buildings, or of machinery, will be taken of any size required, either plain or painted.

The best artists in the United States are employed, and all work done will be guaranteed to give satisfaction.

Instruction given in the art.

The Gallery is elegantly fitted up with an extensive collection of works of art and vertu, and ladies and gentlemen are respectfully invited to visit it.

Prices moderate. Terms cash on delivery.

THE LOUISVILLE JOURNAL—THIS NEWSpaper, now in its thirtieth year, has attained a celebrity and circulation surpassed by few papers out of the city of New York. As a Daily Journal, the proprietors will spare no expense to make it of the first class. The net-work of Telegraph all over the Union enables them to report all events of public interest almost simultaneous with their occurrence; while the increased facilities of Railroad communication offer new channels for the prompt delivery of the Journal to subscribers in the very shortest period after publication.

The Agricultural Department of the Journal is made one of special attention and interest. The articles under this head are prepared by a Practical Farmer, and have commanded the approval of some of the best agriculturists of this and other States.

The terms of subscription are as follows, per year:

Large Daily, sent by mail	$8 00
Country Daily and Tri-Weekly	5 00
Weekly (in clubs of ten)	1 50
Weekly, single	2 00

Remittances by mail, in registered letters, at our risk.

All communications addressed to
PRENTICE, HENDERSON & OSBORNE, Louisville, Ky.

BROWN'S BRONCHIAL TROCHES—

COUGH

The great and sudden changes of our climate, are fruitful sources of PULMONARY AND BRONCHIAL AFFECTIONS. Experience having proved that simple remedies often act speedily and certainly when taken in the early stage of disease, recourse should at once be had to "BROWN'S BRONCHIAL TROCHES," or Lozenges, let the Cold, Cough or Irritation of the Throat be ever so slight, as by this precaution a more serious attack may be effectually warded off.

Brown's	"That trouble in my Throat, (for which the TROCHES is a specific) having made me often a mere whisperer." N. P. WILLIS.	Troches.
Brown's	"I recommend their use to PUBLIC SPEAKERS." REV. E. H. CHAPIN.	Troches.
Brown's	"Great service in subduing Hoarseness." REV. DANIEL WISE.	Troches.
Brown's	"Almost instant relief in the distressing labor of breathing peculiar to ASTHMA." REV. A. C. EGGLESTON.	Troches.
Brown's	"Contain no Opium or anything injurious." DR. A. A. HAYES, Chemist, Boston.	Troches.
Brown's	"A simple and pleasant combination for COUGHS, etc." DR. G. F. BIGELOW, Boston.	Troches.
Brown's	"Beneficial in BRONCHITIS." DR. J. F. W. LANE, Boston.	Troches.
Brown's	"I have proved them excellent for WHOOPING COUGH." REV. H. W. WARREN, Boston.	Troches.
Brown's	"Beneficial when compelled to speak, suffering from COLD." REV. S. J. P. ANDERSON, St. Louis.	Troches.
Brown's	"I heartily unite in the above commendation." REV. M. SCHUYLER.	Troches.
Brown's	"EFFECTUAL in removing Hoarseness and Irritation of the Throat, so common with SPEAKERS and SINGERS." Prof. M. STACY JOHNSON, LaGrange, Ga. Teacher of Music, Southern Female College.	Troches.
Brown's	"I have been much afflicted with BRONCHIAL AFFECTION, producing Hoarseness and Cough. The Troches are the only effectual remedy, giving power and clearness to the voice." REV. GEO. SLACK, Min. Ch. of England, Milton Parsonage, Canada.	Troches.

Brown's Bronchial Troches

CURES COUGH, COLD, HOARSENESS AND INFLUENZA.
CURES ANY IRRITATION OR SORENESS OF THE THROAT.

AS THEY ASSIST EXPECTORATION AND RELIEVE HOARSENESS.

Sold by all Druggists in the United States, at TWENTY FIVE CENTS A BOX. fe20 1meod&4tW

THE ELECTRICAL FEBRIFUGE;

—OR—

SPEED'S FEVER TONIC.

Warranted to cure, in from two to twenty hours, all BILIOUS, YELLOW, CONGESTIVE, TYPHOID, FEVER AND AGUE, —AND— All Febrile Diseases.

This invaluable medicine has been before the public for the last ten years, and wherever it has been used has proved a certain cure for all types and grades of Fevers, and has not failed to cure in a single instance when taken according to directions.

Time and experience have also proved satisfactorily that the Electrical Febrifuge cures Inflammatory Rheumatism, Typhoid Pneumonia or Winter Fever, and Pleurisy, Small Pox, Scarlet Fever, Measles, Erysipelas, Nervous and Bilious Headache, Neuralgia, Nervous Toothache, Fits, Spasms, Cramps in the Stomach; Asthma, Want of Rest and Inability to Sleep, Delirium Tremens, Tetanus or Lock Jaw, Ear ache or Ringing in the Ears, Cold Feet and Hands, Influenza and Bad Colds.

There is no medicine equal to the Electrical Febrifuge for Females. For obstructed or suppressed menstruation, and for protracted or difficult labor.

It is perfectly safe in all conditions of life for either male or female.

One bottle, price $1; contains enough to cure from five to eight cases of ordinary fevers, which renders it the cheapest medicine in the world, without regard to the great saving of time and suffering.

Beware of counterfeits and mixtures purporting to be the same or similar to the genuine article—they are dangerous and unsafe for use.

None genuine without my fac simile signature, with the likeness, authority and signature of James Speed on the envelope, and the words, "Electrical Febrifuge" Dr. Wm. Dowse, New Orleans, blown on the vial. Prepared only by Dr. Wm. Dowse. Sole Agents,

E. B. WHEELOCK & CO., Wholesale Druggists, No. 41 Magazine street, New Orleans, La.

For sale also by J. WRIGHT & CO., and by Druggists and Dealers generally. fe18 1m&6mW

CHEROKEE REMEDY—

ROOTS, BARKS AND LEAVES,

—VERSUS—

NAUSEOUS DRUGS AND POISONOUS MINERALS.

We ask the afflicted of either sex, which do you prefer? A pleasant and delicious syrup, compounded from Nature's own Remedies—one which will speedily and permanently cure you; or the vile compounds heretofore used, with all their nauseous and debilitating effect, together with the loathsome disease many times following the use of Mineral Poisons.

The "Cherokee Remedy" is nature's own specific for Gonorrhea, Gleet, Gravel, Stricture, Fluor Albus, (Whites, in Females) and all diseases of the Urinary Organs; curing these diseases by natural laws, after all other preparations have failed; and is one of Heaven's best mercies to offending man; instances could be produced of its effects, which would stagger credulity. The nauseous preparations heretofore used have failed, but this has never in one instance been known to fail. Happily for mankind, the governor of the world is a Father who afflicts, not to kill, but to cure.

In mercy he has appointed Medicines for these dreadful diseases, which when taken, quickly flies to all parts of the system, attacks the disease at every post, and with a fidelity and courage truly admirable, never gives it rest until it has completely expelled it from the body, and restores the unfortunate patient to former health and vigor.

This "Remedy" strikes at the very root of the disease; its tendency is not simply to suspend the poison, but to remove the cause on which it depends.

And what enhances its value is the entire absence of all nauseous taste or smell. It can lay in the counting room, or on the toilet table, without ever being suspected as a "Remedy" for secret diseases.

A treatise on Venereal disease, with full directions for their permanent cure accompany each bottle.

Sold by J. WRIGHT & CO., Nos. 21 and 151 Chartres street, New Orleans, and by all respectable Druggists and dealers in medicines.
