HORSES, CARRIAGES, &C.

A. THE "BREWSTER WAGON," A.
in all weights, for pleasure driving or speeding, exquisitely finished,
and embracing in their construction the various improvements introduced by us during the past 15 years, making them
the standard for Quality
throughout the United States.
These wagons are exclusively the production of our well-known Broome street factory, and are offered in stock in all respects equal in quality to those built to the order of the most valued customer, and at prices
uniform to all.
In order that we may not be confounded with a joint stock company of carriage dealers who have adopted a firm name similar to our own, and impudently claim the reputation we have made for the "Brewster Wagon," we beg the public will remember that our only warerooms are at the corner of
Fifth avenue and Fourteenth street,
and our only Factory on Broome street.
BREWSTER & CO.,
of Broome street.

HORSES, CARRIAGES, &C.

A.—BREWSTER, OF TWENTY-FIFTH STREET. A.
Warerooms,
Fifth avenue, corner Twenty-seventh street.
Sole makers of BREWSTER WAGONS with the VERTICAL STEEL PLATES.
The maximum of strength, the minimum of weight, obviating all spread of the axle, a prevailing source of annoyance to those using road wagons.
To attain the highest speed a wagon should follow the horse in a direct line. This can only be accomplished by the wheels running plumb; any inclination in the axle to spread destroys the plumb of the spoke and gives a lateral motion to the wheel, causing it to push out sideways. This lateral movement greatly increases the friction to be overcome by the horse, with a consequent waste of power, thus detracting from his speed in direct proportion to the spread of the axle.
With our Vertical Steel Plates we have been enabled to build wagons of the lightest weight, running so absolutely true that we have yet to hear the first complaint from our patrons.
See certificate from General McClellan:—
NEW YORK, June 1, 1871.
GENTLEMEN:—
I have carefully examined your Patent Vertical Steel Plate Axle. I find that the addition of the Vertical Plate renders the axle about two and a half (2½) times as stiff as it would be without it.
Very respectfully,
GEORGE B. McCLELLAN.
