# New Orleans Daily Crescent

THIRD ADVANCE OF COMMERCE COLUMNS

## Latest Intelligence.

Commercial Office, No. 10 Camp street, Thursday Morning, July 11, 1861.

The weather in general was warm yesterday throughout the country as well as here, and it did not cool the atmosphere any.

The temperature yesterday was the Arcadia at Natchez, 90 degrees.

The river before the city is falling at a slow rate.

The Natchez Democrat of the 9th says:

"The river has slightly begun to fall on Sunday evening last, falling full one-fourth of an inch. The weather was unseasonably warm yesterday. The Steamer Meteor has received a Napoleon gun from Arkansas, has taken three feet of water on her bottom, and over a hundred passengers, and has left for Third Bayou, Third Bayou, for New Orleans.

Passed Above the Donaldsonville.—The fast packet Lady Pamela, Capt. A. Grant, passed up yesterday, Mr. L. Bayhi, clerk, leaves this city on the morning for Donaldsonville and Pattersonville.

Passed Above the Fort Adams.—The large and fine passenger packet Laurel Hill, Capt. S. Cook, commander, and Mr. Geo. Wilkinson, clerk, leaves for Fort Adams and coast landings at 5 o'clock this evening.

The St. Francis Ouachita River.—The very light-draught passenger packet Dan No. 2, Capt. Leo Rosenthal, commander, and Mr. Ed. Becks, clerk, leaves this evening for the above rivers, and all points on Bayous Tension and Bonroe.

Regular for Fort Hampson.—The large and elegant passenger packet Ford, Kennedy, Capt. J. H. Harper, commander, and Mr. W. S. Harper, clerk, leaves for Vicksburg, Memphis and the Yazoo at 4 o'clock this evening.

## New Orleans Money Market.

Commercial Office, Noon, Thursday, July 11, 1861.

There was nothing transpired to-day to move yesterday's quotations. Specie, however, passed many quotations at the rates of yesterday. The most important feature observable to-day was the promptness with which thousands of our citizens called for their dividends. Some days continued distributing their pennies for days. Months passed, there was nothing very special to do, but in a few weeks and months ago were hoarding their money, calling into requisition old stockings, old wallets, corners and crannies, have now taken off their fears, and think their hallows are as safe in the banks, and considerably more so than Broadway, where thieves break in and take all. Some people think that our banks will not be troubled with small deposits, such as twenty-five or fifty dollars. This view is groundless, as the banks are all willing to receive small deposits. We have no sympathy whatever with hoarders of money, and when they happen to lose their hoarings by theft, they appeal to their friends for assistance. These parties are not worthy of the least commiseration, and when we hear of them and their loss, we feel that they have only to repove them for their carelessness.

The city and railroad banks have nothing on hand to offer in the shape of loans of paper, and buyers are not in the market for business. The large or non capitalists, who have taken his departure for Niagara, Saratoga, and the Green Mountains will let him off easy if he does not return.

Exchange.—Sterling is weak, and the movements in Exchange, other than those of sterling at 109@109 and 110, the same which are drawing on Europe and Boston, the rates may advance from 109 @ 110 before the month closes, irrespective of New York operations. New York is short of all its balances in this country. There are some small sums still remaining for exchange for rents, as agents are busy landlords whenever residing and collecting the rents.

The state of trade is in the Northern market for goods, is favorable for war purposes, offering 7 @ 8 cents. Wool is exceedingly neglect in the Eastern States. There is scarcely a country, city or town in the east. Let repudiated the obligations through their agents and taxes of law. In one, Boston, and thousands of the legal bonds of the Bay State counties, with large sums of State indebtedness, are under protest. The loan now offered for sale is in violation of the Constitution. Not a legislature in all of the Northern States are in favor of paying principal and interest at Washington, which is the Government obligations. The whole amount of the commerce of the State is less, as of which the commerce of Boston is composed in, delinquent and non-paid obligations to New York capitalists, and the Northern States are wasted about by old Abe, Cameron and Washington.

## Friends of the Ditchels.

Commercial Office, No. 10 Camp Street, Thursday Morning, July 11, 1861.
