ATTENTION, BLACKSMITHS!
Your attention is called to HARRY'S PATENT TUYERE and ASHLESS NOZZLE, which give the blast on the bottom instead of the side of the fire, and make a quicker and better fire than is possible otherwise. It gives one, two or three blasts on the same fire, and spreads the heat over a wide surface, or concentrates it on a point, at pleasure. Thus, the whole wing or bar of a plow can be heated evenly and perfectly, without danger of burning, and what, with ordinary Tuyeres, requires five or six heats, can be done at one. It saves greatly in time from and foul. The fire is completely under the control of the blacksmith, and no fuel is wasted. It never gets hot, and will last indefinitely.
Prices, According to Size, $15, $20 and $25.
Orders filled by CLINTON & RICHARDS, No. 74 Magazine street, New Orleans.
Read the following certificates from practical New Orleans mechanics:
NEW ORLEANS, March 6th, 1866.
MR D. C. FREEMAN—H. S. Berry's PATENT TUYERES have been in use in some of the forges under my care since November last, and have given entire satisfaction. The workmen using them prefer them to any they ever used. I cheerfully recommend them as the best I have seen in fifteen years experience in blacksmithing; heating the iron quicker, more perfectly and with less fuel, and never getting out of order.
JAS. McCARE,
Foreman Leeds' Foundry Smith Shop.
NEW ORLEANS, March 6, 1866.
D. C. FREEMAN, Esq.—Dear Sir—BERRY'S PATENT TUYERES has been in use under my own inspection since November last, and I recommend it, without hesitation, the best I ever used. It will heat iron of any size quicker, and more conveniently, and with less coal than with any other I have described. In welding a large shaft the blast can be regulated to heat both ends perfectly in one fire, thus saving much time, labor and coal. It does not get hot, consequently cannot burn out, and does not get choked. I cheerfully recommend them.
THOS. O'CONNOR,
Foreman of Smith Shops, McCamm's Foundry, New Orleans.
For parish rights in Louisiana, and county rights in Mississippi and Alabama, address me as Clinton & Richards.

M., and will continue every day for five weeks. The proceeds of this Fair are to be applied to the extension of the Asylum in the Third District, devoted to the care and maintenance of Indigent Widows and Orphans, and to providing a Refuge for Aged, Infirm and Crippled Men. These ladies have been induced to make this appeal to the public patronage of New Orleans in consequence of the numerous cases of destitution which have recently come to their knowledge, and for which they are unable to provide for want of proper accommodation. It is well known that the late unfortunate struggle has thrown many helpless victims on the public, and the main object of the proposed Fair is to afford relief to that class of persons. Those willing to make contributions, either in money, merchandise or articles for the Restaurant will be kind enough to send them to the Fair Rooms, where they will be taken charge of by a Committee of Ladies. Those preferring to donate building materials, etc., can do so by leaving orders for their purpose at the Fair Rooms.

THE HYDRAULIC CLOTHES WASHER
AND WRINGER.
The best and most useful invention of the kind for saving household labor ever invented.
Has more and better recommendations for saving time, labor and the wear and tear of fabrics washed, than any other machine. All the other machines either rub the clothes and wear them out speedily or, do not satisfactorily perform their work. With the HYDRAULIC CLOTHES WASHER this is not the case. There is no rubbing of the clothes and consequently no wear and tear. The washing is most completely and thoroughly performed by the action of the water alone. Send for a circular giving full explanation, or call and examine them at the General Southern Agency.
Good inducements offered to agents elsewhere.
