THE HYDRAULIC CLOTHES WASHER AND WRINGER.
The best and most useful invention of the kind for saving household labor ever invented.
Has more and better recommendations for saving time, labor and the wear and tear of clothes, than any other machine. All the other machines either rub the clothes and washers and specially, or do not satisfactorily perform their work. With the
HYDRAULIC CLOTHES WASHER
This is not the case. There is no rubbing of the clothes, so consequently no wear and tear. The work is done more plainly and thoroughly performed by the action of the water alone. Send for a circular, giving full explanation, or call and examine them at the General Southern Agency.
Good inducements offered to agents elsewhere.

THE LANE COTTON MILLS.
These MILLS, which were built by them in 1859, as an effort of Southern enterprise, are again under my control, and I am prepared to supply the trade with COTTON YARNS No. 5's to 12's, packed in such quantities as may be ordered, and of the quality put up by me prior to the war, which accounts may now offered in the open market.
It is known, that while those Mills were in my hands, the product of them attained a reputation for superiority of quality and fullness of weight—was quoted by any other Yarns offered. This reputation has been questioned by certain unprincipled parties, who have not scrupled to use my name and brand to cover an inferior article, and further, there I learn that Georgia Yarns have been offered, in this market, as the product of my Mills.
To protect myself and customers from such impositions, I have adopted a trade mark, which will, hereafter, be placed on each bale of my Yarns, with the addition of my signature, on each and label. These Mills have no agents. Orders left at No. 30 Union street, will be promptly executed.

FOR SALE.

FOR SALE OR RENT—ONE OF THE FINEST Plantations in the State of Louisiana, situated in the parish of Ascension, only miles from New Orleans.
The great advantage of this place is in being entirely free from overflow. The water of no crevasse has yet come within sixteen miles of it. Even a break in the levee in the above or lower, in the highest water, would not injure it. There are about 750 acres of cleared lands, perfectly drained, and have never yet been under cultivation. The above place is to be surpassed by any in the State for fertility of soil (which is all virgin) and for capacity of sugar.
The buildings are in a perfect state of repair, viz: A fine two-story dwelling house, with all the out buildings belonging to a large estate; Sugar House, Boiler House, Carpenter's and overseer's house, negro cabins, large brick and cane shed covered in slates, and two large stables.
There is now on the place the requisite amount of plant cane and 20 acres of ratoons, from which we over 4000 bbls. May crop nearly in, and ample for 50 mules. Hogsheads, wood, etc., ready for the crop.
Parties wishing to purchase or rent will do well to call immediately and see for themselves, as the present crop will be sold, if desired.

The land is nearly bottom, lying on both sides of Bolton's Creek, which runs centrally through the tract. About thirty hands could be worked to great advantage in the next year's crop. The neighborhood is good one, contiguous to a large flourishing male and female Seminary and one or two Churches. A good bargain is offered as I am determined to sell.
