New Orleans Daily Crescent.

OFFICIAL JOURNAL

—OF—

THE STATE OF LOUISIANA.

FRIDAY MORNING, SEPTEMBER 21, 1866.

Another Political Jeu d'Esprit.

Notwithstanding the acrimony with which the contest in the North is conducted, both sides get off a good thing in the way of a *jeu d'esprit*, now and then:

UNITED STATES THEATER—SEASON OF 1866-7.

(From the Boston Commercial Bulletin.)

The manager in response to a universal desire of the public to be made acquainted with the progress of the arrangements for the coming season, which is looked forward to with so much anxiety, is enabled to give the following particulars in regard to his principal performers, pieces to be represented, and novelties in preparation:

Proprietor and Chief Manager..........U. Sam.
Assistant Manager..........Mr. A. Johnson.
(Positively for two years only.)
Stage Manager (who has been engaged from the Republican Theater)..........Mr. Doolittle.
Treasurer..........Mr. McCulloch.
Scene setter (who has been engaged at great expense, and whose abilities in coloring all subjects are well known)..........Mr. Bennett, of New York.
Scene Shifter..........Mr. Greeley.
Gas Man..........Mr. J. Rogers.
(From the New Jersey and other foreign theaters.)
Prompter..........Mr. Weed.
(From the Regency Theater, Albany.)

A prominent feature will also be a full and efficient orchestra, including among its members the following well known and celebrated performers:

Leader..........Mr. Marble.
(The greatest in the world.)
First Fiddle..........Mr. Raymond.
(Unequalled for skill in changing tune of his instrument.)
Second Fiddle..........Mr. Forney.
(From the Washington and Philadelphia theaters.)
Double Bass..........Messrs. B. and F. Wood.
(Artists from New York.)
Trumpet..........Mr. Geo. F. Train.
(He will blow his own trumpet in every performance.)

During the season the following well known performers will appear:

Mr. Swift—From the Massachusetts theaters, in his new farce of "Turn About is Fair Play," and also in several of his celebrated stump performances.

Mr. Butler—His first appearance since his successful debut on the New Orleans stage.

Mr. Fox—Now performing with great success in Russia in naval dramas.

The well-known tragic actors, Mr. Monroe, of New Orleans, and Mr. Forrest, of Memphis, are expected in new tragedies.

Mr. Winslow—His first appearance since his successful Alabama engagement.

Mr. Sumner—The celebrated supporter of Ethiopian characters.

Mr. Farragut—The great United States naval star, whose performances have gained him a world-wide reputation.

THE COMPANY.

The following have been secured as other members of the stock company for the season:

Leading Business..........Mr. T. Stevens.
(From the Pennsylvania theaters.)
Light Comedy..........Mr. E. Blair.
Walking Gentleman..........Mr. Brownlow.
(From the Tennessee theaters.)
Juvenile Business..........Mr. Wells.
Low Comedy..........Mr. McDougal.
(Of the California stage.)
General Utility...Messrs. Belmont, Wilson, Banks, Phillips, etc.

DRAMAS IN PREPARATION.

The celebrated drama entitled "Restitution," dramatized from the English story entitled "Neutrality," expressly for this establishment, by Mr. W. H. Seward, and introducing several distinguished English actors—will be brought out at an early day.

The Irish burlesque, entitled the "Fenian Scare," will be revived without regard to expense.

The celebrated farce, entitled the "Wigwam Procession," will be revived during the season.

Mr. Butler's drama, written expressly for him by Grant, entitled the "Bottle Imp," will be produced.

Bottle Imp..........Mr. Butler.

NOTICE.

The manager respectfully gives notice that a full and efficient force has been engaged from the "Theater of War," and the strictest order will be enforced. No admission except to those who conform to the manager's rules and regulations.

(Southern) children in arms not admitted.

Colored people admitted to all parts of the house.

The Fall Fashions.

CURIOSITIES OF THE MODE.

[From the Philadelphia North American, Sept. 12th.]

By an importer whose trade is among the most radically fashionable milliners, we were shown a case of samples of Paris made bonnets, and the materials for their make and embellishment, for the present fall season. The fashion of this head gear is piquant and striking. Moreover, it is pretty and becoming as a general rule. It is a perfect God-send to the *coiffurers*. So small is the new style of bonnet that everybody dressing *en rigeur*, no matter what may be the abundance of her own hair, must re-enforce it with from ten to thirty dollars worth of some one else's. So great indeed is the demand for artificial hair, that a large portion of the waterfalls, rolls, *frizzes* and other appendages with which an unnatural crop of hair is imitated, are made of silk or worsted—commonly termed mohair.

Purchase a silken cord at the upholsterer's, and it will be seen that the silk is only twisted round the surface—the cord is cotton. Just so, because Eugenie's once magnificent tresses are growing thin, everybody is wearing somebody else's hair, and a big roll or pad of goat's wool or horse hair is artfully covered on the outside with the hair of some Normandy peasant bride, who, through the instrumentality of an inexorable pair of scissors, has brought to her husband a wedding portion. Save waterfall curls, that cannot be made except of human hair, a very large share of the other embellishments rendered imperative to those who wear fashionable bonnets, are the veriest sham.

The fashion of the bonnets for the present year is strikingly peculiar. They are smaller, by a good many degrees than those in vogue during the past. From the specimens shown to us we reach the conclusion that an elderly lady, disposed to adhere to old fashions and to desire a bonnet in order to cover her head, must look for something not to be found among fashionable millinery.

There were in the variety that we examined nine different sorts of soup plate or May Queen hats, every one of which was made in velvet. The smallest was a mere square of green velvet, with broad velvet strings covering the ears. A trimming of lace, about an inch wide, depended from the edges. There were three fac similes of ears of wheat, and a like number of counterfeit hops on the front. The price that we should have guessed to be at the most five dollars, was thirty dollars. The bonnet measured six inches and three quarters by five inches and a half. A slight convexity was all that distinguished it in shape from a small pane of glass.

The next was much like the first, except that the pane of glass ran to a point at the back end, the others were in the shape of small dessert plates, exceedingly small Gypsies, and May queens looking like objects examined through the little end of an operaglass. Every one of them points directly to the dealer in artificial hair. If all the peasant girls of France and Germany were at once to give up their tresses, they could not supply a tithe of the demand made upon them by people who would rather be out of the world than out of the fashion.

The trimmings are as ultra and as "radical" as the bonnets themselves. The artificial flower business has received a paralyzing blow. Just as the new fangled style has given impetus to the hair business, it has put a quietus upon that of making artificial flowers. For young people turbans will be very much in vogue, and the trimmings upon these will denote the opulence or the extravagance of the wearer.

Of the eight that were shown to us, five were adorned with stuffed humming birds. The gorgeous Lilliputians of the feathered tribe that gem a Brazilian landscape are thus murdered and accepted to do sentinel duty over Anglo-Saxon belles. In Paris, from which our obliging informant has just returned, jewelers are mounting these winged opals upon sets of jewelry. They bring prices so extravagant, for the part they have been pressed into as articles of costume, that the modest collector of taxidermal varieties cannot now hope to possess the rare specimens. One of them, shown us yesterday, was little larger than a hickory nut, and the brilliancy of his plumage put to blush the gleam of the Hungarian opal.

The feathers of gay robed birds this season are in great demand. No more peacock feather dust-brushes, we take it, will for a time be used. From these feathers the "eyes" are cut, and, intermingled with the short feathers from the body of the haughty bird, are glued upon bands of cloth to margin the turbans that are the fashion in Paris—and of course everywhere else—for girls budding into womanhood. A large box of them was shown to us, of which no two were alike, derived from the plumage of the peacock, pheasant, guinea-hen and domestic pigeon, down even to the jet black, untinted crow.

The dealers are no way backward about the prices they ask, while our friends the milliners, we opine, will require as large a price for a bonnet, scarce large enough to hold a shilling's worth of ice cream, as they used to ask for one that could easily contain a peck of stone coal.

As we before remarked, old ladies always accustomed to have their heads covered, and who could even entertain the idea of buying and wearing the hair of some one else, must order their bonnets to suit their own ideas. Fashion has made no provision for them.

PATENT LUMBER DRYER.

BULKLEY'S..........BULKLEY'S

PATENT LUMBER DRYER,

—BY—

SUPERHEATED STEAM, WITHOUT PRESSURE, WILL SEASON LUMBER IN FROM 2 TO 4 DAYS.

Important Invention for Seasoning Lumber.

It will season Lumber at an average cost of $1 per 1000 feet.

It will season Lumber more thoroughly, and check it less than any other process.

It is safer, does the work quicker, cheaper, and better than any other process.

The expense of a Kiln and a Right is within the reach of every one.

It costs less to dry out the water in Lumber, than to haul it twenty miles.

NO NECESSITY FOR USING GREEN LUMBER.

The Lumber comes from the kiln ready to be worked immediately.

The cost of changing a common Dry Air Kiln into a Steam Kiln, or of erecting a new Kiln and the price of a Right, are often saved in a year by this process.

No need of keeping large stocks of lumber on hand. It costs less to dry it by this process than the interest on the price while drying in the air.

Carpenters, Coopers, Cabinet, Carriage, Sash, Door and Blind Manufacturers, Owners of Planing Machines, Saw Mills, and all who wish to dry lumber, should be in possession of the Right to this invention.

A common Hot Air Kiln can be changed into a Steam Kiln for small expense.

This process is now in use in the Car shops of the Pennsylvania Central; New York Central; Atlantic and Great Western; Chicago and North Western; Chicago, Alton and St. Louis; Illinois Central; Chicago, Burlington and Quincy; Michigan Central; Toledo and Wabash; Sandusky, Dayton and Cincinnati; and other Railroad Companies. Also, by many of the manufacturers of Cars, Carriages, Sash, Doors and Blinds, Agricultural Implements, etc., throughout the United States.

GRAIN, FLOUR, MEAL, FRUIT, VEGETABLES, TOBACCO, WOOL, PAPER, BRICK, SALT, and other substances are dried by this process.

A test of the Dryer allowed before paying for the Right, by paying for the drawings and specifications.

For further information, address

JOSEPH FRY,
Box 323, Postoffice, New Orleans, La.

From the Washington Navy Yard.

WASHINGTON NAVY YARD, Feb. 16, 1864.

To Wm. Keiser, Esq., Constructing Engineer:

Sir—We have two of Bulkley's Lumber Dryers in operation in this yard. We have made thorough tests of the process. We weighed and gauged in and out the following samples of lumber, viz: Five White Pine Planks:

No. 1. Weighed in 64 lbs., weighed out 55 lbs; gauged in 15 3-16 inches; gauged out 14¾.

No. 2. Weighed in 67 lbs; weighed out 57 lbs; gauged in 15 3-16 inches, gauged out 14⅞.

No. 3. Weighed in 64 lbs, weighed out 57 lbs; gauged in 15¼ inches, gauged out 14 13-16.

No. 4. Weighed in 70 lbs, weighed out 61 lbs; gauged in 16¼ inches, gauged out 14⅞.

No. 5. Weighed in 61 lbs, weighed out 53 lbs; gauged in 15¼ inches, gauged out 14¼.

No. 6. A green black Walnut board weighed in 45 lbs, out 31 lbs; gauged in 17 5-16 inches, out 16¾.

No. 7. A black Walnut board weighed in 49 lbs, out 35 lbs; gauged in 12½ inches, out 11⅞.

No. 8. An Ash plank 1½ inches, 10 years in yard, weighed in 77 lbs, out 71; gauged in 15 inches, out 14¾.

No. 9. A Pine plank 2 3-16 inches, 4 years in yard, weighed in 98 lbs, out 91; gauged in 16⅛ inches, out 15.

No. 10. An old dry board gauged in 9⅝ inches, gauged out 9⅜ inches.

No. 11. An old dry board, 1¼ inch thick, gauged in 12⅝ inches, gauged out 12⅜ inches.

No. 12. A green plank, 1¼ inch thick, was cut into three pieces, and one of the pieces taken out each day. One piece 15¼ inches wide, shrank a quarter of an inch in 48 hours. The piece which remained under fire three and a half days shrank no more than the one which was in the kiln only 48 hours.

The shrinkage seems to be taken out by the superheated steam before the moisture is all gone.

This lumber was seasoned in less than four days and seems as bright and full of life as the best air dried lumber.

We consider these Kilns of great advantage to this yard, and believe the process to be just what we have long needed. It will save all the trouble about dry lumber. We think the process based upon the right principle—safe and economical.

J. E. DOWNING, Master Joiner.
C. L. WILLIS, Foreman.
L. A. TUXE, Quartermaster.

I believe the statements set forth in the above communication to be correctly stated, and the experiment to have been a complete success. S. P. BROWN, Navy Agent.

The results of the experiment as above reported are satisfactory, and we believe them to be correctly stated.

JOS. SMITH,
Chief of Bureau of Navy Yards and Docks.
W. P. S. SANGER,
Engineer-in-Chief of Navy Yards and Docks.

From R. L. & H. Webster,
Manufacturers of Barrels, Ellenburg Center, New York.

We have in use two of Bulkley's Patent Dryers. They are perfectly satisfactory. We can save the cost of the Dryers in interest alone each year we use one of them.

From W. H. Langley,
Manufacturers of Barrels, Gallipolis, Ohio.

The Dry Kiln built under the direction of your Agent, for seasoning staves, has been in constant use, and I believe it performs its work fully as well as you claim for it. I would about as soon buy green staves as those partly seasoned, knowing we can in a few days, at small expense, have them well seasoned.

From Howe & Jones,
Sash, Door and Planing Mill, 1129 Beach street, Philadelphia.

We have been using Bulkley's Patent Lumber Dryer for several months. We find it almost indispensable, as we should not have been able to fill our orders without it for the past few months. In our opinion it is the only way to thoroughly season lumber in a seasonable time, and we believe the lumber so dried is in no way injured by the process.

From J. H. Schomacker,
Piano Maker, Philadelphia.

Test made by Bulkley's Patent Lumber Dryer: One piece of Pine board, 12¾ inches wide, 1¾ inches thick, weight 6 lbs. 4 oz. in, and gauged out 12 5-16, lost 6 ounces in weight. This lumber was dried in the yard three years, and one year in hot air kiln by me. I recommend this process to all manufacturers.

From Moore & Campion,
Philadelphia.

Test made by Bulkley's Lumber Dryer, of two pieces of black Walnut inch boards, one 17 inches wide, about half dry, shrunk 7-16 inch in width; one 19 inches wide, as dry as it could be made, shrunk ¼ inch in width. In our opinion, this process takes more shrinkage out of the lumber than any other, and does not injure it.

Tests Made at the Shops of the Pennsylvania Central Railroad Company, Altoona, Pa.

In order to make a test of Bulkley's Patent Lumber Dryer, the kiln was filled with cherry, ash, poplar, pine, oak and black walnut, and after being forty hours the lumber came from the kiln perfectly seasoned.

The following kinds of lumber were weighed and gauged when put in the kilns and also when taken out:

A 2¾ inch pine plank weighed in 75 lbs., weighed out 65 lbs.; gauged in 17 3-16 inches, gauged out 16⅞.

A 2 inch ash plank weighed in 83 lbs., weighed out 69 lbs.; gauged in 10⅛ inches, gauged out 16⅞.

A 2 inch black walnut plank weighed in 67 lbs., weighed out 64⅝ lbs.; gauged in 14⅝ inches, gauged out 14⅛.

A 1¾ inch cherry board gauged in 16⅛ inches, gauged out 16⅛.

A piece of oak weighed in 189 lbs., weighed out 157 lbs.; gauged in 6⅞ by 7 9-16 inches, gauged out 6⅞ by 7 7-16.

A pine board (perfectly green) weighed in 89 lbs., weighed out 67¼ lbs. and was only in the kiln twenty hours. The lumber came from the kiln ready to work.

The tests were perfectly satisfactory.

F. F. LEVAN, Superintendent Car Department.
JNO. P. LAIRD, Sup't Motive Power and Machinery.

The practical operation of Bulkley's Lumber Dryer has proven to be satisfactory, as set forth by the certificates of Mr. Laird and Mr. Levan, Superintendents of Motive Power and Car Departments.

THOMAS A. SCOTT, Vice President.

From C. F. Allen,
Superintendent of Wood Work and Car Shops, Chicago, Burlington and Quincy Railroad, Aurora, Ill.

A thorough test was made at this shop of Bulkley's Patent Lumber Dryer. It has the qualities of thoroughly seasoning the lumber, safety from fire, small amount of fuel, easily attended, and will dry the lumber in a short space of time. It is further due to this process to say that the lumber was dried in four days, using far less fuel per day than we had formerly used per day when the lumber was dried two to four weeks, and the lumber was more thoroughly seasoned than any we have dried heretofore, and that, too, without any checks.

From William Johnson,
Foreman New York Central Railroad Shops, Auburn, N. Y.

It has been a great help to us. I consider it the best mode of drying lumber now in use.

From S. J. Hays,
Superintendent of Machinery, Illinois Central Railroad.

The Dryer works satisfactorily. We have recently built another kiln, and shall build several more.

From S. C. Case,
Superintendent of Car Dep't of Michigan Central Railroad.

From several years experience with H. G. Bulkley's and other methods of kiln-drying lumber, I can cheerfully recommend this as the best in use.

From Barney, Smith & Co.,
Car Builders, Dayton, Ohio.

We deem the process equally well adapted to soft and hard lumber, and of all dimensions; the time required for drying varying with the kind and thickness. We find it indispensable in our business.

From Dean & Eaton,
Car Builders, Detroit, Michigan.

Some 5½ by 14 inch green oak, for car trucks, was dried in three days more than it would have been if it had been a year and a half in the open air. We have made thorough tests and find the lumber does not shrink a particle after coming from the kiln.

From Russell & Co.,
Car Builders and Manufacturers of Reapers, Mowers, Horse Powers and Separators, Massillon, Ohio.

The lumber comes from the kilns all ready to work. From tests made we are satisfied that the shrinkage is taken out of the lumber before the moisture is all gone. The texture of the wood remains firm and tough, and susceptible of a very excellent finish. We are convinced that it is the best and only way of thoroughly seasoning lumber.

From Wunderlich & Mell,
Builders and Manufacturers of Sash, Doors and Blinds, Shippensburg, Pa.

We have in operation one of Bulkley's Patent Dryers. It works satisfactorily. We made a 1½ inch door, in July, out of lumber we thought dry. It stood in the shop until December and was then in good order. We put in the kiln, and in one day it shrunk ⅜ of an inch. We then put it out in the rain to swell it, but could not discern any change in it. We also had a lot of dry white pine plank under cover two years, and it shrunk 3-16 of an inch each plank.

From Sanger & Casey,
Illinois State Penitentiary, Commissioner's Office, Joliet.

It far excels all other modes of drying lumber that have come under our observation—in regard to simplicity, cheapness of construction, small amount of fuel required, safety from danger by fire, and efficiency in seasoning and drying lumber to the center, and in an almost incredibly short space of time.

From C. Aultman & Co.,
Manufacturers of the Buckeye Reaper and Mower, Canton, O.

We have dried a kiln full of poplar, ash and walnut in three days. The lumber comes from the kiln all ready to work. We are fully satisfied with the process.

From E. Ball,
Manufacturer of Ohio Reaper and Mower, Canton, Ohio.

After firing about three days, and consuming perhaps less than a cord and a half of wood, we opened the kiln. After testing the lumber in every possible way, we have pronounced it perfectly seasoned.

From Thomas Mast & Co.,
Manufacturers of Buckeye Grain Drills, Portable Cider and Sugar Mills, Springfield, Ohio.

We have used the process between two and three years, drying from 150,000 to 200,000 feet per year. It is our firm conviction that lumber is full as strong as when dried in the open air, and we think stronger. We have frequently dried 2½ inch ash in four days. The process is cheaper than sunshine.

From Smith, Barnes & Co.,
Manufacturers of Agricultural Implements, Tiffin, Ohio.

We consider this method of drying lumber a great saving of time and fuel, besides having the work done in a much more satisfactory manner.

From R. L. Howard,
Manufacturer of Howard's Improved Reapers, Mowers and Self-Rakers, Buffalo, New York.

The Dryer has fully answered your recommendations. I have seasoned 3000 feet of 4 inch green ash plank in three days, with about one cord of soft wood for fuel. I cheerfully recommend its use to all in want of seasoned lumber.

THE "TEXAS REPUBLICAN," MARSHALL, TEXAS,

offers the most flattering inducements to ADVERTISERS, as it circulates in the most extensive and finest Cotton portion of the Southern country.

The paper was established in May, 1849, and has been continuously issued from that period to the present. It was published throughout the war. Its circulation is principally over East Texas, but is taken at all the principal points in West Texas and North Louisiana.

It has been recognized for years as one of the leading papers of the State, and has enjoyed in a remarkable degree the confidence of the people.

The terms of Advertising are as follows: Per square, of eight lines or less, $1. Standing advertisements, per square, for one year, $15; for six months, $10; three months, $6. Subscription to the paper, $4 per annum.

R. W. LOUGHERY
Editor and Proprietor.

THE BOSSIER BANNER IS PUBLISHED weekly at Bellevue Bossier parish La. at the following terms:

Subscriptions, $4 per annum, invariably in advance.

ADVERTISEMENTS, BY THE YEAR:

Business and professional cards of one square, of eight lines, $15; two squares, $25; three squares, $35; quarter of a column, $45; half column, $55; whole column, $100.

THE BANNER

is the only paper published in the parish of Bossier, has a large circulation, and is consequently a good advertising medium for the merchants and business men of New Orleans, as the country in which it is published and circulated does a large business with the city. Address,

W. H. SCANLAND,
Editor and Proprietor Bossier Banner, Bellevue, La.

THE OPELOUSAS COURIER—

OPELOUSAS, LA.

Published on Saturday, by Joel H. Sandoz.

CONDITIONS:

SUBSCRIPTION—Four dollars per year payable in advance, or five dollars payable six months after the commencement.

A subscriber wishing to discontinue must give a written notice to that effect and settle up all arrearages: and no subscription will be stopped until all arrearages are paid, unless at the option of the editor.

ADVERTISING—One dollar per square for the first insertion, and fifty cents for each subsequent one. In each language. Eight lines or less constitute a square.

All advertisements sent in for publication will be inserted in English and French, unless otherwise ordered, until the editor shall judge it convenient to discontinue.

Candidates to public favors will pay fifteen dollars each, in advance, if they wish to be announced.

INSURANCE.

MERCHANTS' MUTUAL INSURANCE COMPANY.

TWELFTH ANNUAL STATEMENT.

In conformity with the requirements of their Charter, the Company publish the following statement:

Premiums received during the year ending 31st May, 1866, including unearned premiums of the previous year:		
On Fire Risks		$ 966,168 60
On River Risks		471,135 02
On Marine Risks		347,252 60
Total Premiums		$1,784,554 22
Less Premiums Unearned on the 31st May, 1866		$ 231,315 00
		$1,553,239 22
Returned Premiums		35,169 58
Net Earned Premiums 31st May, 1866		$1,518,069 64
Losses paid during the year:

STATE OF LOUISIANA,
Parish of Orleans, City of New Orleans,

Be it remembered, that on the 5th day of June, 1866, before me, the undersigned, a Justice of the Peace, in and for the parish aforesaid, personally came and appeared John Pemberton, President, and Paul Fourchy, Secretary of the Merchants' Mutual Insurance Company of New Orleans, who being duly sworn according to law, did depose and say, that the above statement is a just, true and correct transcript from the books of the Company.

JOHN PEMBERTON, President.
PAUL FOURCHY, Secretary.

Sworn to and subscribed before me this 5th day of June, 1866.
PAUL W. COLLENS,
Third Justice of the Peace.

At a meeting of the Board of Directors held on the —— day of June, 1866, it was resolved to declare a Scrip Dividend of Forty Per Cent. on the Net Earned Participating Premiums for the year ending on the 31st day of May, 1866, for which Certificates will be issued on and after the first day of August next. Also to pay on and after the second Monday in July next, the balance due on Scrip issue of 1858, and six per cent. interest in Common Currency on all outstanding Scrips of the Company.

COMPRISING THE FOLLOWING WELL KNOWN AND RELIABLE COMPANIES:

MERCANTILE MUTUAL INSURANCE CO.,

No. 35 Wall street, New-York.

ASSETS MAY 1st, 1866..........**$1,500,000**

ORGANIZED APRIL, 1844.

The Company has paid to its customers up to the present time, Losses amounting to over EIGHTEEN MILLIONS OF DOLLARS. For the past nine years the Cash Dividends paid to Stockholders made from one third of the net profits, have amounted in the aggregate to ONE HUNDRED AND TWENTY-ONE AND A HALF PER CENT.

Instead of issuing a scrip dividend to dealers, based on the principle that all classes of risks are equally profitable, this Company will hereafter make such cash abatement or discount from the current rates, when premiums are paid, as the general experience of underwriters will warrant, and the net profits remaining at the end of the year will be divided to the Stockholders.

This Company continues to make insurance on Marine and Inland Navigation and Transportation Risks, on the most favorable terms, including Risks on Merchandise of all kinds and freight.

Policies issued making loss payable in Gold or Currency, at the Office in New Orleans, or in Sterling, at the office of Rathbone, Bros. & Co., in Liverpool.

ELLWOOD WALTER, President.
CHAS. NEWCOMB, Vice President.
C. J. DESPARD, Secretary.

METROPOLITAN INSURANCE COMPANY

108 and 110 Broadway.

NEW YORK, JANUARY 23d, 1866.

Your attention is respectfully invited to the following statement of the operations of this Company during the past year, and of its present condition.

With Assets exceeding ONE MILLION SEVEN HUNDRED THOUSAND DOLLARS, and twelve years experience in the conduct of a General Insurance Business, the Company confidently offers to the Public Protection against the perils of OCEAN AND INLAND NAVIGATION and FIRE.

The Board of Directors have this day resolved to pay a dividend of SIX PER CENT. on the outstanding certificates of Profits to the holders thereof, or their legal representatives, on and after the 5th of March next; also a dividend of FIVE PER CENT. on the Capital Stock of the Company, payable in Cash on demand; also a dividend of TWENTY FIVE PER CENT. in Scrip on the net earned Participating Premiums of the Company for the year 1865, for which Certificates will be issued on and after the 2d day of April next.

OFFICERS:

JAMES LORIMER GRAHAM, President.

DR. MAGGIEL'S PILLS AND SALVE—

A NEW AND GRAND EPOCH IN MEDICINE.

Dr Maggiel's Pills and Salve.

These wonderful Medicines are now so familiar to the people that but little indorsement of their value as a Physic need be made. The Pills of Dr. Maggiel contain no mineral. They do not gripe, and they do not enfeeble the system by extreme purging. They are universal in creating

A VIGOROUS APPETITE!

And correspondingly strengthen the digestion. They tone the Liver, clear the Head, and steady the Nerves. To those who are not familiar with the use of

DR. MAGGIEL'S PILLS,

As an anti-bilious remedy, the following extracts from various letters will be, it is hoped, of sufficient importance to justify the quoting of them here:

What the Patients Say of Dr. Maggiel's Pills and Salve.

"The best Pills for headache I ever had."

"My liver works like an engine, thanks to your Pills."

"I am pleased to say to you, Dr. Maggiel, that I would not be without a box of your Pills for curing me of morning nausea, for the world."

"You will find inclosed one dollar; Your Pills are only 25 cents, but I consider them worth to me one dollar."

"Dear Doctor—My tongue had a fur on it every morning like the back of a cat. Your Pills took it away."

"I took half a pill and crushed it to powder, and gave it in jelly to my little babe for cholera morbus. The dear little pet was well in three hours after."

"I suppose it is hardly worth while to tell you my burned foot has got well from the use of your Salve. Inclosed find 25 cents for another box to keep in the house."

"Send me another box of Salve."

"Inclosed find 75 cents for two boxes of your Maggiel's Pills and one of Salve."

"The most gentle yet searching medicine I ever swallowed."

MAGGIEL'S PILLS AND SALVE

Are almost universal in their effects, and a cure can be almost always guaranteed.

FOR BILIOUS DISEASES

Nothing can be more productive of cure than these Pills. Their almost magic influence is felt at once; and the usual concomitants of the most distressing disease are removed. These remedies are made from the purest

VEGETABLE COMPOUNDS.

They will not harm the most delicate female, and can be given with good effect in prescribed doses to the youngest babe.

FOR CUTANEOUS DISORDERS

And all eruptions of the skin, the SALVE is most invaluable. It does not heal externally alone, but penetrates with the most searching effects to the very root of the evil.

DR. MAGGIEL'S PILLS

INVARIABLY CURE THE FOLLOWING DISEASES:

Asthma,	Headache,
Bowel Complaints,	Indigestion,
Coughs,	Influenza,
Colds,	Inflammation,
Chest Diseases,	Inward Weakness,
Costiveness,	Liver Complaint,
Dyspepsia,	Lowness of Spirits,
Diarrhea,	Ringworm,
Dropsy,	Rheumatism,
Debility,	Salt Rheum,
Fever and Ague,	Scalds,
Skin Diseases.	

Each Box Contains 12 Pills.

ONE PILL IS A DOSE.

☞ NOTICE—None genuine without the engraved trade-mark around each pot or box, signed by DOCTOR J. MAGGIEL, New York, to counterfeit which is felony.

☞ Sold by all respectable Dealers in medicines throughout the United States and Canada, at 25 cents per box or pot.

BARNES, WARD & CO., Agents,
New Orleans.

GALLIGHAN'S PILLS

—FOR—

CHILLS AND FEVER,

A Certain Cure!

Gallighan's Pills are composed simply of Vegetable Medicines. They are Cathartic Pills, acting upon the Stomach, Liver and Bowels; containing no Arsenic, Calomel, Blue Mass, or any other Mineral substance. The great advantage the proprietors claim for these Pills is, that without the aid of Calomel, Blue Mass or other minerals, they will cure the most obstinate cases of

CHILLS AND FEVER,
DUMB AGUE,
PERIODICAL HEADACHE,
NEURALGIA,

and all affections of a like character. Follow the directions, and you will find they will do all that is claimed for them. Try one box, and their own merits will recommend them ever after wards.

We have used Gallighan's Pills, and have never known them to fail to cure when the directions were followed, and unhesitatingly recommend them to public favor:

DR. J. WHITE'S INSTITUTE—

127 CARONDELET STREET.

In rear of the City Hall.

The first aim of human beings is happiness, and happiness implies health of body and mind.

Dr. White's experience and success for thirty-one years, in an extensive practice in large cities, have brought to him for treatment a vast amount of every form of disease, both acute and chronic.

His remedies restore the stomach, liver and blood, and all secretions and excretions of the entire system in unhealthy to a healthy condition. Instead of injuring any part of the system or the constitution, they renovate and repair the injuries and waste of the entire organism; with truly a sound mind in a sound body.

The Institute is established for the cure of all acute and chronic diseases, viz: Rheumatics, Colds, Coughs, Bronchitis, Laryngitis, Asthma, Consumption, and all diseases of the Throat, Lungs, Heart, Liver, Spine, Stomach, Bowels; Costiveness, Dyspepsia, Scrofula, King's Evil, White Swellings; all Sores, Ulcers, Abscesses, Cancers, Piles, Fistula, Syphilis and Gonorrhea in all their stages. Mercurial and hereditary taint, all radical impurities of the Blood, Jaundice, Diseases of the Eyes, Brain, Goitre, (Big Neck) Diseases of the Kidneys, Gravel, Diabetis, Dropsical Diseases, all Female Ailments, Weakness, Wasting and Nervous Affections; Sick, Nervous and Sun Headache; Depression of Spirits, Hippocondria, Hysterics, Fits or Spasms. We repeat, the worst eruptions of the skin, all sorts of ulcers, of whatever nature, to the incipient Cancer, which so grievously afflict humanity, are speedily and permanently cured.

One or two hours spent at the Institute with Dr. White frequently save weeks of fever or other sufferings—often life.

Now that communication is open again, he receives calls personally and by letter as formerly from all parts of the country. Consultation free—stamps not "forgotten."

DR. DE ANDRIE'S

—PURE—
