THE SUBMARINE EYE

Press and public unite in declaring that the latest and greatest of those wonder productions that live in the memory as red-letter events in the history of the motion picture is "THE SUBMARINE EYE" now astouding capacity audiences at the Liberty Theatre.

This marvellous triumph of the Williamson Brothers is a combination of science and romance surrounded by the beautiful and terrifying wonders of the ocean's depths. As a story its breathless thrill matches that of "Robinson Crusoe" and "Treasure Island." As a contribution to the all-important problem of solving the difficulty of overcoming the submarine menace, it is unique in its timeliness. The inverted periscope, invented by the Williamsons and shown in use in this masterpiece of the screen, may prove to be the means of "making the world safe for democracy."
