THE DAISY CHAIN SOCIETY.

Information Wanted as to How Far the Co-operation of the Commissioners Can Be Had.

The following letter was received by the Commissioners this morning from Mr. Archibald Hopkins, representing the Daisy Chain Society:

I am directed by the head of the Daisy Chain Contagious Disease Hospital to call your attention to the provision in the District appropriation bill for a site and the expenditure of $5,000 for the purpose of organizing and building such a hospital in this city. This appropriation was secured by nearly two years' persistent hard work on the part of the board, and in its final shape leaves the amount appropriated, the selection of the site and the management of the hospital absolutely in the control of the Commissioners. The question now is whether it can be so arranged that we can cooperate with them in this work and to what extent they will be willing to delegate their powers to us in order to carry it on.

Our plan is to raise $25,000 in addition to the amount available, which, with the $5,000 appropriated and about the same amount we have in hand, will make up the $35,000 which is considered necessary to build such a hospital as Washington ought to have. It will include a central building for administration, free and pay wards for diphtheria and scarlet fever and a complete disinfecting plant.

Will the Commissioners pay over to us the $5,000 they have to be expended under the direction of our committee in accordance with plans to be approved by Drs. Billings and Yarrow of the board? and will the Commissioners leave the general management of the hospital to our board, subject, of course, to their authority? We should like some definite assurances on these points at the earliest possible moment in order to determine our own line of action. The Commissioners will also see the importance of determining at once whether under the act any land belonging to the United States or to the District is to be had, and if so that it be designated and if not that a site be selected for purchase—the alternative provision of the same act.

The board is most anxious to come to full understanding with the Commissioners, and it has been suggested that it might be so arranged as to apply the money Congress has appropriated to the free wards, and that we should build and retain control of the pay wards, the income from which we anticipate will help support the others.
