ATTEMPTED ABDUCTION.—We understand that an attempt was made by some of the company of Robinson & Eldred's Circus, during their late visit to our village, to entice away a couple of young girls—aged 12 and 13—daughters of a widow Clark, living on Beebe's Island. The attempt was a bold one, and the rascals engaged in it deserve to be "posted up." The girls, as we understand, were around the tent during the afternoon's performance, and attracted the attention of the door keeper, who, after inquiring their names and something of their history, invited them in. Every effort was then made to win their confidence, and through the influence of numerous presents, and a promise of $200 on their reaching New York City, the girls consented to go with them. Arrangements were accordingly made to convey them to Sackett's Harbor immediately on the close of the evening's performance. Their mother, till then unconscious of what was going on, employed constable Keon to assist her in obtaining their release. The company stoutly refused to give them up, but finding that legal action was about to be taken, let them go. We advise parents, where this company may visit, to look well to their children.

THE WILL OF SIR ROBERT PEEL.—After entailing Drayton Park, and the other large estates in Staffordshire and Warwickshire, it proceeds to recite sums, to the amount of nearly a quarter of a million, previously advanced to, or settled upon his several children, (not including £9,000 per annum settled on his eldest son,) and then bequeaths about £600,000 more, making the portions of his five younger sons £106,000 each, and those of his daughters £53,000 each. He leaves to a chapel erected by him at Fazeley, in Staffordshire, £1,000, (afterward revoked because he had endowed it with lands,) and £6,000 to a school, established by him in the said village; to the Infirmary and Lunatic Asylum in Manchester, and the Lying in Hospital in Salford, £100 each. The will is dated July 27, 1820. By a codicil of February 11, 1825, the portions of his younger sons are increased to £135,000; and of the residue, which is said to have exceeded half a million, four-ninths were bequeathed to the late Baronet, and one ninth to each of his five younger sons. The personal property was sworn at what is technically called "upper value," which means that it exceeded £900,000, and was the first instance of the scale of duties extending to such a sum.

HOW TO LIGHT ALL THE GAS LAMPS IN A TOWN AT ONCE.—The Paris correspondent of the *London Times* says: "A rapid and scientific mode of lighting and extinguishing public gas burners has been invented by a person named Nillatte. The opening of the burner of each lamp is covered with a piece of soft iron, mounted upon a hinge. In connection with this is a wire extending from a galvanic battery the entire length of the service of the gas lamps, and close to the orifice of each burner is a small slip of platina. The soft iron, becoming a magnet when acted upon by the electric fluid, opens or closes the orifice according to the motion imparted to it; the platina ignites when it is necessary to light the lamps, and thus every lamp in a large town may be lighted simultaneously, or extinguished in the same way, by a different action on this magnetized iron."

OMNIBUS ETIQUETTE.—A correspondent of the *Washington Republic* relates that three ladies stopped a *full omnibus* (it is quite an anomaly for an omnibus to be full) the other day in that city, and remarking that no doubt 'gentlemen would give up their seats to them, as they were too tired to walk." The appeal was promptly responded to, one gentleman going to the top of the omnibus and two to the pavement.

GREAT IMPROVEMENT IN DENTISTRY.—DR. NAPOLEON PRETERRE, Surgeon Dentist, lately from Paris, now at 333 Broadway, opposite the Theater, informs the public in general that persons who have had the misfortune of losing their teeth, can have them replaced, so as not to be distinguished from natural ones. His new sets of teeth, put in without pain, (with which one can grind the hardest aliments) are remarkable for their transparency and lightness; they serve, not only to perform mastication, and endow the voice with a distinct and easy articulation, but to bestow upon physiognomy that grace and regularity which are the most brilliant ornaments of beauty. Gold used in all operations will be of the first quality. Terms very moderate.
