Being the latest improvement in our profession, and having been sufficiently tested to warrant its utility, we take pleasure in recommending it as being far preferable in many respects to any other base heretofore used. It can be used in many instances where all other materials fail. No one need, therefore, despair. Call on me, give me your work and I will demonstrate these facts.

Remember that a full set of teeth on this method cost only half what they would on gold, and yet preferable in all respects.

THE NORMAL SERIES

OF

ARITHMETICS AND MATHEMATICS,

BY

EDWARD BROOKS, A. M.,

Professor of Mathematics in the State Normal School of Penna.,

Comprising a full course for

Common Schools, High Schools, Academies, Seminaries and Normal Schools.

THE PLAN, SCOPE, THOROUGHNESS and perfect simplicity of this Series commend it to the judgment and approval of all who examine it. It embraces the following works:

BROOKS' NORMAL PRIMARY ARITHMETIC.

Designed for the child's first text-book in the science of Arithmetic. A thoroughly philosophical and original work in its plan and treatment.

BROOKS' NORMAL ELEMETARY ARITHMETIC,

For Primary Schools, is designed to furnish an Introductory Course in Written Arithmetic, and is confined to the rules and problems most used in every day business.

BROOKS' NORMAL MENTAL ARITHMETIC,

A complete text-book upon the subject of Mental Arithmetic, acknowledged to be the most philosophical and exhaustive work of the kind that has yet appeared, is now used as a standard work in the majority of the best schools in Pennsylvania. It contains a few pages of Mental Algebra, showing the use of the algebraic letters in working problems involving unknown numbers.

BROOKS' KEY TO NORMAL MENTAL ARITHMETIC,

A lucid expositor to the above, contains many excellent suggestions and as an assistant to the teacher of Mental Arithmetic, or the private student, will be found of great value. It contains valuable suggestions on methods of Teaching Mental Arithmetic, and also an interesting collection of problems for working up classes during a dull exercise.

BROOKS' NORMAL WRITTEN ARITHMETIC,

Designed to accompany the Normal Mental Arithmetic, is so admirable a treatise upon the science of numbers that it has caused the repeated revision of other works with which it has come in competition.

BROOKS' KEY TO THE NORMAL WRITTEN ARITHMETIC,

Designed as a Key to the above in which the principles and methods of Teaching therein presented are more fully developed, for the aid of instructor and Student.

BROOKS' NORMAL ELEMENTARY GEOMETRY,

Designed as an Elementary Work for Popular use, contains many new and simplified demonstrations in Geometry and Trigonometry. It presents the practical part of the subject in about one-half of the space usually devoted to it, without breaking the chain of logic, and is regarded as a most valuable addition to our educational literature. A number of Practical Problems are given after each Book, applying the principles taught in the demonstrations. Theories for original thought, without demonstrations, are also given, requiring pupils to try their unfledged wings in demonstrating without the aid of the text.

The publishers of the foregoing works, Messrs. Sower, Barnes & Potts, have in their possession letters recommending this entire Series in flattering terms from a large number of the most prominent educational magnates in this country, including such names as John S. Hart, LL. D.; James Waters, Principal, Academy Department, University at Lewisburg, Pa.; Thos. C. Porter D.D., Professor Natural Sciences, Franklin and Marshal College, Lancaster, Pa.; Joseph W. Wilson, Professor of Practical Mathematics, Philadelphia Central High School, and many others.

NEW SCHOOL PUBLICATIONS

OF

SOWER, BARNES & POTTS,

No. 37, North Third Street, Philadelphia, Penn.

THE UNDERSIGNED, BY AN ARRANGEMENT with George W. Childs, Esq., the eminent Book Publisher, respectfully announce that they have become sole Publishers of his

Entire List of School Publications,

and that they are now preparing new editions of the following well known and highly appreciated works:

I.

PETERSON'S FAMILIAR SCIENCE,

OR

SCIENTIFIC EXPLANATION OF COMMON THINGS;

To which is added Professor John Henry Pepper's popular treatise on Scientific Amusements for Young People; 12 mo., 591 pages, containing 100 illustrations. The vast field covered by the Modern Sciences, and the enormous amount of labor and study required of pupils to attain even a general knowledge of the multitude of absolutely important subjects pressing upon their attention, are creating grave discussions among the best educators concerning the limits of endurance of the Youthful mind and causing them anxiously to look round for more condensed works, containing clear, logical, but short and easily understood epitomes of the subjects of which they treat.

It has been the especial aim of Sower, Barnes & Potts to supply this great want in their School Publications, and this work on *Familiar Science* has been accepted by them as admirably calculated to meet the educational necessity above referred to. The immense sale the work has already had is the best evidence of the high evidence in which it is held among those best able to judge of its merits.

II.

FAMILIAR SCIENCE; 18 mo., 305 pages

This small work (an excellent abridgement of the foregoing) has also had an immense sale, and in announcing a new edition the publishers feel assured that the demand for it will be largely increased.
