GENERAL PRICE CUT GAINS MOMENTUM

Few Commodities Not Affected by Decline in Domestic Markets.

READJUSTMENT PROCEEDS

Detroit and Akron Want Immigration Halted as Unemployment Increases.

That officials of several of the most important automobile and tire manufacturing cities in the United States, including Detroit and Akron, have requested the immigration officials at Ellis Island to refrain from sending to those cities any more immigrants for the present was made known yesterday when the monthly review of business conditions was published by the Federal Reserve agent of the Federal Reserve Bank of New York. More than 85,000 immigrants entered the port of New York during September, the review said, nearly 30,000 more than in August and nearly the same as in pre-war years. The number of arrivals thus far in October, it was added, has been maintained. "Very recently," the review continued, "the local officials of Detroit, Akron and some other cities where unemployment is beginning to increase have asked the Ellis Island authorities not to send immigrants to them."

In relation to domestic prices, the review declared that the general price drop has proceeded with increased momentum and only a relatively small number of commodities has remained unaffected. Reports from various markets, it adds, give unmistakable evidence that readjustment is in progress. Many of the basic raw products, such as hides, leather, rubber, cereals, sugar, cotton and potatoes, have declined rather abrupty, and certain manufactured articles, notably textiles, automobiles and a number of other products, have had substantial declines also. The bank's index of twelve basic commodities dropped 11½ per cent. between September 20 and October 18, the heaviest month's decline recorded.

Dun's Review says that "hopes that reviving business will follow the elections find expression in some quarters, but the results of the balloting are not likely to prompt a sudden reversal of consumers' buying disposition, and there is no general expectation of any immediate appreciable recovery from the existing economic depression. While confusion over the fundamental causes of the commercial reaction has not been lacking, political factors do not explain the steadily yielding prices of commodities, the increasing curtailment of production and the continued spread of unemployment, and can hardly be similed out as giving promise of any abrupt change from this situation.

"At bottom, the business readjustment, as has been frequently reiterated, is the inevitable outgrowth of the great inflation and overextension of the war period and afterward, and the movement to start a sounder and more wholesome basis is not one which can be swiftly completed or effected without some measure of disturbance. The accompanying unsettlement has been more severe in some trades and industries than in others, but in all lines there is clear evidence of a transition to a new order of conditions and of a return of buyers' markets."

Bradstreet's State of Trade says: "The trade and price movement is more irregular, but on the whole rather less one sided than in the preceding week, further retrograde movements in wholesale trade, production, employment and prices seeming to be partially balanced by slight improvement in retail buying and a fairly distinct hardening in prices of farm products, which may or may not presage a turn in the hitherto ebbing tide of trade distribution.

"On what might be termed the constructive side of the situation is to be cited a slight increase in buying at retail—a quite distinct gain from quiet to fair being noted from the apparent dead low point of last week—the cause of this being apparently the advent of lower temperatures or prospects of more normal weather conditions West and South, though more attractive prices at retail are cited as a cause in some few markets."

WOOL MARKET.

BOSTON, Oct. 29.—The *Commercial Bulletin* will say to-morrow: "The market has been very dull during the last week and the tendency of prices is lower. The settlement of the English coal strike is considered a helpful factor in the market situation. The Government auction of low wools, suitable mostly for carpet purposes, was successful, only 5 per cent. being withdrawn. Low quarter blood territories sold at 10 to 14 cents in the grease, or an average of about 25 cents clean basis."

The *Commercial Bulletin* will print tomorrow wool prices as follows and with the statement that quotations are more or less nominal. Domestic: Ohio and Pennsylvania fleeces, delaine unwashed, 60c.; fine unwashed, 40@50c.; ½ blood combing, 50@55c.; ⅜ blood combin, 38@40c. Michigan and New York fleeces: Fine unwashed, 45@47c.; delaine unwashed, 55@58c.; ¼ blood unwashed, 50@52c.; ⅜ blood unwashed, 38@40c. Wisconsin, Missouri and average New England: ½ blood, 48@50c.; ⅜ blood, 38c.; ¼ blood, 36@37c. Kentucky, West Virginia and similar. ⅝ blood unwashed, 41@42c.; ¼ blood unwashed, 40@41c. Scoured basis: Texas—12 months, 90c.@$1.05; fine 8 months, 80@85c. California — Northern, $1; middle county, 95c.@$1; southern, 85@90c. Oregon—Eastern, No. 1 staple, $1@$1.05. Eastern clothing, 95c.@$1; valley, No. 1, $1. Territory—Fine staple, $1.05@1.10; ½ blood combing, 90c.@$1; ⅝ blood combing, 70@75c.; ¼ blood combing, 57@60c.; fine clothing, 90c.@$1; fine medium clothing, 75@80c. Pulled—Delaine, 95c.@$1; AA, 90@95c.; A supers, 65@70c. Mohairs—Best combing, 40@42c.; best carding, 33@35c.

FREEPORT-TEXAS REPORT.

The Freeport-Texas Company reports, for nine months ended on August 31, its net income, after interest, depletion, depreciation and taxes, as $492,913, equivalent to 98 cents a share earned on its outstanding stock. Gross sales were $3,626,523 and costs and expenses, $2,273,049. Other income amounted to $12,801, and interest, depletion, depreciation and taxes to $873,362.

LIVERPOOL COTTON STATISTICS

LIVERPOOL, Oct. 29.—Weekly cotton statistics: Imports, 34,000 bales, American 24,000; stock, 856,000, American 503,000; forwarded, 49,000, American 37,000; exports, 3,700; sales, 34,000, American 24,000; quantity afloat, all kinds, 240,000 bales, American 202,000 bales.

Bankers Announce Plan for Goodyear Tire and Rubber Company.

Goldman, Sachs & Co. and A. G. Becker & Co., on behalf of themselves, the Chase Securities Corporation, the Continental and Commercial Securities Corporation of Chicago and Lehman Brothers announced yesterday that, subject to the execution of formal papers, arrangements under which the Goodyear Tire and Rubber Company would receive a credit of $25,000,000 had been concluded.

It would be done, it was said, by renewal of maturing loans or by extension of new bank credits and would make it unnecessary for that company to do any further financing at present.

The syndicate announced also that a careful study to determine what permanent financing, if any, might be necessary for the company was being made, but it is not expected that any announcement in that connection will be made for considerable time.

COTTON MARKET IS STEADILY PRESSED

Makes Several Nervous Swings Due to Covering—Close Is Near Lowest.

The cotton market yesterday was generally unsettled and made several nervous swings due to preelection evening up. The tone was weak during the major portion of the session, active options selling 60 to 85 points net lower at one time. The bearish features included continued adverse reports from mill centres, weak Liverpool cables and a poor showing in Fall River. Print cloth sales in the Fall River market amounted to only 6,000 pieces, prices again sagging and curtailment increasing. Liverpool interests sold from the opening on and there was further liquidation by local and outside longs who feared for the safety of their position over the week end.

The market felt the absence of trade buying, which in recent sessions had been a supporting feature. The list was easy at the opening and net 15 to 35 points lower. Bears called attention to early advices from the South of wage reductions at cotton mill centres and reports that Governors of cotton States were unwilling to issue proclamations asking ginners to shut down for thirty days. The market sold off 35 to 55 points in the forenoon before showing any sign of recovering. Shorts took profits at the bottom, however, and there may have been a little new buying based on frost indications. It caused a rally to within a few points of Thursday's finals. Then the market met renewed selling from several sources.

Business was hardly as heavy as it was in Thursday's session. Many traders did nothing pending further outside developments and the result of the election. Spot houses were occasional buyers and commission houses acted on both sides. The volume of Southern hedge selling was relatively light. Bulls stressed the day's heavy exports. About 50,000 bales were cleared for European ports. In the last hour the market was under steady pressure and was given little chance to sell higher. The close was near the lowest and generally 45 to 85 points net lower. Local spot was off 4 points at 22.20 cents.

Range of prices:

	Open.	High.	Low.	Close.	Thursday.
November	20.53	20.56	20.53	20.70 N	21.60

Liverpool cables: Spot cotton, fair business doing at 16 points decline; middling, 16.55d. Sales 8,000, American 6,000. Imports 2,000, none American. Tenders, new docket, 2,000. Future opened quiet at 15 to 22 points advance. Closed easy at a net decline of 29 to 31 points. Closing prices: December, 15.38; January, 15.06; March, 14.60; May, 14.38; July, 14.12. Manchester: Yarns and cloths quieter.

NEW ORLEANS COTTON MARKET

NEW ORLEANS, Oct. 29.—The cotton market opened to-day at the decline, remained depressed throughout the session and closed at the lowest at losses of 72 to 90 points. December traded down to 20.18 and May to 19.25. Heavy liquidation from the long side was mainly responsible for the decline, although a considerable volume of short selling was founded on the continued unfavorable tone of reports from mill centres. The close: December, 20.18; January, 19.67; March, 19.50; May, 19.25; July, 19.05. Spot steady and unchanged. Middling, 21.00.

COFFEE MARKET.

As a result of continued liquidation the coffee market opened yesterday 2 to 7 points lower, but trading throughout the day was not quite as active as it had been in several preceding days. Late in the day there was a rally of 11 to 13 points, due to rumors that Rio had been privately reported higher and the Brazilian Government probably would announce soon some definite plan with which to stabilize the primary markets. They failed, however, to hold the advance. During the afternoon much early gain was lost and the market acted heavy at the close, being net unchanged to an advance of 6 points. Santos offers in the cost and freight market were a little lower and there was also a decline in the local spot market, in which quiet demand was reported.

Range of prices:
