PART PAYERS SAFE, ASSERTS FRUEAUFF

Official of Cities Service Says Their Status Unchanged by Scrip Action.

The status of the partial payment investors in the Cities Service Company's stocks has been unchanged by the declaration of scrip dividends and the subsequent crash in the market value of the stocks, which in the case of its common stock extended to almost 100 points in two days, according to Frank W. Frueauff, vice-president or the company. The situation of those investors, numbering, it is understood, hundreds, has been a subject of interest in Wall street. Many of them bought the stock at prices double the present market value and with the tremendous depreciation in the value of their holdings in the last few days, the financial district was interested to learn the status of those accounts.

"Henry L. Doherty & Co.," Mr. Frueauff said, "have never accepted margin accounts of any kind, and their partial payment sales have not been made on a margin basis. The decline in Cities Service securities has in no way affected these partial payment accounts as they are treated as sales made to actual purchasers, to be paid for on instalments and no calls of any kind have or will be made on these accounts except the regular monthly payments provided for in the partial payment contracts. All these accounts are on a strictly cash basis as no collateral is ever accepted as either initial or monthly payments on the accounts, they being in this regard entirely different from the usual partial payment methods."

Mr. Frueauff also took occasion to deny reports that the preferred stockholders' rights had not been properly safeguarded in the declaration of the scrip dividends. When the directors met last week they declared dividends on all four classes of stock, all payable in scrip, and the point was made in certain quarters that the right of preference on the part of holders of the senior issues had been violated. Those rights will be carefully guarded in the issuance of the scrip representing dividends, Mr. Frueauff said. The scrip dividends to be paid on the preferred shares, he said, would have priority of claim and must be liquidated before redemption of the scrip paid on the junior issues. "In other words," he added, "in issuance of the scrip, the rights of holders of the preferred stock will be strictly and fully safeguarded."

The market for Cities Service securities recovered yesterday, the common stock advancing 9 points from Monday's last price to 132. The preferred gained 2 points to 43.

DIVIDEND IS DEFERRED ON BOSTON AND MAINE

Hustis Believes, Though, Business Will Increase.

BOSTON, June 14.—Announcement that no action was taken by the board of directors of the Boston and Maine Railroad at a meeting to-day in the matter of declaring a dividend on the first preferred stocks, which would normally be payable on July 1, was made by President J. H. Hustis. He pointed out that dividends on these stocks were cumulative and said they would be paid when earned, and added: "The conditions which made it necessary to defer action on the preferred dividends due January 1 last have continued during the intervening months, and as a result it is estimated that the deficit for the first six months of 1921, after the payment of fixed charges and taxes, will be over $7,000,000.

"This period was abnormal in many respects for all railroads. With the Boston and Maine the sharp decline in business which began in November, 1920, has continued up to the present without any substantial recovery. Wages have been at their maximum and the fuel and materials used in this period were necessarily purchased or contracted for at the high prices of 1920. Maintenance both of track and equipment, which had been deferred because of conditions due to the war, was necessarily prosecuted to a greater extent than would ordinarily have been justified

"We believe, however, that the second half of the year will show a different tendency. We have the Labor Board decision as to wages which should result in a substantial saving. The Labor Board has also decreed the abrogation of national agreements on July 1, but we cannot yet estimate the effect of that decision.

"We know that reduced prices of locomotive fuel should have a substantial effect on operating expenses.

"It is believed that any increase in business—and there are some indications of a slight revival—could be handled with a relatively small increase in expenses."
