# COTTON MARKET MOVES NERVOUSLY

## Sentiment Confused and Trading Is for Week End Evening Up.

With two important Government reports scheduled for to-morrow and sentiment so confused in commission house and trade circles, yesterday's abbreviated session of the cotton market resolved itself into a nervously fluctuating affair of evening up by local and outside interests. How far the official ginning returns may go to offset the Department of Agriculture's condition and crop report furnished the trading element with much food for thought. General opinion was mixed, and for the moment the market's statistical position was forgotton.

The market showed a net decline on active positions of 20 to 32 points at the close, final bids being at the day's lowest level. Initial sales were 5 to 15 points net higher, the upturn at the start being due to overnight Wall Street buying orders and scattered trade support, based on unfavorable weather conditions in the cotton belt, another bullish private condition report, and the rise of securities. Soon after the call the market met pressure from Southern interests, local longs and Wall Street and declined about ¼ cent a pound under the preceding final bids.

According to prominent Chicago houses, wholesale dry goods distribution continued about on the level of that of the last few weeks. Fall River sales were greater than estimated on Friday, the total being 200,000 pieces. The market is no longer much concerned with weather conditions. Bulls found little ammunition in yesterday's adverse weather map. The eastern belt was unsettled and showery. It was partly cloudy in central portions of the South and clear in the far West. More than two inches of rain fell at Galveston, Texas, and about one inch at Corpus Christi.

Opinion on the floor sugests that tomorrow's ginning returns will be between 2,750,000 and 3,000,000 bales. The Texas ginning is estimated at 1,000,000 bales. Last season's ginning to September 25 was 2,249,506 bales. It was sugested that sellers on a bearish ginning report may be compelled to cove on a bullish condition report. If private reports have been correct, to-morrow's report will not show a condition much higher than 40 per cent. of normal.

Latest export returns reveal the fact that shipments to Germany are steadily growing in size. The last week's exports to Germany totalled 49,570 bales against 14,090 bales to the United Kingdom. The season's exports to Germany amount to 258,017 bales against 100,000 to Great Britain.

The local market for spot cotton was 20 points net lower at 21.10 cents a pound.
