PRESSURE PRUNES COTTON 72 POINTS

Weakness in Liverpool Starts Local Futures Market on Toboggan.

Further active liquidation and new speculative selling was encountered in yesterday's cotton market, which broke about 52 to 72 points under Saturday's closing prices late in the day and ended weak and unsettled around its lowest level. Much pressure encountered yesterday undoubtedly was caused by the proximity of the Government ginning report, due to-day. There was the possibility that this report would indicate a crop greater than looked for. Some operators have been of the opinion that the crop may be close to 10,000,000 bales.

The early selling movement really was started by the weakness of Liverpool. Cables were decidedly lower than expected. Instead of opening 4 to 8 higher, Liverpool futures opened 5 to 8 lower and later turned weak. Spot business abroad continued slow, only 6,000 bales changing hands yesterday. December was relatively weak even at the outset, reflecting liquidation before first notice day, next Friday, and the tendency of many longs to transfer commitments to later positions.

At first mill demand and profit taking from shorts furnished the market with rallying power on the break, but even this support was not sufficient to hold the list late in the day, when local operators were general sellers. The trade seemed to anticipate another weak market in Liverpool to-day. Manchester cables were far from constructive. Reduced demand from India and China has led to serious consideration of half-time operations. In the South demand for the actual of late has not been so active.

The local spot market was quoted 65 points lower at 25.05 for middling. Delivery on contract was 600 bales. The New Orleans market was 25 points lower at 25 cents. Its sales were 102 bales.
