NEW PLAN OF BREAKING IN HORSES.

A new system of breaking in horses, by means of every few reasons, and so as to preserve all their precious qualities, has come into use; and what is singular is that the author of it is a lady, named Isabelle. Having a great liking for horses, Madame Isabelle some years ago began studying the different systems employed in breaking in horses, and came to the conclusion that they were all more or less defective. She then sought for a plan of her own, which should render the horse more tractable by developing its intelligence; and she succeeded in discovering one so perfect that the most restive horse is reduced to obedience in a very short time, and without the slightest ill-treatment. He plan, as is almost always the case with things really useful, is very simple. She begins by making the horse carry his head high, and perpendiculary, whereby she prevents the weakness caused by the constant bending of the neck gives free play to the muscles in the neck, and allows full action to be exercised over the mouth. Then she places on the horse a surcingle, surmounted by an iron rod 15 inches long, which is bent four inches forward at the summit.—On each side of the rod are placed four rings, destined to receive reins according to the height that may be desired. The horse soon gets accustomed to this check, and it exercises great moral effect on him. He places his head in such a manner as not to suffer from the bit in the mouth, and thereby soon gets accustomed to being held in hand by his rider or driver. The surcingle also promptly accustoms him to adopt the best movements, and to advance when desired without offering any resistance. The breaker is remains at the left of the horse, and is armed with a whip with a spur in it. After forming her system, Madame Isabelle went into Germany, and practised it with remarkable success on horses belonging to Prince de Lichtenstein, at Vienna. From Vienna she went to Russia, and there stopped two years. In the course of that time she rendered completely docile all the most restive horses of the old cavalry regiment at St. Petersburg as well as those of the Emperor Nicholas. Recently she returned from France, and having explained her plan and stated its results to the Minister of War, she was, by the special direction of the Emperor, who was consulted, authorised to practice it on a number of young horses of the regiment of Guides, and with an equal number recruits who had recently joined the regiment. The lessons were given under her direction at the riding-school of the Ecole Imperiale d'Application d,Etat Major. After the fifteenth lesson the horses manoevered with the tranquillity and precision of old troop horses. A few days ago Col. Fleury, who commands the regiment, manoevered the horses and recruits, and every one of the usual cavalry movements was admirably executed.

☞ The farm of Bryan Jackson, near Wilmington, Delaware, consists of 220 acres. On this farm he employed three hands all the year, at $132 per annum, each; two men extra for six months, at $12 per month, and day hands, whose wages amount to about $50 a pear; making in all for labor, a cost of $590 a year. Mr Jackson, in the Farmer, says: "The sale of the farm the past year will not vary much from fifty-three hundred dollars."

Tomato Pie.—Have your plate lined with past, spread thereon a layer of sliced green tomatoes, add a tea-cupfull of molasses, two small table-spoonfulls of flour, a little salt and nutmeg. Cover with paste, and bake slowly, and it will make a excellent pie.

To cure scratches on a horse, wash the legs with warm soap suds, and then with beef brine.—Two applications will cure in the worst case.

The British Quarterlies and Blackwood's Magazine.

Leonard Scott & Co., New York, continue to publish the following British Periodicals:

The London Quarterly Review (Conservative.)
The Edinburgh Review (Whig.)
The North British Review (Free Church.)
The Westminster Review (Liberal.)
Blackwood's Edinburgh Magazine (Tory.)

The present critical state of European affairs will render these publications immediately interesting during the year 1854. They will occupy a middle ground between the hastily written news items, crude speculations, and flying rumors of the present daily journal, and the ponderous Tome of the future historian, written after the living interest and excitement of the great political events of the time shall have passed away. It is to these periodicals that readers must look for the universally intelligible and reliable history of current events, and as such, in addition to their well established literary, theological, and scientific character, we urge them upon the consideration of the reading public.

Arrangements are in progress for the receipt of early sheets from the British publishers, by which we shall be able to place all our Reprints in the hands of subscribers about as soon as they can be furnished with the foreign copies, although this will involve a very large outlay on our part, we shall continue to furnish the periodicals at the same low rates as heretofore, viz:

Dr. Easterly—Sir: We take pleasure in stating that we have purchased 20 bottles of your Fever and Ague Killer, and have sold the same to our patrons, and that it has effected a permanent cure in every case. We have sold nearly all the various medicine for ague and fever, but none has given such entire satisfaction as your Fever and Ague Killer. We believe it is the best medicine now before the public.

Respectfully, John Miller & Co.

Read the letter from John S. Crump, Grand Saline, Arkansas, Cherokee Nation, bearing date August 13, 1853.

Dr. Easterly—Sir: When I was in your city in March last, I purchased one dozen bottles of your Fever and Ague Killer, which you warranted to me. I have sold seven of the dozen, which I also warranted. Your medicine has given entire satisfaction so far, it having effected seven cures of the Chills and Fever. One case particularly—a lady who had been afflicted since the latter part of last summer, and had tried a great many remedies, besides having a physician part of the time, all of which failed. She bought a bottle of your medicine, and before she had used one-third of it, she was entirely cured, and has enjoyed good health ever since. In no case has it failed to effect a permanent cure.

Respectfully yours, John S. Crump.

Dr. Carter's Cough Balsam.

For the cure of Coughs, Colds, Asthma, Consumption, Bronchitis, Spitting of Blood, Pain in the Side and Breast, Pleurisy, Whooping Cough, and all diseases of the Lungs and Chest.

Among all the celebrated remedies for Diseases of the Lungs and Chest, none seem to be meeting with such success and to give such entire satisfaction to all, as

DR. CARTER'S COUGH BALSAM.

This valuable remedy is purely vegetable in its ingredients, and perfectly harmless in all its qualities, and as mild and pleasant as the most delicate cordial. It is very soothing and healing to the Lungs, and is every where acknowledged by Druggists, Physicians, and all who have used it to be the most Effectual Curative known.

CONSUMPTION.

No disease incident to our climate is so universal, and at the same time so fatal, as Pulmonary Consumption. This awful malady sweeps over the land as a Destroying Angel, laying low the strongest and fairest of our race. Million of the young and the old are annually hurried to the tomb by this dreadful national disease.

Consumptive Reader!—Beware of mere palliative medicines. The object of nearly all the medicines now offered for diseases of the Lungs, is to relieve and not to cure. Such is not the case with Dr. Carter's Cough Balsam. In colds and coughs, which are the first symptoms of consumption, it is the most pleasant and efficacious remedy that can possibly be used. In confirmed consumption it has been used with perfect and triumphant success, when the most eminent physicians had given up all hope as vain. So confident is the proprietor of its power to cure Tuberculous Consumption, that he solicits a trial in the worst of cases.

SPITTING OF BLOOD.

This frightful symptom of consumption is speedily checked and prevented by the use of Dr. Carter's Cough Balsam, which heals the affected membrane, removes the incipient tubercles, and restores those vital organs, the lungs, to a sound and healthy condition.

REMEMBER THIS.

Spitting of Blood always arises from a tendency to tuberculous disease, and if not checked at the onset, will sooner or later terminate in death. A person who raises blood once will raise blood again unless a proper curative is immediately employed.

PAIN IN THE SIDE,

This distressing symptom of consumption arises from inflammation of the lungs or membrane called the Pleura, or from bronchial affections of the air passages. In either case it is a very dangerous indication of disease. It prevents full and free breathing, and wears away the natural strength of the system. The cause of this symptom should be removed at once, and nothing can possibly effect that object so speedily and happily as Dr. Carter's Cough Balsam which is always safe and salutary in its effects on the constitution.

LIVER COMPLAINT.

In cases of consumption the Liver is always more or less affected, and also the spleen, pleura and small intestines. The effect of Dr. Carter's Cough Balsam to diseases of the Liver, especially if it be of an ulcerous nature, is direct and powerful. Simple disease of the Liver unattended by consumption is speedily cured by its use.

WINTER COUGH.

The harsh dry winter cough which afflicts old people and invalids in a low state of health, can be effectually cured by the use of Dr. Carter's Cough Balsam. It warms, moistens and stimulates the whole breathing apparatus, purifies and animates the blood, improves the secretive power of the Liver, Spleen and other large glands, and the digestive organs, and imparts new life to the wan and emaciated system.

BRONCHITIS.

Bronchitis, difficulty of breathing, hard cough, a slimy expectoration, with all other symptoms caused by an affection of the air tubes leading from the throat to the lungs, are directly and specifically affected and cured by the use of Dr. Carter's Cough Balsam. This is a very painful, wearing and injurious complaint, and always has a powerful tendency to inflame and soften the Lungs and thereby induce the worst forms of pulmonary disease. Be warned in time, ye afflicted, and employ this valuable remedy.

EXPECTORATION.

Free Expectoration is the most important object to be obtained in all attempts to cure diseases of the chest and lungs. The cough which is so distressing is simply the result of a desire to expectorate, and as long as foul matter exists in the air passages, it will continue to irritate the membrane and provoke a cough. Coughing is an attempt to throw off this matter, and expectoration gives great relief. Inability to expectorate in the latter stage of consumption is the cause of death.

DR. CARTER'S COUGH BALSAM,

is the great expectorant. It dissolves the morbid and disease matter in the air passages, changes it from a thick glutinous substance to a thin harmless fluid, and throws it off with the greatest possible ease to the patient. There is no better medicine in the world if its expectorant qualities alone be considered.

SPASMODIC ASTHMA.

For simple or spasmodic asthma there is no better remedy than Dr. Carter's Cough Balsam. This distressing disease which resists almost everything else, yields to the all powerful influence of this great remedy as readily as any other form of pectoral disease.
