Machinery, &c.

A NEW THING ENTIRELY.—The most astonishing performance heard of. Barrels, Firkins, Kegs, and the whole cooper family made and finished, without a defect, air tight, and smooth enough to varnish, entirely by machinery.

Our Machine, with the tools used to perform the work, is a patent for which we have received Gold and Silver Medals and State Diplomas. It takes the timber in the bolt, cuts to the stave hollowing in the grain, cuts them all of equal length, planes both in and outside perfectly smooth, tries the quality of the timber, joints them in a perfect manner, giving each stave its equal proportion of bilge, according to its width, be it wide or narrow; chamfers howels, cuts the crozes, turns the head and prepares the barrel or keg for the coopers hoops, in a manner not to be surpassed, and of superior finish, that we challenge the World to produce a better barrel, firkin or keg, than our Machines make, at the rate of 1 a minute by the single set—to which we attribute the particular attention of all who choose to give them inspection. We manufacture articles of the barrel family from the smallest whiskey keg to the largest cask; to prevent a leak in any of which can be truthfully boiled the most caustic liquids, or be adapted to the packing of dry goods. In fact the Machines cannot make an imperfect article except the defect is exclusively in the timber.

We have a shop at Elmira, N. Y., directly on the line of the New-York and Erie Railroad, and the Elmira and Niagara Falls Railroad, five minutes' walk north of the depot, where any person who will can witness the operation of the Machines, and test, to their perfect satisfaction, every article made by them in a day or week. We will feel the utmost pleasure in exhibiting to such, everything connected with the work.

Persons desirous of purchasing the Right and Machines for any location now unsold, can obtain any information in relation thereto by applying to us through the mail. There are but a few of the Rights now remaining in our hands unsold, such applicants will be referred to the present owners, most of whom will be double hold for disposal desirable locations within their respective territories. It is conceded by all judges who have examined the machine, that it surpasses everything that has or can be invented for the same purpose, and must entirely supersede all hand coopering.

Specimens of our work can be seen by calling on the Editors of The New-York Tribune. WM. TRAPP & Co., Patentees and Proprietors, Elmira, New-York, March 16, 1853.
