Machinery, &c.

A NEW THING ENTIRELY.—The most astonishing performance board of—Barrels, Firkins, Kegs and the whole cooper family made and finished, without a defect, air-tight, and smooth enough to varnish, entirely by machinery.

Our Machine, with the tools used to perform the work, is a patent, for which we have received Gold and Silver Medals and State Diploma. It takes the timber in the bolt, saws the stave hollow in the grain, cuts them all of equal length, planes both in and outside perfectly smooth, tries the quality of the timber, joints them in a perfect manner, giving each stave its equal proportion of bilge, according to its width, be it wide or narrow; chamfers the ends, cuts the chime, turns the head, and prepares the barrel or keg for the hooping process, in a manner so perfect, complete, and of superior finish, that we challenge the world to produce a better barrel, firkin or keg, than our Machines make, at the rate of 300 per day in the single act, to which we invite the particular attention of all who choose to give them inspection. We manufacture articles of the barrel family, from the smallest white lager beer keg, to the largest cask, the use of all of which can be warranted to hold the most subtle liquids, or be adapted to the packing of dry goods. In fact, the Machine cannot make an imperfect article, except the defect is exclusively in the timber.

We have a shop at Elmira, N. Y., directly on the line of the New-York and Erie Railroad, and the Elmira and Niagara Falls Railroad, five minutes' walk north of the depot, where any persons who may wish to witness the operation of the Machine, and test to their perfect satisfaction every branch of the work. We will be at the utmost pains in explaining to such everything connected with the work.

Persons desirous of purchasing the Right and Machine for any location now vacant, can obtain any information by addressing thereto or applying to us through the mail. There are but a few of the States unoccupied, to which we will give a good title. Application should be made by the proper owners, none of whom will be found, hold for illegal, desirable locations within their respective territories. It is now settled by all judges who have examined the Machine, that it accomplishes everything that has or can be intended for the same purpose, and most entirely supersedes all hand coopering.

Descriptions of our works can be seen by calling on the Editors of the New-York Tribune.
