Machinery, &c.

A NEW THING ENTIRELY.—The most astonishing performance heard of—Barrels, Firkins, Kegs, and the whole cooper family made and finished, without a defect, air-tight and smooth enough to varnish, entirely by machinery.
Our Machine, with the tools used to perform the work, is a patent, for which we have received Gold and Silver Medals and Diplomas. It takes the timber in the bolt, saws the stave mullen into the grain, cuts them all of equal length, planes both in and outside perfectly smooth, tries the quality of the timber, joints them in a perfect manner, giving each stave its equal proportion of bilge, according to its width, be it wide or narrow; chamfers bowls, cuts the crozes, turns the head, and prepares the barrel ready for the hooping process, in a manner so perfect, complete, and of superior finish, that we challenge the world to produce a better barrel, firkin or keg, than our Machines make, at the rate of 300 per day to the single set. We have given the particular attention of all who choose to give them inspection. We manufacture articles of the barrel family, from the smallest white lead keg to the largest cask in general use, all of which can be warranted to hold the most subtle liquids, or be accepted to the packing of dry goods. In fact, the Machine cannot make an imperfect article, except the defect is exclusively in the timber.
We have a shop at Elmira, N. Y., directly on the line of the New-York and Erie Railroad, and the Elmira and Niagara Falls Railroad, five minutes' walk north of the depot, where we will be happy to receive inspection of our Machines, and test, to their perfect satisfaction, every branch of the work. We will feel the utmost pleasure in exhibiting to such everything connected with the work.
Persons desirous of purchasing the Rights and Machines for any location now unsold, can obtain any information in relation thereto by applying to us through the mail. There are but a few of the States remaining in our hands unsold, still, applicants will be referred to the present owners, most of whom will no doubt hold for disposal, desirable locations within their respective territories. It is conceded by all judges who have examined the Machine, that it surpasses everything that has or can be invented for the same purpose, and must entirely supersede all hand-coopering.
Specimens of our work can be seen by calling on the Editors of The New-York Tribune.

HAVING NOTICED CLARK & BENTON'S PATENT MILL MACHINERY ADVERTISED—Notice is given to parties selling or using any Machinery containing straight stationary bolting by atmosphere or internal excitement that patent was granted to Frost & Monroe, Feb. 27, 1849, which is claimed to cover that principle. See AGENT, No. 343 Broadway.

SPECULATION and MONEY.—CLARK'S MERCHANT MILL, decidedly the most perfect piece of machinery ever invented for the manufacture of Flour. For description we refer to the following certificates from Rochester, the greatest milling point in the world:
This is to certify that we were present to witness the practical operation of the Clark Mill, and we take pleasure in saying that it far surpassed our most sanguine expectations. We were presented with some of the flour ground while present, which in quality possesses all the advantages of any we have ever seen. By this simple invention, from $1,000 to $10,000 worth of machinery is saved; also a large saving of power. This Mill is applicable to any power from two horses upward. They are all complete with the right to use them for $400. Only think of it, a complete Merchant's Mill, French Burr Stone Bolt of best quality, all ready to go to work, making from one to two barrels of flour per hour of as good quality as any mill in the world. We unhesitatingly recommend this Mill to the public.
